PL-500 Microsoft Power Automate RPA Developer Associate Exam Prep

2025 Latest Fast2test PL-500 PDF Dumps and PL-500 Exam Engine Free Share: https://drive.google.com/open?id=1-dNsH1I5_6TN3dAd44MnmPprR1P6z26A

The certificate is of significance in our daily life. At present we will provide all candidates who want to pass the PL-500 exam with three different versions for your choice. APP version of our PL-500 exam questions can work in an offline state. If you use the quiz prep, you can use our latest PL-500 exam torrent in anywhere and anytime. How can you have the chance to enjoy the study with our PL-500 Practice Guide in an offline state? You just need to download the version that can work in an offline state, and the first time you need to use the version of our PL-500 quiz torrent online.

Microsoft PL-500 exam is designed to help individuals who want to develop their skills in the field of robotic process automation (RPA). PL-500 exam is specifically tailored to those who want to learn how to automate repetitive tasks, streamline workflows, and enhance business processes using Microsoft Power Automate. The PL-500 exam is also ideal for people who want to learn how to develop custom connectors, create custom workflows, and integrate Power Automate with other Microsoft services.

Microsoft PL-500 Certification Exam is a rigorous exam that requires a deep understanding of the Power Automate platform and its various capabilities. Individuals who are interested in taking PL-500 exam should have a strong background in programming and should be familiar with the Microsoft Power Platform.

Microsoft PL-500 torrent - Pass4sure PL-500 exam - PL-500 torrent files

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take PL-500 tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, may also not make the right choice. A good choice can make one work twice the result with half the effort, and our PL-500 study materials will be your right choice. Since inception, our company has been working on the preparation of PL-500 learning guide, and now has successfully helped tens of thousands of candidates around the world to pass the exam. As a member of the group who are about to take the PL-500 exam, are you worried about the difficulties in preparing for the exam? Maybe this problem can be solved today, if you are willing to spend a few minutes to try our PL-500 actual exam.

Microsoft Power Automate RPA Developer Sample Questions (Q30-Q35):

NEW QUESTION # 30

You need to address the issue with the capacity planning flow. What should you do?

- A. Create a machine group and add machines to the group to handle requests.
- **B. Create a gateway cluster.**
- C. Increase the CPU and memory of the machine on which the gateway is hosted.
- D. Configure the system to send alerts when the gateway fails.

Answer: B

Explanation:

According to the scenario, the capacity planning flow fails when the gateway is offline. To avoid this issue, you can create a gateway cluster that consists of two or more gateways that share the same configuration and data sources. This way, if one gateway is offline, another gateway in the cluster can handle the requests and ensure high availability for your flow.

NEW QUESTION # 31

You create the following flow:

The screenshot shows a Microsoft Power Automate flow configuration. The first step is 'Initialize variable' with the following properties:

- Name: success
- Type: Boolean
- Value: false

The second step is 'Do until' with the following properties:

- Condition: {success} is equal to true
- Count: 3
- Timeout: PT15M

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Questions	Response
What does the value 3 in the Count property represent?	☐ The do until action will retry up to three times if there are any failures. ☐ The do until actions must succeed three times before moving on to the next action.
What does the value PT15M in the Timeout property represent?	☐ The do until must run for a minimum of 15 minutes. ☐ The flow cannot exceed 15 minutes of total run time. ☐ The do until will time out when it reaches 15 minutes.

Answer:

Explanation:

Answer Area	Response
Questions	
What does the value 3 in the Count property represent?	The do until action will retry up to three times if there are any failures. The do until actions must succeed three times before moving on to the next action.
What does the value PT15M in the Timeout property represent?	The do until must run for a minimum of 15 minutes. The flow cannot exceed 15 minutes of total run time. The do until will time out when it reaches 15 minutes.

NEW QUESTION # 32

Case Study 2: City Power and Light

Background

City Power and Light is one of the biggest energy companies in North America. They extract, produce and transport oil. The company has more than 50 offices and 100 oil extraction facilities throughout the United States, Canada, and Mexico. They use railways, trucks, and pipelines to move oil and gas from their facilities.

The company provides the following services:

- Produce oil from oil sands safely, responsibly, and reliably.
- Refine crude oil into high-quality products.
- Develop and manage wind power facilities.
- Transport oil to different countries/regions.

City Power and Light uses various Microsoft software products to manage its daily activities and run its machine-critical applications.

