Pdf Symantec 250-587 Exam Dump, 250-587 Brindumps Downloads

It never needs an internet connection. Symantec Symantec Data Loss Prevention 16.x Administration Technical Specialist practice exam software has several mock exams, designed just like the real exam. Symantec 250-587 Practice Exam software contains all the important questions which have a greater chance of appearing in the final exam. VCETorrent always tries to ensure that you are provided with the most updated Symantec Data Loss Prevention 16.x Administration Technical Specialist Exam Questions to pass the exam on the first attempt.

Symantec Data Loss Prevention 16.x Administration Technical Specialist Sample Questions (Q143-Q148):

NEW QUESTION # 143

How should an administrator export all policies from a test environment to a production environment?

- A. locate the 'policy' folder under 'SymantecDLP' and copy all of the .XML files
- B. navigate to System > Settings > Export and select 'All'
- **C. export one policy template at a time**
- D. choose the option to 'export all' on the Manage > Policies > Policies List page

Answer: C

NEW QUESTION # 144

You have a customer who has set up a 5 GB full-size instant snapshot volume on one of his file servers. The data replicated into the snapshot is a combination of code and content elements, which serves as a rapid recovery mechanism in case of a corruption in a

new build installed on the server. The customer tells you that the snapshot is working correctly, but that the time it takes to refresh the snapshot is unusually longer than expected. The customer is expecting you to resolve this problem. How should you resolve this problem?

- A. Use vxassist addlog logtype=dc0 to enable FastResync on the volume
- **B. Use "vxsnap prepare" on the source volume, then remove and recreate the snapshot**
- C. Recreate the snapshot as a traditional third-mirror break-off snapshot
- D. Recreate the snapshot as a space-optimized instant snapshot

Answer: B

NEW QUESTION # 145

You need to create a new volume. The new volume will only use disks on controller 1. You want to execute the vxassist command with the ctrl:c1 storage attribute. You want to ensure that the command provides desired output. What should you ensure to meet the required goal?

- A. Ensure that storage attribute is a part of the disk.
- B. Ensure that storage attribute is a part of the plex.
- C. Ensure that storage attribute is a part of the volume.
- **D. Ensure that storage attribute is a part of the disk group.**

Answer: D

NEW QUESTION # 146

You administer storage for an application "myapp" on server QA1, with a file system dedicated to code and configuration data for that myapp. Part of the testing discipline is to return myapp's file system to a known initial state prior to each test activity, and to run a series of tests beginning with the same initial state. The traditional approach to preparing for each test involves restoring the file system from a backup image prior to each test, which imposes an hour's delay between the end of one test run and the beginning of the next. A typical testing session lasts only two to three hours, the hour of restore delay between tests reduces the availability of the server for testing by about 30%. What kind of Storage Foundation mechanism would work best to reduce the delay required between tests?

- **A. Storage checkpoints are the best fit.**
- B. Third-mirror breakoff snapshots are the best fit.
- C. Space-optimized instant snapshots are the best fit.
- D. File system snapshots are the best fit.

Answer: A

NEW QUESTION # 147

You have just performed maintenance operation on a system where VxVM is installed. When you start the system you realize that some disks have entered the FAILED state. After the inspection of the system, you discover that a cable is unplugged. You reconnect the cable. However, after reconnecting the cable, you need to move these disks out of the FAILED state. How should you resolve this error?

- A. Use the /usr/sbin/vxdctl enable command
- **B. Use the /etc/vx/bin/vxreattach command**
- C. Use the vxmend -g <diskgroup> command with the fix clean plex option
- D. Use the vxvol -g <diskgroup> command with the start volume option

Answer: B

NEW QUESTION # 148

.....

This way you will get familiar with Symantec Data Loss Prevention 16.x Administration Technical Specialist exam pattern and

objectives. No additional plugins and software installation are indispensable to access this 250-587 Practice Test. Furthermore, all browsers and operating systems support this version of the Symantec 250-587 practice exam.
