Salesforce Data-Architect Reliable Exam Sample - Data-Architect Valid Real Exam

Once downloaded from the website, you can easily study from the Salesforce Certified Data Architect exam questions compiled by our highly experienced professionals as directed by the Salesforce Data-Architect exam syllabus. The Salesforce Data-Architect Dumps are given regular update checks in case of any update. We make sure that candidates are not preparing for the Salesforce Certified Data Architect exam from outdated and unreliable Data-Architect study material.

Salesforce Data-Architect certification exam is ideal for professionals who work with data architecture and management within the Salesforce ecosystem. This includes data architects, data analysts, data engineers, and data scientists. Data-Architect exam is also suitable for individuals who have experience working with Salesforce data and want to take their skills to the next level.

Salesforce Data-Architect (Salesforce Certified Data Architect) Certification Exam is one of the most sought-after certifications in the Salesforce ecosystem. It is designed to validate the knowledge and skills of professionals who work with Salesforce data architecture. Salesforce Certified Data Architect certification exam is intended for architects, developers, and administrators who are responsible for designing, building, and managing Salesforce data architecture solutions.

Salesforce Data-Architect Exam is perfect for those who want to establish their proficiency in data modeling, data integration, and data management as it relates to Salesforce. Achieving this certification demonstrates that you possess expertise in platform functionality, data modeling, data management, data integration, and understanding the importance of metrics and data analytics.

Salesforce Certified Data Architect Sample Questions (Q151-Q156):

NEW QUESTION # 151

Universal Containers (UC) has multi-level account hierarchies that represent departments within their major Accounts. Users are creating duplicate Contacts across multiple departments. UC wants to clean the data so as to have a single Contact across departments. What two solutions should UC implement to cleanse their data? Choose 2 answers

- A. Make use of a third-party tool to help merge duplicate Contacts across Accounts.
- B. Make use of the Merge Contacts feature of Salesforce to merge duplicates for an Account.
- C. Use Workflow rules to standardize Contact information to identify and prevent duplicates.
- D. Use Data.com to standardize Contact address information to help identify duplicates.

Answer: A,D

NEW QUESTION # 152

What 2 data management policies does the data classification feature allow customers to classify in salesforce? Choose 2 answers:

- A. Data sensitivity policy.
- B. Reference data policy.
- C. Data governance policy.
- D. Compliance categorization policy.

Answer: A,D

NEW QUESTION # 153

Universal Containers (UC) has three systems: Salesforce, a cloud-based ERP system, and an on-premise Order Management System (OMS). An architect has been tasked with creating a solution that uses Salesforce as the system of record for Leads and the OMS as the system of record for Account and Contacts. UC wants Accounts and Contacts to be able to maintain their names in each system (i.e., "John Doe" in the OMS and "Johnny Doe" in Salesforce), but wants to have a consolidated data store which links referenced records across the systems. What approach should an architect suggest so the requirements are met?

- A. Have Salesforce poll the OMS nightly and bring in the desired Accounts and Contacts.
- B. Use the Streaming API to send Account and Contact data from Salesforce to the OMS.
- C. Implement an integration tool to send OMS Accounts and Contacts to Salesforce.
- D. Implement a Master Data Management strategy to reconcile Leads, Accounts, and Contacts.

Answer: D

Explanation:

Implementing a Master Data Management strategy to reconcile Leads, Accounts, and Contacts is the approach that the architect should suggest so that the requirements are met for UC. A Master Data Management strategy can provide a consistent and unified view of data across multiple systems, by defining and enforcing rules for data quality, governance, and integration. A Master Data Management strategy can also handle complex scenarios where different systems have different systems of record for different entities or fields, and where data can be modified in different systems with different values. A Master Data Management strategy can also provide a consolidated data store that links referenced records across systems and enables cross-system reporting and analysis. The other options are not suitable or sufficient for meeting the requirements, as they would either not provide a consolidated data

store, not handle different systems of record, or not allow data modification in different system

NEW QUESTION # 154

Which two statements are accurate with respect to performance testing a Force.com application?

- A. A performance test plan must be created and submitted to Salesforce customer support.
- B. All Force.com applications must be performance tested in a sandbox as well as production.
- C. Applications with highly customized code or large volumes should be performance tested.
- D. Application performance benchmarked in a sandbox can also be expected in production.

Answer: A,C

Explanation:

A performance test plan is required for any Force.com application that has highly customized code or large volumes of data. You need to create and submit a performance test plan to Salesforce customer support before conducting any performance testing in your sandbox or production org2. Applications with highly customized code or large volumes of data should be performance tested to ensure they meet the expected response time and throughput

NEW QUESTION # 155

Universal Containers (UC) is implementing Salesforce and will be using Salesforce to track customer complaints, provide white papers on products, and provide subscription based support.

Which license type will UC users need to fulfill UC's requirements?

- A. Service Cloud License
- B. Lightning Platform Starter License
- C. Salesforce License
- D. Sales Cloud License

Answer: A

NEW QUESTION # 156

.....
