SAP C_TS470_2412 practice questions are based on recently released SAP C_TS470_2412 exam objectives. Includes a user-friendly interface allowing you to take the SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service practice exam on your computers, like downloading the PDF, Web-Based C_TS470_2412 Practice Test TestsDumps, and Desktop SAP C_TS470_2412 practice exam TestsDumps.

SAP C_TS470_2412 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.

Topic 2	<ul style="list-style-type: none"> Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.
Topic 3	<ul style="list-style-type: none"> Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.
Topic 4	<ul style="list-style-type: none"> Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.

Wrong topic tend to be complex and no regularity, and the C_TS470_2412 torrent prep can help the users to form a good logical structure of the wrong question, this database to each user in the simulation in the practice of all kinds of wrong topic all induction and collation, and the C_TS470_2412 study question then to the next step in-depth analysis of the wrong topic, allowing users in which exist in the knowledge module, tell users of our C_TS470_2412 Exam Question how to make up for their own knowledge loophole, summarizes the method to deal with such questions for, to prevent such mistakes from happening again.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q47-Q52):

NEW QUESTION # 47

What is a prerequisite to use the product proposal?

- A. Create a bill of material (BOM) with BOM usage S (Service)
- B. Create a bill of material (BOM) with BOM usage 5 (Sales and Distribution)
- C. Create a bill of material (BOM) with BOM usage 4 (Plant Maintenance)
- D. Create bill of material items with item category I (structure element)

Answer: A

Explanation:

The product proposal in SAP S/4HANA Service suggests items (e.g., spare parts, services) in service orders or contracts:

* Create a bill of material (BOM) with BOM usage S (Service): A service BOM (usage S) is a prerequisite, defining standard components or services proposed in service processes. Configured via transaction CS01, it's linked to service master data.

* BOM usage 4 (Plant Maintenance): Used for maintenance, not service proposals.

* BOM usage 5 (Sales and Distribution): Relevant for sales, not service-specific proposals.

* Item category I (structure element): Item categories define BOM structure but aren't the prerequisite; the BOM usage is key. This is part of service order management (scope item 3D2). "A BOM with usage S (Service) is required to enable product proposals in service transactions." (SAP Help Portal, Service BOM).

NEW QUESTION # 48

In the advanced execution scenario, what is the dynamic item processor profile used for? Note: There are 3 correct answers to this question.

- A. To summarize dynamic items into a single debit memo item

- B. To enable resource-related billing
- C. To determine the service confirmation items
- D. To bill a service as a list of subitems
- E. To combine billing documents into one customer invoice

Answer: A,B,D

Explanation:

In the Service with Advanced Execution scenario (scope item 63Q), the dynamic item processor (DIP) profile is used for resource-related billing:

- * To summarize dynamic items into a single debit memo item: The DIP profile can aggregate confirmed resources (e.g., time, materials) into a single billing item.
- * To bill a service as a list of subitems: Alternatively, it can itemize resources as separate subitems for detailed billing.
- * To enable resource-related billing: The DIP profile processes dynamic data from confirmations (e.g., time, parts) to generate billing documents.
- * To determine the service confirmation items: This is part of confirmation, not the DIP profile's role.
- * To combine billing documents into one customer invoice: This is a billing process step, not a DIP function. The DIP profile is configured in Customizing under Sales and Distribution # Billing. "The dynamic item processor profile supports summarizing items, listing subitems, and enabling resource-related billing in advanced execution." (SAP Help Portal, Resource-Related Billing).

NEW QUESTION # 49

In which customizing activities do you maintain billing plan settings for the service contract? Note: There are 2 correct answers to this question.

- A. Define Billing Plan Types
- B. Exclude Billing Plan Items
- C. Budget Billing Plan
- D. Assign Billing Plan Type to Item Category

Answer: A,D

Explanation:

Billing plan settings for service contracts are maintained in customizing (SPRO # Service # Billing). The correct answers are C and D.

