After reading the exam blueprint, the candidates should take a look at the vendor's official training course dedicated to the CLCOR 350-801 exam. This course comes in three different formats, depending on the candidate's way of learning. The first option is tutor-led classes which are suitable for those candidates who prefer the classroom format. During 5 intensive days, the candidates will be exposed to a lot of hands-on lab practices. Plus, this mode is continued with 3 more days of self-study. The second alternative is dedicated to a virtual course conducted by the instructor. Its format is very similar to the classical

instructor-led training, just that it is delivered in a virtual format. Its duration is 5 days as well and this period is also followed by 3 days dedicated to self-study. The third option offered by Cisco is the e-learning type of training. It contains different materials that come in various formats. For example, the candidates will receive access to videos or challenges. The amount of materials is equivalent to 8 days of intensive training. Once they finalize the course, the candidates will have to enjoy the following advantages:

- Understanding the way to integrate and troubleshoot the LDAP infrastructure with Cisco Unified Communications Manager to ensure user synchronization and enable an appropriate authentication of users.
- Implementing the features for provisioning of Cisco Unified Communications Manager.
- Configuring and troubleshooting the collaboration endpoints.

If they manage to finalize this course, the candidates will obtain 64 credits that they will need to recertify after the validity period.
