

Pass JN0-232 Guarantee | Exam JN0-232 Questions Pdf

There are some loopholes or systemic problems in the use of a product, which is why a lot of online products are maintained for a very late period. The JN0-232 test material is not exceptional also, in order to let the users to achieve the best product experience, if there is some learning platform system vulnerabilities or bugs, we will check the operation of the JN0-232 quiz guide in the first time, let the professional service personnel to help user to solve any problems. The Security, Associate (JNCIA-SEC) prepare torrent has many professionals, and they monitor the use of the user environment and the safety of the learning platform timely, for there are some problems with those still in the incubation period of strict control, thus to maintain the JN0-232 Quiz guide timely, let the user comfortable working in a better environment.

JN0-232 certification can demonstrate your mastery of certain areas of knowledge, which is internationally recognized and accepted by the general public as a certification. JN0-232 certification is so high that it is not easy to obtain it. It requires you to invest time and energy. If you are not sure whether you can strictly request yourself, our JN0-232 test materials can help you. With high pass rate of our JN0-232 exam questions as more than 98%, you will find that the JN0-232 exam is easy to pass.

Exam JN0-232 Questions Pdf | Certification JN0-232 Dumps

Some candidates may think that to get a certification cost too much time and efforts, but if they find the right exam materials, they will change their mind. Our JN0-232 study questions will not occupy you much time. Whenever you have spare time, you can learn and memorize some questions and answers of our JN0-232 Exam simulation. Gradually, you will learn much knowledge and become totally different from past. You will regret to miss our JN0-232 practice materials. Come to purchase our JN0-232 learning guide!

Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q43-Q48):

NEW QUESTION # 43

Click the Exhibit button.

Exhibit

```
[edit security utm utm-policy content-filter-1]
user@SRX# show
content-filtering {
  rule-set rule-set-1 {
    rule rule-1 {
      match {
        applications http;
        direction download;
        file-types exe;
      }
      then {
        action block;
        notification {
          log;
        }
      }
    }
  }
}
```

Juniper NETWORKS

itdumpsfree.com

Which two statements are correct about the content filter shown in the exhibit? (Choose two.)

- A. There will be an e-mail sent to the user about why the SRX is blocking the file.
- B. .exe files will not be allowed to be downloaded over HTTP.
- C. There will be a notice added to the SRX log file about the file being blocked.
- D. .exe files will not be allowed to be uploaded over HTTP.

Answer: B,C

Explanation:

From the exhibit, the content filter configuration is as follows:

* Match Conditions:

* Application:HTTP

* Direction:download

* File-types:exe

* Action:

* block

* notification log

Analysis of Options:

* Option A: Incorrect. The configuration specifies the download direction, not upload. Uploads of .exe files are unaffected.

* Option B: Correct. Because the rule applies to downloads, .exe files will be blocked when users attempt to download them over HTTP.

* Option C: Correct. The notification { log; } statement ensures that an entry will be added to the SRX device's log when the action is triggered.

* Option D: Incorrect. No configuration for sending e-mail notifications is shown in the rule. Only logging is specified.

Correct Statements: B and C

Reference: Juniper Networks -UTM Content Filtering Configuration and Actions, Junos OS Security Fundamentals, Official Course Guide.

NEW QUESTION # 44

You want to verify the effectiveness of Web filtering on the SRX Series Firewall.

How would you accomplish this task?

- A. by checking the file extensions of blocked content
- B. by examining the content filtering policies
- C. by attempting to access permitted or blocked URLs
- D. by installing a local NGWF server

Answer: C

Explanation:

The simplest and most direct method of verifying Web filtering effectiveness is to attempt to access permitted and blocked URLs.

* Option A: Installing a local NGWF server is not required; NGWF queries Juniper's cloud.

* Option B: File extension checking applies to content filtering, not web filtering.

* Option C: Examining policies shows configuration but does not verify enforcement.

* Option D: Correct. Attempting to browse URLs that should be blocked or allowed confirms the Web filtering policy is effective.

Correct Method: Attempt to access permitted or blocked URLs

Reference: Juniper Networks - Verifying Web Filtering Configuration, Junos OS Security Fundamentals.

NEW QUESTION # 45

Which statement is correct about capturing transit packets on an SRX Series Firewall?

- **A. You can capture transit packets using sampling and port mirroring.**
- B. You can capture transit packets by using a firewall filter on the loopback interface.
- C. You can capture transit packets by using the tcpdump utility in the shell.
- D. You can capture transit packets on the egress interface using a firewall filter.

Answer: A

Explanation:

Transit traffic is defined as traffic that passes through the SRX (not destined to the Routing Engine). To capture transit traffic:

* Sampling and port mirroring (Option D) are the correct supported methods for capturing or exporting transit traffic. Sampling allows captured packets to be sent to a file or collector, while port mirroring sends a copy to a monitoring interface.

* Option A: Firewall filters on an egress interface cannot directly capture packets; they can only count, accept, discard, or sample. Sampling itself is separate.