* Assign Billing Plan Type to Item Category (C): Links billing plan types (e.g., periodic) to contract item categories (e.g., SVC1), ensuring the right plan applies.

* Define Billing Plan Types (D): Defines the billing plan types (e.g., monthly, ad hoc) with parameters like periodicity.

Why Not the Others?

* A: Not a standard activity; might be a typo.

* B: Related to utilities, not service contracts.

"Billing plan settings are maintained by defining billing plan types and assigning them to item categories."

NEW QUESTION # 50

Which of the following objects are relevant to determine the correct plant and storage location in service order processing when reserving spare part items? Note: There are 3 correct answers to this question.

- A. Work center
- B. Service employee
- C. Service organization
- D. Service team
- E. Sales area

Answer: A,B,C

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, when reserving spare parts in service order processing (e.g., scope item 3D2: Service Order Management and Monitoring), the system determines the plant and storage location based on specific objects:

- * Service organization: This defines the organizational unit responsible for the service, which is linked to a plant. The plant is a key attribute in logistics and inventory management, making it critical for spare part reservations.

- * Work center: The work center specifies where the service is performed and is directly tied to a plant. It influences the storage location from which spare parts are drawn, especially in in-house or field service scenarios.
- * Service employee: The employee assigned to the service order can influence the plant and storage location, particularly in field service scenarios where parts are reserved from a technician's stock (e.g., van stock linked to a specific storage location).
- * Sales area: While relevant for sales processes, it does not directly determine plant or storage location for spare parts in service order processing.
- * Service team: Teams are organizational groupings but do not have a direct system linkage to plant /storage location determination for reservations. This logic is part of the integration between service management and logistics in SAP S/4HANA, ensuring accurate inventory allocation. "The plant and storage location for spare parts in a service order are derived from the service organization, work center, and assigned service employee." (SAP Help Portal, Service Order Processing).

NEW QUESTION # 51

Which option can you choose when customizing organizational management for SAP S/4HANA Cloud Private Edition, Service?

- A. Configure the Solution Database
- B. Maintain purchasing organizations
- C. Copy SD Sales Structure
- D. Copy the Service structure

Answer: D

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, organizational management defines the structure of service-related units (e.g., service teams, work centers). The correct answer is Copy the Service structure (Option D). Let's unpack this thoroughly.

What is Organizational Management in This Context?

Organizational management in SAP S/4HANA Service involves setting up units like service organizations, planner groups, and work centers that execute service processes. Customizing this structure ensures it aligns with the company's operational needs.

Why Copy the Service Structure?

The option "Copy the Service structure" refers to a customizing activity where you replicate a predefined service organizational structure (e.g., from a template or reference client) and adapt it. In SAP, this is done in the Implementation Guide (IMG) under Cross-Application Components or Service-specific settings. For example, you might copy a standard structure with service teams and work centers, then modify it to reflect regional or functional divisions (e.g., "North Service Team"). This accelerates setup while allowing flexibility.

Why Not the Other Options?

* Copy SD Sales Structure (A): This pertains to Sales and Distribution (SD), copying sales organizations or distribution channels, not service-specific structures.

* Maintain purchasing organizations (B): This relates to Materials Management (MM), not service organizational management.

* Configure the Solution Database (C): This is for managing service solutions or knowledge bases, not organizational structures.

Practical Insight:

Copying a service structure might involve inheriting predefined relationships (e.g., service org to plant) and then assigning specific roles or personnel. It's a common step in brownfield implementations to leverage existing setups.

"In customizing organizational management, you can choose to copy the service structure to replicate and adapt a predefined service organizational model."

NEW QUESTION # 52

.....

This is a good way to purchase valid exam preparation materials for your coming C_TS470_2412 test. Good choice will make you get double results with half efforts. Good exam preparation will point you a clear direction and help you prepare efficiently. Our C_TS470_2412 exam preparation can not only give a right direction but also cover most of the real test questions so that you can know the content of exam in advance. You can master the questions and answers of SAP C_TS470_2412 Exam Preparation, even adjust your exam mood actively.
