Pass HPE0-S59 Guaranteed - Valid HPE0-S59 Test Labs

What's more, part of that ITPassLeader HPE0-S59 dumps now are free: https://drive.google.com/open?id=14ioNiVzfaUyAHZlnjqnJCQaYpRP3N-t1

We can say that how many the HPE0-S59 certifications you get and obtain qualification certificates, to some extent determines your future employment and development, as a result, the HPE0-S59 exam guide is committed to helping you become a competitive workforce, let you have no trouble back at home. Actually, just think of our HPE0-S59 Test Prep as the best way to pass the exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.

HPE0-S59 certification exam is ideal for IT professionals who are looking to enhance their skills and knowledge in HPE compute solutions. HPE Compute Solutions certification validates the candidate's ability to configure, manage, and troubleshoot HPE compute solutions, as well as their ability to recommend and implement solutions that meet the business needs of their organization.

HP HPE0-S59 Exam is a timed exam and consists of 60 multiple-choice questions. You will have 90 minutes to complete the exam, and you must score at least 70% to pass. HPE0-S59 exam is available in English and Japanese and can be taken at any Pearson VUE testing center around the world.

Authoritative Pass HPE0-S59 Guaranteed - Pass HPE0-S59 in One Time - Complete Valid HPE0-S59 Test Labs

The customizable HP HPE0-S59 practice tests create a scenario of a real-based HP which is helpful for students so they don't feel much pressure when they are giving the final examination. The students can give unlimited HPE0-S59 practice tests and make themselves better day by day to achieve their desired destination. The candidates can even access their previously given HP HPE0-S59 Practice Test from the history which allows them to be careful while giving the test next time and prepare for HP HPE0-S59 certification in a better way.

HPE Compute Solutions exam is intended for IT professionals who work in server administration, server design, and server architecture roles. HPE Compute Solutions certification is suitable for individuals who want to demonstrate their proficiency and understanding of HPE compute solutions in their roles. Candidates will have the opportunity to showcase their expertise in deploying, managing, and troubleshooting server solutions, as well as designing server architectures and building IT infrastructure plans.

HPE Compute Solutions Sample Questions (Q107-Q112):

NEW QUESTION # 107
Your customer plans to deploy a VMware ESXi with HPE Synergy platform. They plan to use Distributed Switches and DRS cluster You are preparing a proposal with the following components:
- HPE Synergy frame with ten HPE Synergy 480 Gen10 Plus compute modules
- two HPE Virtual Connect SE 100Gb F32 Modules for Synergy
- an appropriate number of the vSphere Standard licenses for each compute node
- one HPE D3940 Storage Modules with 40 SSDs - all required cables and options Which statement about this proposal is true?

- A. One HPE Virtual Connect SE 100Gb F32 Module for Synergy should be replaced with 50GD/S ILM
- B. vSphere Standard licenses should be replaced with Enterprise Pius licenses to enable requested features
- C. 2 additional HPE Synergy 480 Gen10 Plus compute modules can be added to this setup
- D. 20 SSD drives should be removed from this setup, as D3940 supports only 20 SSD or SAS drive.

Answer: B

Explanation:
The VMware vSphere Standard license does not include support for advanced features like Distributed Resource Scheduler (DRS) and Distributed Switches. These features are available only with the vSphere Enterprise Plus license. Therefore, to meet the customer's requirement of using Distributed Switches and a DRS cluster, the proposal should include vSphere Enterprise Plus licenses instead of Standard licenses.

NEW QUESTION # 108

The proposal consists of:
- 3 HPE Synergy 12000 frames
- 6 HPE Composer 2 modules
- 2 HPE Virtual Connect SE 100 GO F32 Module
- 4 HPE Synergy 50 GO interconnect Link Module

Which statements about this proposed design are true? (Select two.)

- A. Remove 4 HPE Composer 2 modules from the design, as they are not required
- B. The selected interconnect modules do not provide the requested WWN virtualization
- C. FC upgrade licenses for HPE Virtual Connect SE 100 GbF32 Module must be added
- D. HPE Synergy 50Gb ILMs must be replaced with HPE Virtual Connect SE 100 GO F32 modules
- E. The current setup can support up to 18 HPE Synergy 480 Gen10 Plus compute modules

Answer: C,E

Explanation:
C: The current setup can support up to 18 HPE Synergy 480 Gen10 Plus compute modules.
This is true because the HPE Synergy 12000 frames support a maximum of 18 compute modules, and with the design specifying 3 frames, this setup can indeed support up to 18 HPE Synergy 480 Gen10 Plus compute modules.
D: FC upgrade licenses for HPE Virtual Connect SE 100 GbF32 Module must be added.
This is correct because the HPE Virtual Connect SE 100 GbF32 Module typically requires FC upgrade licenses to enable Fibre Channel functionality. If FC is needed for the environment, those licenses should be included.

NEW QUESTION # 109

Put the steps of the HPE infosight flow in the correct order.

Answer:

Explanation:

Explanation:
(observing, learning, predicting, recommending, acting)
* Observing: The first step involves collecting and monitoring data from the infrastructure. HPE InfoSight continuously gathers telemetry data from various components, including storage, compute, and networking devices.

* Learning:In this step, the collected data is analyzed to identify patterns and trends. Machine learning
* algorithms process the data to understand the normal behavior of the system and detect anomalies.
* Predicting:Based on the learned patterns, HPE InfoSight can predict potential issues before they occur.
This predictive analysis helps in identifying areas that might cause problems in the future.
* Recommending:After predicting potential issues, HPE InfoSight provides actionable recommendations to prevent or resolve these
issues. These recommendations are based on best practices and the vast amount of data analyzed by InfoSight.
* Acting:Finally, the recommendations are implemented to optimize the performance and reliability of the infrastructure. This step
may involve configuring settings, applying updates, or other actions to maintain the health of the system.

NEW QUESTION # 110

Your customer plans to deploy VMware ESXi 7 0 U2 and they are looking for a hardware platform mat wilt allow them to use up
to 24 TB of physical memory.
Which HPE compute system meets this customer's requirements?

- A. HPE Synergy 480 Gen10 Plus
- B. HPE ProLiant DL380 Gen 10 Plus
- C. HPE ProLiant DL560 Gen10
- D. HPE Superdome Flex 280

Answer: D

Explanation:
The HPE Superdome Flex 280 is the appropriate hardware platform for a customer requiring up to 24 TB of physical memory. This
system is designed for high scalability and performance, supporting large memory configurations suitable for demanding applications
and workloads.

NEW QUESTION # 111

Which statement about a new HPE SimpliVity deployment is true?

- A. A new HPE SimpliVity node can be a member of multiple dusters
- B. AM new HPE SimpliVity models are software optimized
- C. All new HPE SimpliVity models are based on mid CPUs
- D. New HPE SimpliVity deployments gives customer flexible choice of hypervisor

Answer: D

Explanation:
New HPE SimpliVity deployments offer customers the flexibility to choose between different hypervisors, such as VMware vSphere
and Microsoft Hyper-V. This flexibility allows customers to select the hypervisor that best fits their existing infrastructure and
operational preferences.
