

Pass Guaranteed VMware - 2V0-32.24 - Accurate Valid Dumps VMware Cloud Operations 8.x Professional V2 Pdf

The main objective of Actual4Dumps 2V0-32.24 practice test questions features to assist the 2V0-32.24 exam candidates with quick and complete 2V0-32.24 exam preparation. The VMware 2V0-32.24 exam dumps features are a free demo download facility, real, updated, and error-free VMware 2V0-32.24 Test Questions, 12 months free updated VMware 2V0-32.24 exam questions and availability of 2V0-32.24 real questions in three different formats.

VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details
Topic 1	Architecture and Technologies: This section of the exam measures the skills of Cloud Architects and covers the core differences between VMware Cloud Management offerings, focusing on SaaS versus on-premises deployments. It introduces the capabilities of vRealize Suite Lifecycle Manager, vRealize Operations, and vRealize Log Insight, helping professionals understand the foundational technologies that support VMware's cloud ecosystem.
Topic 2	Administrative and Operational Tasks: This section of the exam measures skills of Cloud Administrators and covers daily operational tasks such as content and environment management in vRealize Suite Lifecycle Manager. It also includes managing licensing, alert systems, dashboards, metrics, cost assessments, capacity optimization, workload planning, and system monitoring. Additionally, it explores access control, patching, and retention settings in vRealize Log Insight, ensuring ongoing operational excellence across VMware tools.
Topic 3	Planning and Designing: This section of the exam measures the skills of Cloud Architects and covers the architectural models and sizing requirements for vRealize Operations and vRealize Log Insight. It evaluates the ability to choose between standalone, clustered, and high-availability setups, and to plan appropriately based on scenario-based requirements for capacity and deployment type, ensuring well-designed cloud solutions.
Topic 4	VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.

Valid Dumps 2V0-32.24 Pdf | Cogent for VMware Cloud Operations 8.x Professional V2

The APP online version of our 2V0-32.24 real exam boosts no limits for the equipment being used and it supports any electronic equipment and the off-line use. If only you open it in the environment with the network for the first time you can use our 2V0-32.24 Training Materials in the off-line condition later. It depends on the client to choose the version they favor to learn our 2V0-32.24 study materials.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q15-Q20):

NEW QUESTION # 15

vRealize Operations can be integrated with which two other VMware solutions? (Choose two.)

- A. vRealize Network Insight Cloud
- B. vRealize Automation
- C. vRealize Automation Cloud
- D. vRealize Log Insight
- E. vRealize Log Insight Cloud

Answer: B,D

Explanation:

vRealize Log Insight: vRealize Operations can be integrated with vRealize Log Insight to provide enhanced log management and visualization for troubleshooting and performance analysis across the environment.

vRealize Automation: vRealize Operations can also be integrated with vRealize Automation, allowing for better management and optimization of resources by correlating performance data with automation workflows.

NEW QUESTION # 16

Which three factors determine the size of vRealize Operations deployment? (Choose three.)

- A. Number of Remote Collectors
- B. Size of attached Cloud Proxies
- C. Number of Agents
- D. Size of monitored vCenter Servers
- E. Number of Objects
- F. Number of Metrics

Answer: C,E,F

Explanation:

Number of Objects

vRealize Operations sizing is fundamentally driven by how many infrastructure and application objects (VMs, hosts, datastores, etc.) are being monitored - each additional object consumes CPU, memory, and storage resources on the cluster.

Number of Agents

When using Application Remote Collectors, the total count of agents (for OS and application#level metrics) per node directly affects capacity planning, as each agent connection incurs processing and storage overhead.

Number of Metrics

The volume of distinct metrics collected (across all adapters and agents) determines database size and I/O load; sizing guidelines specify maximum collected#metric counts per node to ensure performance.

NEW QUESTION # 17

Which two support bundle types are available in vRealize Log Insight? (Choose two.)

- A. Full Support Bundle
- B. Static Support Bundle

- C. Streaming Support Bundle
- **D. Light Support Bundle**
- E. Standard Support Bundle

Answer: A,D

Explanation:

In vRealize Log Insight, two types of support bundles are commonly used:

Light Support Bundle: This bundle contains essential logs and configuration information that can be used for a quick analysis of common issues without including all the detailed data.

Full Support Bundle: This bundle includes a complete set of logs, configuration files, and other diagnostic data, providing a more comprehensive overview for detailed troubleshooting.

NEW QUESTION # 18

An administrator has been tasked to configure vRealize Operations to securely forward vRealize Operations logs to a centralized syslog server. The logs should be forwarded in their original format. What would be the resulting Protocol and Port configuration?

- **A. Port: 6514 - Protocol: syslog**
- B. Port: 514 - Protocol: syslog
- C. Port: 9543 - Protocol: cfapi
- D. Port: 9000 - Protocol: cfapi

Answer: A

Explanation:

To securely forward vRealize Operations logs to a centralized syslog server, the syslog protocol over port 6514 is used. Port 6514 is the default port for secure syslog (Syslog over TLS), ensuring that logs are transmitted in their original format while being encrypted for security.

NEW QUESTION # 19

An administrator needs to deploy a 3-node High Availability cluster of vRealize Operations using custom CA- signed certificates. An existing vRealize Operations development environment has previously been deployed using vRealize Suite Lifecycle Manager. Which method should the Administrator use to complete this objective?

- A. Deploy 3 nodes independently, replace certificates and then form the 3-node cluster.
- B. Deploy a single node cluster at the beginning to further expand it to 3 nodes in the next step.
- C. Deploy vRealize Operations analytics cluster using Command Line Interface.
- **D. Deploy vRealize Operations analytics cluster using vRealize Suite Lifecycle Manager.**

Answer: D

Explanation:

To deploy a 3-node High Availability cluster of vRealize Operations with custom CA-signed certificates, the best approach is to use vRealize Suite Lifecycle Manager (vRSLCM). Since vRSLCM has already been used in the existing vRealize Operations development environment, it simplifies the deployment process for a 3- node cluster, allowing for easy management of certificates

and cluster configuration.

Using vRSLCM allows for the configuration of custom CA-signed certificates during the deployment, and it supports the creation of the necessary cluster nodes in a seamless manner. This ensures that the HA configuration is maintained and the custom certificates are applied properly across all nodes.

NEW QUESTION # 20

.....

Our 2V0-32.24 Study Guide is famous for its instant download, we will send you the downloading link to you once we receive your payment, and you can down right now. Besides the 2V0-32.24 study guide is verified by the professionals, so we can ensure that the quality of it. We also have free update, you just need to receive the latest version in your email address. If you don't have it, you can check in your junk mail or you can contact us.
