Reliable FCP_FAZ_AN-7.4 Exam Preparation - Valid FCP_FAZ_AN-7.4 Test Materials

Using SureTorrent you can pass the Fortinet FCP_FAZ_AN-7.4 exam easily. The first time you try to participate in Fortinet FCP_FAZ_AN-7.4 exam, selecting SureTorrent's Fortinet FCP_FAZ_AN-7.4 training tools and downloading Fortinet FCP_FAZ_AN-7.4 practice questions and answers will increase your confidence of passing the exam and will effectively help you pass the exam. Other online websites also provide training tools about Fortinet certification FCP_FAZ_AN-7.4 exam, but the quality of our products is very good. Our practice questions and answers have high accuracy. Our training materials have wide coverage of the content of the examination and constantly update and compile. SureTorrent can provide you with a very high accuracy of exam preparation. Selecting SureTorrent can save you a lot of time, so that you can get the Fortinet FCP_FAZ_AN-7.4 Certification earlier to allow you to become a Fortinet IT professionals.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q32-Q37):

NEW QUESTION # 32

What allows one task to use the output of a previous task as its input?

- A. Output variables
- B. Trigger variables
- C. Exported tasks
- D. Trigger variables

Answer: A

NEW QUESTION # 33

What is the purpose of a predefined template on the FortiAnalyzer?

- A. It can be edited and modified as required
- B. It contains predefined data to generate mock reports
- C. It specifies report settings which contains time period, device selection, and schedule
- D. It specifies the report layout which contains predefined texts, charts, and macros

Answer: D

NEW QUESTION # 34

What should you always do after erasing the FortiAnalyzer configuration on flash?

- A. Run the execute reboot command
- B. Perform a system backup
- C. Run the execute reset all-settings command
- D. Run the execute format disk command

Answer: D

NEW QUESTION # 35

Which two statements regarding FortiAnalyzer operating modes are true? (Choose two.)

- A. When running in collector mode, FortiAnalyzer can forward logs to a syslog server.
- B. You can create and edit reports when FortiAnalyzer is running in collector mode.
- C. A topology with FortiAnalyzer devices running in both modes can improve their performance.
- D. FortiAnalyzer runs in collector mode by default unless it is configured for HA.

Answer: C,D

Explanation:

FortiAnalyzer has two primary operating modes: Analyzer mode and Collector mode. Each mode serves specific purposes and has distinct capabilities.

* Option A - Forwarding Logs to a Syslog Server in Collector Mode:

* In Collector mode, FortiAnalyzer collects logs from Fortinet devices but does not process or analyze them. Instead, it forwards the logs to other FortiAnalyzer units in Analyzer mode or to specific storage locations. However, forwarding logs to a syslog server

is not a function of Collector mode. Logs are generally stored or sent to other FortiAnalyzer devices.

* Conclusion: Incorrect.

* Option B - Default Mode is Collector Mode Unless Configured for HA:

* When a FortiAnalyzer is initially set up, it runs in Collector mode by default unless it is configured as part of a High Availability (HA) setup, which would set it to Analyzer mode.

Collector mode prioritizes log collection and storage rather than analysis, offloading analysis to other devices in the network.

* Conclusion: Correct.

* Option C - Report Creation and Editing in Collector Mode:

* In Collector mode, FortiAnalyzer does not have the capability to create or edit reports. This mode is focused solely on log collection and forwarding, with analysis and report generation left to FortiAnalyzer units operating in Analyzer mode.

* Conclusion: Incorrect.

* Option D - Performance Improvement with Both Modes in Topology:

* Deploying FortiAnalyzer devices in both Collector and Analyzer modes in a network topology can enhance performance.

Collector mode devices handle log collection, reducing the workload on Analyzer mode devices, which focus on log processing, analysis, and reporting. This separation of tasks can optimize resource usage and improve the overall efficiency of log management.

* Conclusion: Correct.

Conclusion:

* Correct Answer: B. FortiAnalyzer runs in collector mode by default unless it is configured for HA and D. A topology with FortiAnalyzer devices running in both modes can improve their performance.

* These answers correctly describe the functionality and default configuration of FortiAnalyzer operating modes, along with how a mixed-mode topology can enhance performance.

References:

* FortiAnalyzer 7.4.1 documentation on operating modes (Collector and Analyzer) and their respective capabilities.

NEW QUESTION # 36

Which statement about sending notifications with incident update is true?

- **A. You can send notifications to multiple external platforms.**
- B. Notifications can be sent only by email.
- C. If you use multiple fabric connectors, all connectors must have the same settings.
- D. Notifications can be sent only when an incident is updated or deleted.

Answer: A

Explanation:

In FortiOS and FortiAnalyzer, incident notifications can be sent to multiple external platforms, not limited to a single method such as email. Fortinet's security fabric and integration capabilities allow notifications to be sent through various fabric connectors and third-party integrations. This flexibility is designed to ensure that incident updates reach relevant personnel or systems using preferred communication channels, such as email, Syslog, SNMP, or integration with SIEM platforms.

Let's review each answer option for clarity:

* Option A: You can send notifications to multiple external platforms

* This is correct. Fortinet's notification system is capable of sending updates to multiple platforms, thanks to its support for fabric connectors and external integrations. This includes options such as email, Syslog, SNMP, and others based on configured connectors.

* Option B: Notifications can be sent only by email

* This is incorrect. Although email is a common method, FortiOS and FortiAnalyzer support multiple notification methods through various connectors, allowing notifications to be directed to different platforms as per the organization's setup.

* Option C: If you use multiple fabric connectors, all connectors must have the same settings

* This is incorrect. Each fabric connector can have its unique configuration, allowing different connectors to be tailored for specific notification and integration requirements.

* Option D: Notifications can be sent only when an incident is updated or deleted

* This is incorrect. Notifications can be sent upon the creation of incidents, as well as upon updates or deletion, depending on the configuration.

References: According to FortiOS and FortiAnalyzer 7.4.1 documentation, notifications for incidents can be configured across various platforms by using multiple connectors, and they are not limited to email alone.

This capability is part of the Fortinet Security Fabric, allowing for a broad range of integrations with external systems and platforms for effective incident response.

NEW QUESTION # 37

.....

Our FCP_FAZ_AN-7.4 guide tests can solve these problems perfectly, because our study materials only need little hours can be grasped. Once you use our FCP_FAZ_AN-7.4 latest dumps, you will save a lot of time. High effectiveness is our great advantage. After twenty to thirty hours' practice, you are ready to take the real FCP_FAZ_AN-7.4 Exam Torrent. The results will never let you down. You just need to wait for obtaining the certificate.
