

Passing 3V0-21.23 Score Feedback | Reliable 3V0-21.23 Exam Simulator

What's more, part of that FreeCram 3V0-21.23 dumps now are free: <https://drive.google.com/open?id=1PVoNOERBOKPWJN1efYkkJDFrql22Ks4>

In order to gain the 3V0-21.23 certification quickly, people have bought a lot of 3V0-21.23 study materials, but they also find that these materials don't suitable for them and also cannot help them. If you also don't find the suitable 3V0-21.23 test guide, we are willing to recommend that you should use our 3V0-21.23 Study Materials. Because our products will help you solve the problem, it will never let you down if you decide to purchase and practice our 3V0-21.23 latest question. And our 3V0-21.23 exam questions have a high pass rate of 99% to 100%.

VMware 3V0-21.23 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Plan and Design the VMware Solution: This part targets Solution Designers, evaluating their ability to gather business objectives, create conceptual models based on these objectives, develop logical designs, and translate them into physical designs that meet specific requirements like manageability or security.
Topic 2	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers differentiating between business and technical requirements, as well as conceptual, logical, and physical design. A key skill measured is "Designing System Availability."
Topic 3	<ul style="list-style-type: none">VMware Products and Solutions: Targeting VMware Engineers, this section describes VMware Cloud Foundation architecture, its components like vSphere and NSX, benefits such as automation and scalability, and use cases like hybrid cloud environments. It assesses understanding of VMware Validated Solutions.

VMware 3V0-21.23 Exam Questions - Quick Tips To Pass [2026]

FreeCram offers VMware 3V0-21.23 practice tests for the evaluation of VMware vSphere 8.x Advanced Design exam preparation. VMware 3V0-21.23 practice test is compatible with all operating systems, including iOS, Mac, and Windows. Because this is a browser-based 3V0-21.23 Practice Test, there is no need for installation.

VMware vSphere 8.x Advanced Design Sample Questions (Q21-Q26):

NEW QUESTION # 21

An architect is tasked with designing the implementation of the VMware Validated Solutions in an existing VMware Cloud Foundation environment that includes:

Intelligent Operations Management

Intelligent Logging and Analytics

Which two design elements must the architect include in the design to be able to accomplish the deployment of these two solutions? (Choose two.)

- A. NSX Edge Cluster
- B. vSAN Stretched Cluster
- C. NSX Federation
- D. vSphere Lifecycle Manager
- E. Application Virtual Network (AVN)

Answer: A,D

Explanation:

vSphere Lifecycle Manager:

vSphere Lifecycle Manager (vLCM) is essential for ensuring that the VMware Cloud Foundation (VCF) environment is consistently managed and updated. Intelligent Operations Management and Intelligent Logging and Analytics require a well-integrated and managed infrastructure. vLCM automates the lifecycle management of vSphere clusters, ensuring that all components are compliant and correctly configured, which is critical for the deployment of VMware Validated Solutions.

NSX Edge Cluster:

An NSX Edge Cluster is necessary to provide networking services, including routing and firewalling, for the VMware Cloud Foundation environment. These solutions, especially those focusing on Intelligent Operations Management and Intelligent Logging and Analytics, typically rely on NSX for network segmentation, security, and operational insights. The NSX Edge Cluster is required for these networking functionalities to integrate properly into the architecture.

NEW QUESTION # 22

An architect is designing a series of new vSphere environments for an organization. The environments will be deployed in their US-East and US-West region data centers. Each data center may have one or more dedicated vSphere environments. Only the vSphere environments within a data center will be configured with Enhanced Linked Mode.

The Chief Technology Officer (CTO) has authorized the use of VMware vRealize Automation Cloud for automation. The build team creates standardized virtual machine images for various operating systems in Open Virtualization Format (OVF) and publishes the latest version on an as-needed basis to an internal HTTPS-accessible repository.

The architect must design a content library topology that meets the following requirements:

- A localized content library must be available in each data center.
- Each content library must be updated when an image is updated and released by the build team.
- The cloud automation platform must be able to consume the latest approved content library images.
- It must leverage the existing build team processes.

What should the architect recommend to meet the requirements?

- A. Work with the build team to automate a JSON-based manifest to the repository when changes occur in the repository. Create a subscribed content library for each vSphere environment. Configure the content library to download content when needed.
- B. Work with the build team to create a local content library for each vSphere environment. Import the OVF images when new image are published to the repository.
- C. Create a local content library for the primary vSphere environment in each data center. Create a subscribed content library for each additional vSphere environment in each data center. Configure the content library to download content automatically.
- D. Work with the build team to automate a JSON-based manifest to the repository when changes occur in the repository. Create a subscribed content library for each vSphere environment. Configure the content library to download content automatically.

Answer: D

NEW QUESTION # 23

An architect is planning the physical server configuration for a vSAN-based infrastructure.

Which operations mode should a RAID controller support to minimize potential server downtime during physical disk failures?

- A. RAID controller with RAID 10 mode
- **B. RAID controller with Passthru mode**
- C. RAID controller with RAID 6 mode
- D. RAID controller with RAID 5 mode

Answer: B

NEW QUESTION # 24

A architect is designing a new VMware software-defined data center (SDDC) using vSphere 7 to meet the following requirements:

- The SDDC must be deployed at two locations: primary and secondary.
- vSphere Replication must be used to replicate virtual machines between the two locations.
- Site Recovery Manager must be used to orchestrate disaster recovery (DR) activities.
- One single-sign on (SSO) domain must be used to authenticate access at both locations.

Which design decision should the architect make to meet these requirements?

- **A. A vCenter Server Appliance will be deployed to each site.**
- B. A vCenter Server Appliance will be deployed to the primary site only.
- C. A vCenter Server Appliance will be deployed to each site. Unique SSO domains will be created per site.
- D. A vCenter Server will be installed on Windows virtual machines deployed to both sites.

Answer: A

NEW QUESTION # 25

In a meeting to discuss the minimum viable product (MVP) deployment of a new customer-facing application, the key stakeholder shares details of the application components and the application administrators share details of performance and integrity tests for the application.

The application will be made up of the following components:

- A web server Steps to confirm the web server is operating correctly will take 15 minutes after the application server is online.
- An application server Steps to confirm application server integrity will take 15 minutes after the database is online.
- A database server The database server will be managed by a database administrator, with an agreed service-level agreement (SLA) to restore and validate database services within one hour.

The existing VMware infrastructure offers a recovery point objective (RPO) of 5 minutes and recovery time objective (RTO) of 15 minutes through a combination of backups and replication.

In the event of an outage impacting all three application components, how long will it take for the application to recover and complete all checks?

- A. 15 minutes
- **B. 105 minutes**
- C. 90 minutes
- D. 60 minutes

Answer: B

NEW QUESTION # 26

.....

The price for 3V0-21.23 study materials is reasonable, no matter you are a student at school or an employee in the company, you can afford it. In addition, 3V0-21.23 exam dumps are compiled by skilled experts, and therefore the quality can be guaranteed. You can receive the download link and password for 3V0-21.23 Exam Dumps within ten minutes after payment. If you don't receive, you can contact us, and we will solve that for you. We are pass guarantee and money back guarantee, and if you fail to pass the exam, we will return your money.
