## 2025 Pass4sure 1Z0-083 Exam Prep | Trustable 100% Free Practice 1Z0-083 Engine

This version of the practice exam is suitable for individuals who are comfortable in practicing for the exam online. This software contains all the features we have discussed above in the paragraph of the desktop version. Pass4SureQuiz online practice test frees you from hassles of installing software and plugins. You can use this format of the Oracle 1Z0-083 Mock Exam on any operating system, and it is accessible via these browsers: Opera, Safari, Chrome, Firefox, MS Edge, and Internet Explorer.

### Oracle 1Z0-083 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>• Understanding and Using The Performance Tuning Methodology</li><li>• Explain the purpose of application root and application seed</li></ul>                                    |
| Topic 2 | <ul style="list-style-type: none"><li>• Create multi-section backups of very large files</li><li>• Create and administer Application PDBS</li><li>• Detect and repair database and database block corruption</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>• Compress and Encrypt RMAN Backups</li><li>• Explore the structure of PDBs</li><li>• Backup non database files</li></ul>                                                        |

- Employ the best Oracle Database recovery technology for your failure situation
- Install, upgrade and Patch applications

## Oracle Database Administration II Sample Questions (Q250-Q255):

### NEW QUESTION # 250

You issued this command:

```
RMAN> BACKUP RECOVERY FILES;
```

Which two are true? (Choose two.)

- A. All non-Oracle files in the current FRA that have not been backed up already, are backed up.
- B. All Oracle recovery files in the current fast recovery area (FRA) are backed up.
- C. All Oracle recovery files in the current FRA that have not been backed up already, are backed up.
- D. These backups can be written to disk or SBT.
- E. All Oracle recovery files not in the current FRA that have not been backed up already, are backed up.

**Answer: C,E**

Explanation:

The Backup recovery files command backs up all recovery files even if they are not in the FRA, Which would back up for example any copies of control files or data files that are not in the FRA. by default backup optimization is in effect for backup recovery area and backup recovery files i.e the only recovery files that this command backs up are those that are not already backed up.

### NEW QUESTION # 251

Choose three. Which three are true about Oracle pluggable databases (PDBs)?

- A. An unplugged PDB can be plugged into multiple CDBs simultaneously by sharing data files.
- B. A non-CDB can be converted into a PDB.
- C. A PDB can be plugged into a CDB only if both are of the same Oracle Database release.
- D. A PDB in a remote CDB can be accessed transparently thereby aggregating results from local and remote PDBs.
- E. A PDB created from PDB\$SEED must be set to READ ONLY after loading data.
- F. A PDB created from PDB\$SEED must be set to READ WRITE after loading data.
- G. A PDB unplugged from a container database (CDB) can be plugged into a different CDB without altering any of its schemas.

**Answer: B,D,G**

### NEW QUESTION # 252

Choose the best answer. On the 10th of August, you implement an incremental database backup strategy and configure a recovery window of five days. Level 0 backups are taken on the 10th, 17th, and 24th of August. Differential level 1 incremental backups are taken daily between the level 0 backups. Today is the 26th of August. Which backups will be obsolete?

- A. all backups prior to 22nd of August
- B. all backups prior to 10th of August
- C. all backups prior to 20th of August
- D. all backups prior to 17th of August
- E. all backups prior to 24th of August

**Answer: D**

### NEW QUESTION # 253

Which four are true about RMAN backup sets? (Choose four.)

- A. A backup piece can belong to only one backup set.
- B. A data file can be split into multiple sections stored in different backup sets.

- C. Blocks from multiple data files can be contained in one backup set,
- D. A data file can be split into multiple sections stored in different backup pieces in the same backup set.
- E. Blocks from multiple data files can be contained in one backup piece,
- F. A backup set must be written to disk.
- G. A backup set must be written to media.
- H. A backup set can contain only one backup piece.

**Answer: B,C,G,H**

#### NEW QUESTION # 254

Which two statements are true about indexes and their administration in an Oracle database?

- A. An index is always created by scanning the key columns from the underlying table.
- B. A descending index is a type of bitmapped index.
- C. An index can be scanned to satisfy a query without the indexed table being accessed.
- D. An invisible index is maintained when a Data Manipulation Language (DML) command is performed on its underlying table.
- E. A non-unique index can be converted to a unique index using a Data Definition Language (DDL) command.

**Answer: C,D**

#### NEW QUESTION # 255
