2025 Latest ExamDiscuss C-BW4H-2404 PDF Dumps and C-BW4H-2404 Exam Engine Free Share:  
<https://drive.google.com/open?id=1U9eOdkdbrFoaoGcqZtmzGXALyhlOA2h>

If you face any hitch while using the SAP C-BW4H-2404 practice exam software of ExamDiscuss, contact our customer support. Our team is available for the assistance of SAP C-BW4H-2404 updated exam dumps users. Many candidates of the C-BW4H-2404 examination pay extra money because SAP weaks the content of the test.

If you want to get the C-BW4H-2404 certification to improve your life, we can tell you there is no better alternative than our C-BW4H-2404 exam questions. The C-BW4H-2404 test torrent also offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. Our product is affordable and good, if you choose our products, we can promise that our C-BW4H-2404 Exam Torrent will not let you down.

## C-BW4H-2404 Intereactive Testing Engine & C-BW4H-2404 Latest Exam Tips

You can get prepared with our SAP C-BW4H-2404 exam materials only for 20 to 30 hours before you go to attend your exam we can claim that you will achieve guaranteed success with our C-BW4H-2404 study guide for that our high pass rate is unmarched 98% to 100%. And all the warm feedback from our clients proved our strength, you can totally relay on us with our SAP C-

BW4H-2404 practice quiz!

## SAP Certified Associate - Data Engineer - Data Fabric Sample Questions (Q46-Q51):

### NEW QUESTION # 46

You create a generic DataSource in SAP ERP. "How can you enable your generic DataSource to be used as an ODP\_SAP DataSource in SAP BW/4HANA in case it is not available by default?"

- A. Generate the PSA table of the DataSource in SAP BW/4HANA
- B. **Run the program RODPS\_OS\_EXPOSE in SAP ERP for the DataSource**
- C. Add a subscription in SAP ERP using the program RODPS\_REPL\_TEST.
- D. Release the DataSource in SAP BW/4HANA for ODP

**Answer: B**

Explanation:

\* Run the program RODPS\_OS\_EXPOSE in SAP ERP for the Data-Source: This program can enable a generic DataSource in SAP ERP to be used as an ODP\_SAP DataSource in SAP BW/4HANA by exposing it to the ODP framework. This allows the data to be transferred via RFC or HTTP calls without using a PSA layer12.

Reference:

\* 1 <https://blogs.sap.com/2020/12/25/operational-data-provisioning-simplified/>

\* 2 [https://help.sap.com/docs/SAP\\_BW4HANA/107a6e8a38b74ede94c833ca3b7b6f51/c6afacb707764885a6fb62f511c24f34.html](https://help.sap.com/docs/SAP_BW4HANA/107a6e8a38b74ede94c833ca3b7b6f51/c6afacb707764885a6fb62f511c24f34.html)

### NEW QUESTION # 47

Which tasks are part of the Business Blueprint phase in an SAP BW/4HANA project? Note: There are 2 correct answers to this question.

- A. Associate an InfoObject to a field in an Open ODS view
- B. **Analyze key performance indicators of the business processes**
- C. **Collect central individual information requirements**
- D. Activate SAP business content objects that comply with the layered scalable architecture (LSA++) architecture

**Answer: B,C**

### NEW QUESTION # 48

Which join types can you use in a Composite Provider? Note: There are 3 correct answers to this question.

- A. Text join
- B. **Referential join**
- C. Inner join
- D. **Full Outer join**
- E. Temporal hierarchy join

**Answer: B,C,D**

Explanation:

C. Full Outer Join:

\* Combines data from both sources, including unmatched rows from either side.

D. Referential Join:

\* Optimized join that assumes data consistency between the sources for faster query performance.

E. Inner Join:

\* Only combines rows with matching keys in both sources, commonly used for exact matches.

References:SAP BW/4HANA Composite Provider documentation (SAP Help Portal).

### NEW QUESTION # 49

Which recommendations should you follow to optimize BW query performance? Note: There are 3 correct answers to this question.

- A. Include fewer drill-down characteristics in the initial view.
- B. Create linked components.
- C. Use the dereference option for reusable filters.
- D. Use the include mode within filter restrictions.
- E. Use mandatory characteristic value variables.

