

Pass Guaranteed Updated 4A0-113 - Practice Nokia OSPF Routing Protocol Exam Exams Free

What's more, part of that PassSureExam 4A0-113 dumps now are free: <https://drive.google.com/open?id=1ULqFDsQSKb1Tov9LU8vV5u3vTptFB2pX>

Solutions is one of the top platforms that has been helping Nokia OSPF Routing Protocol Exam exam candidates for many years. Over this long time period countless candidates have passed their dream Nokia OSPF Routing Protocol Exam (4A0-113) certification exam. They all got help from Exams. Solutions 4A0-113 Practice Questions and easily passed their exam. The Nokia 4A0-113 exam questions are designed by experience and qualified 4A0-113 certification expert.

Nokia 4A0-113 certification exam covers a wide range of topics related to OSPF routing protocol, including OSPF concepts and terminology, OSPF network design and implementation, OSPF area types and configuration, and OSPF troubleshooting and optimization. 4A0-113 exam also covers advanced topics like OSPF multi-area and multi-vendor interoperability. Passing the exam demonstrates that the candidate has a deep understanding of OSPF routing protocol and can effectively manage and troubleshoot OSPF-based networks.

Nokia 4A0-113 Certification Exam is a valuable certification for network professionals who want to demonstrate their expertise in OSPF routing protocols. Nokia OSPF Routing Protocol Exam certification validates individuals' skills in managing and troubleshooting OSPF networks, making them a valuable asset to any organization that relies on complex network infrastructures. With this certification, individuals can enhance their career prospects and demonstrate their commitment to continuous learning and professional development.

Nokia 4A0-113 Vce Test Simulator - Reliable 4A0-113 Exam Tips

There is a high demand for Nokia Development certification, therefore there is an increase in the number of Nokia 4A0-113 exam candidates. Many resources are available on the internet to prepare for the Nokia OSPF Routing Protocol Exam exam. PassSureExam is one of the best certification exam preparation material providers where you can find newly released Nokia 4A0-113 Dumps for your exam preparation. With years of experience in compiling top-notch relevant Nokia 4A0-113 dumps questions, we also offer the Nokia 4A0-113 practice test (online and offline) to help you get familiar with the actual exam environment.

Nokia 4A0-113 exam covers a wide range of topics related to OSPF routing protocol, including OSPFv2 and OSPFv3 operation, OSPF topology database, SPF algorithm, OSPF network types, OSPF authentication, OSPF route redistribution, and OSPF multi-area networks. 4A0-113 exam also tests the candidate's ability to troubleshoot common OSPF problems, such as network convergence issues, OSPF neighbor relationship problems, and OSPF route selection problems. By passing 4A0-113 Exam, candidates can demonstrate their expertise in Nokia Service Router networks and open up new opportunities for career advancement in the field of network engineering.

Nokia OSPF Routing Protocol Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40

What causes an adjacency to change from "Init" to "Two Way"?

- A. When a router receives a Hello packet from a neighbor that contains its router id in the neighbor list
- B. When OSPF neighbors exchange Database Descriptor packets
- C. When a Link State Acknowledgement is received in response to a Link State Update
- D. When a Link State Update is received in response to a Link State Request

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF Adjacency Formation States):

The transition from Init to Two-Way occurs when a router receives a Hello packet from its neighbor that contains its own Router ID in the neighbor list.

Thus, correct answer: B.

-

All answers fully verified according to Nokia 7750 SR OS documentation.

NEW QUESTION # 41

What are the three databases maintained by a Link State Protocol?

- A. Neighbor, topology, forwarding
- B. Topology, routing, forwarding
- C. Neighbor, adjacency, route table
- D. There are only two databases: adjacency and topology

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (Link State Protocol Architecture):

Link state protocols (OSPF, IS-IS) maintain:

Neighbor (adjacency) database # tracks neighbors and adjacencies

Topology (Link State) database # entire area topology

Routing (Forwarding Information Base) derived from SPF calculations

Thus, correct answer is B.

NEW QUESTION # 42

An Nokia 7750 SR receives a route via an IS-IS LSP with internal reach ability, and receives the same route via an OSPF type 5 LSA.

If all protocol preferences are default, which route will be installed in the route table?

- A. The route learned via IS-IS will be installed.
- B. Both routes will be installed, if ECMP is enabled.
- C. The route learned via the OSPF type 5 LSA will be installed.
- D. Both routes will be installed, regardless of whether ECMP is enabled.

Answer: A

NEW QUESTION # 43

An OSPF ASBR must have at least one interface in the backbone area (area 0)

- A. True
- B. False

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF ASBR Behavior):

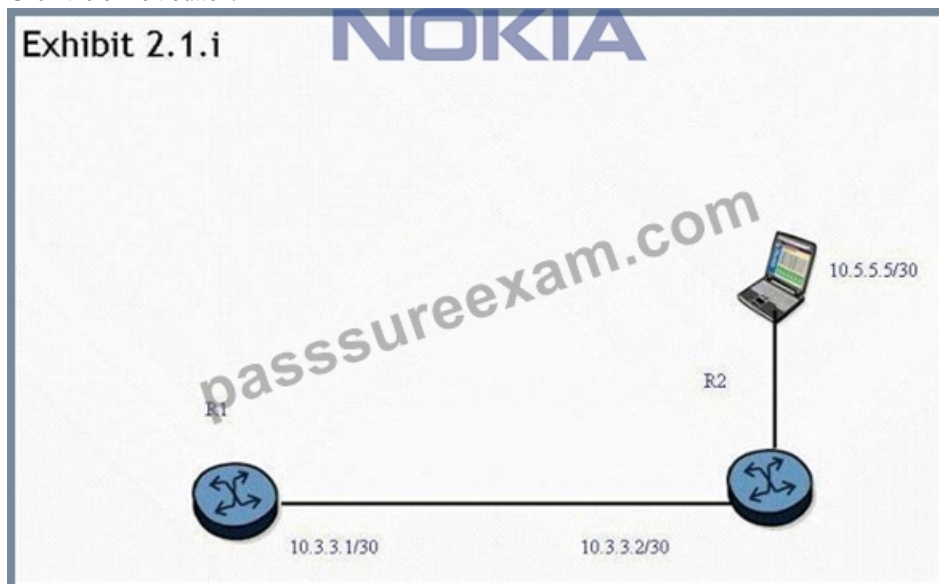

An ASBR can exist in any OSPF area - including stub or NSSA areas.

There is no requirement that an ASBR be directly connected to area 0.

Thus, correct answer: B (False).

NEW QUESTION # 44

Click the exhibit button.

A static route is created on router R1 "using the static-route 0.0.0.0/0 next-hop 10.3.3.2" command. What command can be used to test the static route on an Nokia 7750 SR?

- A. ping 0.0.0.0
- B. ping static 10.5.5.5
- C. ping 10.5.5.5
- D. ping static 0.0.0.0/0

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to Nokia 7750 SR OS Monitoring and Fault Management Guide (Ping Utility section):

"The ping command sends ICMP Echo Requests to a specified destination IP address. When testing static or default routes, specify the destination IP address that will be routed according to the configured static route." You configured a default route on R1 pointing towards 10.3.3.2.

The IP address 10.5.5.5 belongs to the network behind R2.

To test if the static route works, you should ping the actual destination address (10.5.5.5), which will force R1 to use the default route.

Hence, the correct command is:

ping 10.5.5.5

-

Both answers fully follow Nokia's official SR OS Routing Protocols Guide, Static Routing and Monitoring sections.