* Option B: Loopback interface (lo0) is for control-plane traffic, not transit traffic.

* Option C: tcpdump is not supported on SRX as a tool for capturing transit packets; the operational command monitor traffic interface is used, but sampling/port mirroring is the recommended scalable approach.

Correct Method: Sampling and port mirroring

Reference: Juniper Networks - Traffic Monitoring and Troubleshooting, Junos OS Security Fundamentals.

NEW QUESTION # 46

Which two statements about management functional zones are correct? (Choose two.)

- **A. The management functional zone is used to control the management-related traffic that is allowed to access your device.**
- **B. The management functional zone is automatically created on the SRX Series Firewalls.**
- C. The management functional zone contains all available revenue ports until they are assigned to a user-defined security zone.
- D. The management functional zone cannot be referenced in any security policies.

Answer: A,B

Explanation:

The management functional zone on SRX devices is a special predefined zone with unique characteristics:

* It is automatically created (Option C) and cannot be deleted.

* It is used specifically for management-related traffic (Option A), such as SSH, Telnet, web management (J-Web), SNMP, and other control-plane services.

* It does not contain revenue (data) interfaces (Option B is incorrect). Interfaces must be explicitly configured into user-defined zones.

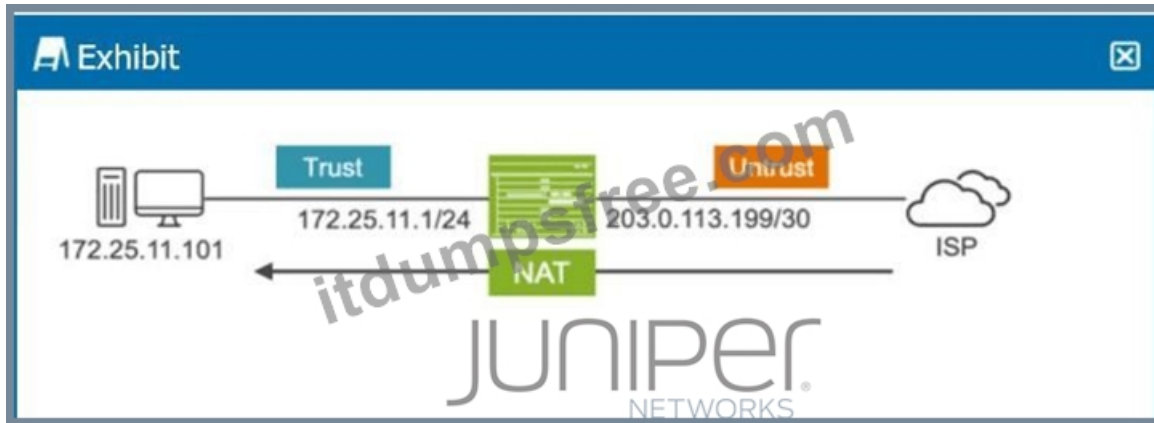

* The management zone can be referenced in policies if inter-zone communication involving management traffic is needed (Option D is incorrect).

Correct Statements: A and C

Reference: Juniper Networks - Security Zones and Management Functional Zone, Junos OS Security Fundamentals.

NEW QUESTION # 47

Click the Exhibit button.

You must ensure that sessions can only be established from the external device.
Referring to the exhibit, which type of NAT is being performed?

- A. static NAT and source NAT
- B. source NAT only
- C. static PAT only
- **D. destination NAT only**

Answer: D

Explanation:

From the exhibit:

* The internal host (172.25.11.101) is located in the Trust zone.

* The external address (203.0.113.199/30) is used for communication with the ISP.

* The requirement is that sessions can only be initiated from the external device (the ISP or untrust side) toward the internal host.

This requirement matches the behavior of Destination NAT:

* Destination NAT only (Option A): Maps the external/public IP (203.0.113.199) to the internal/private IP (172.25.11.101). This allows inbound connections to be translated and sent to the internal host. The internal host cannot initiate outbound sessions, since the translation only applies to inbound traffic.

* Source NAT only (Option B): Used for outbound sessions from internal private IPs to the Internet.

This does not meet the requirement.

* Static PAT (Option C): Maps a single port of a public IP to a private IP/port. The exhibit does not indicate a port-based translation.

* Static NAT and source NAT (Option D): Would provide bidirectional communication, allowing sessions to be initiated in both directions. This contradicts the requirement.

Correct NAT Type: Destination NAT only

Reference: Juniper Networks - NAT Types (Source NAT, Destination NAT, Static NAT), Junos OS Security Fundamentals.

NEW QUESTION # 48

.....

If you want to make your IT dream come true, you just need to choose the professional training materials. ITdumpsfree is a professional website to provide IT certification training materials. Our JN0-232 exam training materials is the result of ITdumpsfree's experienced IT experts with constant exploration, practice and research for many years. After you purchase our JN0-232 Dumps PDF training materials, we will provide one year free renewal service.