**Answer: A,D,E**

Explanation:

B. Fewer drill-down characteristics in the initial view:

\* Minimizing drill-down characteristics reduces the volume of data retrieved during query execution, improving performance.

C. Mandatory characteristic value variables:

\* Restricting queries to smaller data subsets by requiring users to input characteristic values enhances query speed.

D. Include mode within filter restrictions:

\* The include mode narrows the dataset scope, improving query performance by reducing unnecessary data retrieval.

References:SAP BW/4HANA Query Optimization Best Practices (SAP Help Portal).

## NEW QUESTION # 50

Which join types can you use in a Composite Provider? Note: There are 3 correct answers to this question.

- A. Full Outer join
- B. Referential join
- C. Inner join
- D. Temporal hierarchy join
- E. Text join

**Answer: B,C,E**

Explanation:

In SAP Data Engineer - Data Fabric, specifically within the context of Composite Providers in SAP BW

/4HANA, there are specific types of joins that can be utilized to combine data from different sources effectively. Let's break down each join type mentioned in the question:

\* Text Join (A):A text join is used when you need to include descriptive texts (like descriptions for codes) in your query results. This join type connects a primary table with a text table based on language- specific attributes. It ensures that textual information is appropriately linked and displayed alongside the main data. This is particularly useful in scenarios where reports or queries require human-readable descriptions.

\* Temporal Hierarchy Join (B):Temporal hierarchy joins are not supported in Composite Providers.

These types of joins are typically used in other contexts within SAP systems, such as when dealing with time-dependent hierarchies in Advanced DataStore Objects (ADSOs) or other temporal data models.

However, they do not apply to Composite Providers.

\* Full Outer Join (C):Full outer joins are not available in Composite Providers. Composite Providers primarily support inner joins, referential joins, and text joins. The full outer join, which includes all records when there is a match in either left or right table, is not part of the join options within this specific context.

\* Referential Join (D):Referential joins are optimized joins that assume referential integrity between the tables involved. This means that the system expects all relevant entries in one table to have corresponding entries in the other. If this condition is met, referential joins can significantly improve query performance by reducing the amount of data processed. They are commonly used in Composite Providers to efficiently combine data while maintaining performance.

\* Inner Join (E):Inner joins are fundamental join types used in Composite Providers. They return only the records that have matching values in both tables being joined. This is one of the most frequently used join types due to its straightforward nature and effectiveness in combining related datasets.

\* SAP BW/4HANA Documentation: The official documentation outlines the capabilities and limitations of Composite Providers, including the types of joins supported.

\* SAP Help Portal: Provides detailed explanations and examples of how different join types function within SAP BW/4HANA environments.

\* SAP Community Blogs & Forums: Discussions and expert insights often highlight practical use cases and best practices for implementing various join types in Composite Providers.

References:By understanding these join types and their applications, data engineers can design efficient and effective data models within the SAP Data Engineer - Data Fabric framework, ensuring optimal performance and accurate data representation.

## NEW QUESTION # 51

.....

if you choose to use the software version of our C-BW4H-2404 study guide, you will find that you can download our C-BW4H-2404 exam prep on more than one computer and you can practice our C-BW4H-2404 exam questions offline as well. We strongly believe that the software version of our C-BW4H-2404 Study Materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success!

**C-BW4H-2404 Interactive Testing Engine:** <https://www.examdiscuss.com/SAP/exam/C-BW4H-2404/>

The second one is the web-based SAP C-BW4H-2404 practice exam which can be accessed through the browsers like Firefox, Safari, and SAP Chrome, SAP C-BW4H-2404 pdf dumps format contains actual C-BW4H-2404 exam questions, It is all due to the top features of SAP Certified Associate - Data Engineer - Data Fabric C-BW4H-2404 exam dumps, Free demos and up to 1 year of free updates of our Sitecore Exams are also available at ExamDiscuss C-BW4H-2404 Interactive Testing Engine.

Guessing Results Guided by Data, You'll learn how to verify C-BW4H-2404 when attack attempts and system failures occur, and how to configure firewalls to guard against them.
