What does the acronym "LEED" stand for? - ANSWER ✓ Leadership in Energy and Environmental Design

What organization determines the definition of potable water? - ANSWER ✓ The EPA

WE prerequisites focus on _____; WE credits focus on _____. - ANSWER ✓ WE prerequisites focus on "potable water efficiency"; WE credits focus on the use of "non-potable and alternative water sources".

What are the two options to comply with WEp Outdoor Water Use Reduction? - ANSWER ✓ 1. no irrigation
2. reduced irrigation

How long of an establishment period is allowed for WEp/c Outdoor Water Use Reduction, option 1 (no irrigation)? - ANSWER ✓ 2 years

What tool should be used to calculate the irrigation water use reduction compared to baseline, for WEp Outdoor Water Use Reduction? - ANSWER ✓ EPA's WaterSense Water Budget

For WEp Outdoor Water Use Reduction, irrigation must be reduced by ___% compared to baseline, in the peak watering month. - ANSWER ✓ 30

Professional LEED-AP-BD-C exam using Real4test free exam discussions. LEED AP Building Design + Construction (LEED AP BD+C) (LEED-AP-BD-C) exam discussions provide a supportive environment where you can discuss difficult concepts and ask questions of your peers. In a free exam discussions, you'll have the opportunity to learn from a certified LEED-AP-BD-C instructor who has extensive experience in LEED-AP-BD-C studies. The instructor can also provide you with tips and best practices for taking the exam.

It is quite clear that many people would like to fall back on the most authoritative company no matter when they have any question about preparing for LEED-AP-BD-C exam or met with any problem. I am proud to tell you that our company is definitely one of the most authoritative companies in the international market for LEED-AP-BD-C exam. What's more, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week, therefore, our company is really the best choice for you to buy the LEED-AP-BD-C Training Materials. You can just feel rest assured that our after sale service staffs are always here waiting for offering you our services. Please feel free to contact us. We stand ready to serve you!

2025 High Pass-Rate LEED-AP-BD-C: Pass LEED AP Building Design +

Construction (LEED AP BD+C) Guarantee

Generally speaking, a satisfactory LEED-AP-BD-C study material should include the following traits. High quality and accuracy rate with reliable services from beginning to end. As the most professional group to compile the content according to the newest information, our LEED-AP-BD-C Practice Questions contain them all, and in order to generate a concrete transaction between us we take pleasure in making you a detailed introduction of our LEED-AP-BD-C exam materials.

USGBC LEED AP Building Design + Construction (LEED AP BD+C) Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which strategy should be employed to improve daylighting when designing a new building?

- A. Increase the height of interior partitions
- B. Decrease the number of exterior light shelves
- C. Increase the number of skylights
- D. Increase the building depth

Answer: C

Explanation:

. Increase the number of skylights

Skylights are openings in the roof or ceiling that allow natural light to enter the building. They can improve daylighting by providing more uniform and diffuse illumination, reducing the need for artificial lighting, and enhancing the visual comfort and well-being of occupants. Skylights can also reduce cooling loads by minimizing solar heat gain through the roof. However, skylights must be designed carefully to avoid glare, overheating, and heat loss issues.

NEW QUESTION # 12

Which principal areas must the LEED AP focus on to attain the Integrative Process Credit, Integrative Process?

- A. Materials and resources
- B. Location and site selection
- C. Energy and water related systems
- D. Regional priority and innovation

Answer: C

Explanation:

The Integrative Process credit, Integrative Process, requires the project team to conduct a preliminary analysis of the energy and water related systems during the pre-design phase, and use the results to inform the design and construction of the project. The analysis must include at least two potential strategies for each of the following areas: site conditions, massing and orientation, basic envelope attributes, lighting levels, thermal comfort ranges, plug and process load needs, programmatic and operational parameters, outdoor water use, and indoor water use. The project team must also document how the analysis informed the owner's project requirements, basis of design, and design documents.

Integrative Process Worksheet2

NEW QUESTION # 13

A project team member has prepared a map and accompanying table as documentation for the Location and Transportation Credit, Surrounding Density and Diverse Uses. Option 2. Diverse Uses. The map includes the location of each diverse use. the location of the project and the main entrance of the building. The table includes the distance to each use. the name of each use and the category of each use The team lead reviews the documentation and notes an important missing item. Which of the following is the most important item to add to the documentation?

- A. The location of parking lots near each use

- B. A calculation of the expected number of project occupants who will visit each use
- C. A description of each use
- **D. Walking routes from the project to each use**

Answer: D

Explanation:

According to the LEED v4: Building Design + Construction Guide¹, Option 2 of the Surrounding Density and Diverse Uses credit requires the project to be within walking distance of at least 10 diverse uses. The guide also states that "walking distance is defined as the distance that a pedestrian must travel between origins and destinations without obstruction, in a safe and comfortable environment on a continuous network of sidewalks, all weather-surface footpaths, crosswalks, or equivalent pedestrian facilities."

Therefore, the documentation must include walking routes from the project to each use to demonstrate that the distance requirement is met. References:

NEW QUESTION # 14

When preparing the Sustainable Sites Prerequisite, Construction Activity Pollution Prevention, the Construction General Permit must contain which of the following?

- **A. Installation plan for perimeter control**
- B. Minimum standards for equipment exhaust
- C. Waste Management Plan
- D. Building orientation on the site

Answer: A

Explanation:

The Construction General Permit (CGP) for the Sustainable Sites Prerequisite, Construction Activity Pollution Prevention, must contain an installation plan for perimeter control. This is part of the Erosion and Sedimentation Control (ESC) Plan, which is designed to prevent loss of soil during construction by stormwater runoff and/or wind erosion, prevent sedimentation of storm sewer or receiving streams, and prevent polluting the air with dust and particulate matter¹.

NEW QUESTION # 15

In the Indoor Environmental Quality Credit, Low-Emitting Materials, what types of products need to be evaluated for both Volatile Organic Compound (VOC) content of the material and VOC emissions of the material?

- A. Wet applied products
- B. Flooring
- **C. Furniture**
- D. Composite wood

Answer: C

Explanation:

Furniture is the only type of product that needs to be evaluated for both VOC content and VOC emissions in the LEED BD+C Low-Emitting Materials credit. Flooring, composite wood, and wet applied products only need to meet the VOC content requirements, while other types of products, such as ceilings, walls, thermal and acoustic insulation, and exterior applied products, only need to meet the VOC emissions requirements¹.