Requirements

ManagePipelineMaintenanceTasks

A user named Admin1 creates a cloud flow named ManagePipelineMaintenanceTasks. Admin1 applies a data loss prevention (DLP) policy to the flow. Admin1 shares the flow with a user named PipelineManager1 as co-owner. You must determine the actions that PipelineManager1 can perform.

You create a cloud flow that uses a desktop flow. The desktop flow connects to third-party services to fetch information. You must not permit the desktop flow to run for more than 20 minutes.

You must configure sharing for MaintenanceScheduler to meet the following requirements:

- User1 must be able to work with you to modify the desktop flow.
- User2 must be able to access and review the run history for the flow.
- You must grant User3 permissions to run but not modify the desktop flow.

ERPDataOperations flow

City Power and Light uses an enterprise resource planning (ERP) system. The ERP system does not have an API.

Each day the company receives an email that contains an attachment. The attachment lists orders from the company's rail transportation partners. You must create an automation solution that reads the contents of the email and writes records to the ERP system. The solution must pass credential from a cloud flow to a desktop flow.

RailStatusUpdater

City Power and Light actively monitors all products in transit. You must create a flow named RailStatusUpdater that manages communications with railways that transport the company's products. RailStatusUpdater includes five desktop flow actions.

You must run the desktop flows in attended mode during testing. You must run the desktop flows in unattended mode after you deploy the solution. You must minimize administrative efforts.

Packaging

You must package the automations in a solution. All required components must be included in the solution.

Issues

ProductionMonitor flow

You create a cloud flow named ProductionMonitor which uses the Manually trigger a flow trigger.

You plan to trigger ProductionMonitor from a cloud flow named ProdManager.

You add a Run a Child flow action in ProdManager to trigger ProductionMonitor. When you attempt to save ProdManager the following error message displays:

Request to XRM API failed with error: 'Message:Flow client error returned with status code "Bad request" and details ("error": {"code":"ChildFlowUnsupportedForInvokerConnections", "message":

The workflow with id 8d3bcde7-7e98-eb11-b1ac-000d3a32d53f", named FlowA cannot be used as a child workflow because child workflows only support embedded connections. "}} "Code"

0x80060467 InnerError.'

CapacityPlanning flow

Developers within the company use cloud flows to access data from an on-premises capacity planning system.

You observe significant increases to the volume of traffic that the on-premises data gateway processes each day. You must minimize gateway failures.

DataCollector flow

You have a desktop flow that interacts with a web form. The flow must write data to several fields on the form.

You are testing the flow. The flow fails when attempting to write data to any field on the web form.

RailStatusUpdater flow

The RailStatusUpdater flow occasionally fails due to machine connection errors. You can usually get the desktop flow to complete by resubmitting the cloud flow run. You must automate the retry process to ensure that you do not need to manually resubmit the cloud flow when machine connection errors occur.

Question

You need to resolve the issue reported with the RailStatusUpdater flow.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a duplicate action for the desktop flow to run after the first desktop flow.
- **B. Create a duplicate action for the desktop flow and configure the duplicate action to run if the first desktop flow action fails.**
- C. Call a separate child cloud flow to perform the desktop flow a second time.
- **D. Put the desktop flow action into a Do until loop. Run until the desktop flow is successful.**

Answer: B,D

NEW QUESTION # 33

You need to design automation solutions for a company.

What should you implement? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Scenario	Technology
Sign into a web application that does not have an API and download a CSV file.	Cloud flow Desktop flow File system connector Outlook connector
Access a CSV file from a local drive.	SharePoint connector OneDrive connector File system connector Outlook connector
Send an email that includes a CSV file attachment.	SharePoint connector OneDrive connector File system connector Outlook connector

Answer:

Explanation:

Scenario	Technology
Sign into a web application that does not have an API and download a CSV file.	Cloud flow Desktop flow File system connector Outlook connector
Access a CSV file from a local drive.	SharePoint connector OneDrive connector File system connector Outlook connector
Send an email that includes a CSV file attachment.	SharePoint connector OneDrive connector File system connector Outlook connector

NEW QUESTION # 34

You are developing automation solutions for a company.
You need to use an environment variable in a cloud flow.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Text Description automatically generated with medium confidence

NEW QUESTION # 35

.....

Have you been many years at your position but haven't got a promotion? Or are you a new comer in your company and eager to make yourself outstanding? Our PL-500 exam materials can help you. With our PL-500 exam questions, you can study the most latest and specialized knowledge to deal with the problems in you daily job as well as get the desired PL-500 Certification. You can lead a totally different and more successfully life latter on.
