Use free NCA-6.10 certification questions to gain a good test result.

Nutanix Certified Associate v6.10 Sample Questions (Q72-Q77):

NEW QUESTION # 72

On a newly-deployed AHV cluster, what is the default virtual switch (vs0) uplink bond type?

- A. No Uplink Bond
- B. Balance-TCP
- C. Balance-SLB
- D. Active-Backup

Answer: D

Explanation:

On a newly deployed AHV cluster, the default uplink bond type for the virtual switch (vs0) is Balance-SLB (Source Load Balancing). This configuration balances traffic across the uplink interfaces based on the source of the traffic, ensuring optimal usage of available network bandwidth without requiring LACP configuration on the physical switches.

:

Nutanix AHV Networking Guide - Default Uplink Bond Types.

NEW QUESTION # 73

An administrator needs to remove several old VM snapshots.

From which Prism Element dashboard should the administrator complete this task?

- A. Tasks
- B. Settings
- **C. VM**
- D. Storage

Answer: C

NEW QUESTION # 74

What priority case can be opened to guarantee a 8-hour response for a customer with Production Support?

- A. P4
- **B. P1**
- C. P2
- D. P3

Answer: B

NEW QUESTION # 75

What priority case can be opened to guarantee a 8-hour response for a customer with Production Support?

- A. P4
- **B. P1**
- C. P2
- D. P3

Answer: B

Explanation:

A Priority 1 (P1) case guarantees an 8-hour response time for customers with Production Support. P1 cases are designated for critical issues that severely impact business operations or cause a complete system outage, requiring immediate attention from Nutanix Support.

Other priorities:

* P2: High-impact issues but not critical, response time varies.

* P3: Medium impact, typically non-urgent issues.

* P4: Low priority, general inquiries or minor issues.

NEW QUESTION # 76

An administrator needs to implement a disaster recovery plan. The company has two sites, each with its own Nutanix AHV cluster. Latency between the sites is 30ms.

Which built-in functionality in Prism Element could the administrator use to enable disaster recovery between the two clusters?

- A. Data Protection
- **B. Metro Cluster**
- C. Protection Policies
- D. Recovery Plan

Answer: B

Explanation:

The Data Protection feature in Prism Element provides built-in disaster recovery capabilities by enabling asynchronous replication between Nutanix clusters. With a latency of 30ms between the two sites, asynchronous replication can ensure that data is replicated efficiently while adhering to recovery point objectives (RPO). The administrator can configure Protection Domains and Replication Targets to set up DR between the clusters.

* A. Recovery Plan: Incorrect, as Recovery Plans are part of Prism Central for orchestrated failover, not Prism Element.

* B. Protection Policies: Incorrect, as these are defined under Prism Central.

* C. Data Protection: Correct, as it enables disaster recovery via replication configurations in Prism Element.

* D. Metro Cluster: Incorrect, as Metro Cluster requires low latency (<5ms) and is not suitable for a 30ms latency scenario.
