### NEW QUESTION # 87

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a file policy in Microsoft Cloud App Security.

You need to configure the policy to apply to all files. Alerts must be sent to every file owner who is affected by the policy. The policy must scan for credit card numbers, and alerts must be sent to the Microsoft Teams site of the affected department.

Solution: You use the Data Classification service inspection method and send alerts to Microsoft Power Automate.

Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

Explanation:

The only option is to send an e-mail or send the alert to PowerAutomate. If using PowerAutomate you can then create a custom alert automation to notify users via Teams.
