According to SAP documentation, "The Routing rules for Cases are maintained in SAP Service Cloud Version 2 by administrators in the following path: Settings → Cases → Case Routing to Team → Case Routing to Employees," and Case Type is a key attribute used to determine routing conditions. Party Role (A) is optional and used for specific scenarios. Employee (B) is the target of routing, not a mandatory object for configuration. Case Designer Step Assignment (C) is part of the case designer but not required for team routing rules.
