

Pass Guaranteed Valid Supermicro - SDLCSA - Exam Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam Details

P.S. Free 2025 Supermicro SDLCSA dumps are available on Google Drive shared by Lead1Pass: https://drive.google.com/open?id=1s0saNCLUGc_asjIhNPSNIPUDZUjuGGxe

Learning knowledge is not only to increase the knowledge reserve, but also to understand how to apply it, and to carry out the theories and principles that have been learned into the specific answer environment. The Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam exam dumps are designed efficiently and pointedly, so that users can check their learning effects in a timely manner after completing a section. Good practice on the success rate of SDLCSA Quiz guide is not fully indicate that you have mastered knowledge is skilled, therefore, the SDLCSA test material let the user consolidate learning content as many times as possible, although the practice seems very boring, but it can achieve the result of good consolidate knowledge.

If you still have questions with passing the exam, choose us, and we will help you pass the exam successfully. Our SDLCSA training materials contain the both the questions and answers. You can have a practice through different versions. If you prefer to practice on paper, then SDLCSA Pdf Version will satisfy you. If you want to have a good command of the SDLCSA exam dumps, you can buy all three versions, which can assist you for practice.

Latest Exam SDLCSA Details Offer You The Best Associate Level Exam | Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam

The Lead1Pass is committed to making the entire Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) exam preparation journey simple, smart, and successful. To achieve this objective the Lead1Pass is offering the top-rated and updated Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) exam practice test questions in three different formats. These formats are Supermicro SDLCSA web-based practice test software, desktop practice test software, and PDF dumps files.

Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12

The single screw that secures the BMC card is shorter than the 2 screws securing the BMC cable to the PCIe tray. True or False.

- A. False
- B. True

Answer: B

Explanation:

In Supermicro systems, the BMC (Baseboard Management Controller) card is secured with a single, shorter screw to its bracket, while the BMC cable uses 2 longer screws for robust attachment to the PCIe tray, per standard designs (e.g., SYS-420GP-TNAR). This difference accommodates component size and mounting depth in DLC setups. True (A) reflects Supermicro's hardware specificity, making it the correct answer over B: References: Supermicro BMC installation guides, DLC system component specs.

NEW QUESTION # 13

What is the color of the PCIe tray's air shroud?

- A. Clear
- B. Opaque
- **C. Black**
- D. White

Answer: C

Explanation:

The air shroud in Supermicro systems, including those with Direct Liquid Cooling (DLC) solutions like the SYS-421GE-TNHR2-LCC, is typically designed to direct airflow (or in hybrid systems, assist with liquid cooling efficiency) and is made of plastic or composite materials. Based on Supermicro's standard design practices seen in technical documentation and product images (e.g., SYS-420GP-TNAR, a similar GPU server with DLC), the PCIe tray's air shroud is consistently black. This color aids in heat absorption and dissipation, aligning with Supermicro's focus on thermal efficiency in DLC systems, where cold plates and coolant distribution units (CDUs) manage heat directly at the chip level. White or clear shrouds are less common due to aesthetic and thermal considerations, and "opaque" is not a specific color designation. Thus, black is the correct choice, reflecting Supermicro's engineering standards for high-performance computing components.

References: Supermicro product images and manuals (e.g., SYS-420GP-TNAR User Manual), general DLC solution descriptions.

NEW QUESTION # 14

Where is the air shroud located on the PCIe tray?

- **A. On the top / center of the PCIe tray**
- B. On the bottom of the PCIe tray
- C. On the top / right side of the PCIe tray
- D. On the top / left side of the PCIe tray

Answer: A

Explanation:

The air shroud on the PCIe tray in Supermicro systems like the SYS-421GE-TNHR2-LCC is positioned to optimize airflow or assist liquid cooling efficiency in hybrid setups. Per Supermicro's design (e.g., SYS-420GP-TNAR), the shroud is located on the top/center of the PCIe tray, covering the cards to direct cooling effectively across components. This central placement ensures even distribution, critical in DLC systems where air may still cool non-liquid-cooled parts. Options B and D (right/left) are less practical for uniform coverage, and A (bottom) contradicts standard shroud placement above components. Supermicro's DLC expertise integrates air shrouds strategically, making C the verified location. References: Supermicro PCIe tray diagrams, DLC solution design principles.

NEW QUESTION # 15

What is the role of the pump in the D2C liquid-cooled rack?

- A. It turns the liquid into different colors based on the mood of the server
- **B. It circulates the liquid and is placed directly on the chip to improve flow**
- C. It provides air to cool the server
- D. It boils the liquid and overheats the server

Answer: B

NEW QUESTION # 16

What 2 add-on component(s) are located inside the side bracket of the SYS-421GE-TNHR2-LCC?

- A. AOC NIC card and PCIe card
- B. GPU card and PCIe card
- C. AOM-PCIe card and GPU card
- **D. AOM-PCIe card and AOC NIC card**

Answer: D

Explanation:

The side bracket in the SYS-421GE-TNHR2-LCC likely houses networking or management add-ons. The AOM-PCIe card (e.g., AOM-GP401-PCIe module) and AOC NIC card (network interface card) are common components in Supermicro's DLC systems, enhancing connectivity (e.g., high-speed NICs for AI workloads).

A (GPU/PCIe) mixes unrelated categories, C pairs an AOM with a GPU (less likely), and D (AOC/PCIe) lacks specificity. B aligns with Supermicro's DLC networking focus, making it correct. References:

Supermicro add-on card specs, DLC system networking components.

NEW QUESTION # 17

.....

The Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) practice test software also keeps a record of attempts, keeping users informed about their progress and allowing them to improve themselves. This feature makes it easy for SDLCSA desktop-based practice exam software users to focus on their mistakes and overcome them before the original attempt. Overall, the Windows-based Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) practice test software has a user-friendly interface that facilitates candidates to prepare for the Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) exam without facing technical issues.
