

Passing Oracle 1Z0-1042-25 Exam is Easy with Our Reliable Online 1Z0-1042-25 Training Materials: Oracle Cloud Infrastructure 2025 Application Integration Professional

BONUS!!! Download part of DumpsFree 1Z0-1042-25 dumps for free: <https://drive.google.com/open?id=1QP-rle1A5XEEcLZfOXVEwbS6hIBKB1bT>

For busy candidates who want to study for the Oracle Cloud Infrastructure 2025 Application Integration Professional exam on the go via their smartphones, laptops, or tablets, our updated Oracle 1Z0-1042-25 PDF Questions are excellent. Because the PDF file of the latest questions is portable, you can prepare for the 1Z0-1042-25 Exam via a smart device whenever and wherever you like. Additionally, exam PDF questions are printable. You can print these 1Z0-1042-25 exam questions to study when you don't have access to a smart device.

In light of the truth that different people have various learning habits, we launch three 1Z0-1042-25 training questions demos for your guidance: the PDF, Software and the APP online. Just come to our official website and click on the corresponding website link of the 1Z0-1042-25 Exam Materials, then seek the information you need, the test samples are easy to obtain. In addition, you can freely download those 1Z0-1042-25 learning materials for your consideration.

1Z0-1042-25 Valid Exam Review | 1Z0-1042-25 Latest Exam Preparation

DumpsFree offers you a full refund if you are not able to pass the 1Z0-1042-25 certification exams after preparing with our products. The high quality of 1Z0-1042-25 certification exam preparation products increases your success probability and reduces the chances of failure. The 1Z0-1042-25 exam preparation products contain all the features to make you ready for embracing success in a first attempt. These 1Z0-1042-25 Exam Preparation products are updated regularly for guaranteed success. Free demo is also offered to the users for checking the 1Z0-1042-25 exam preparation products quality.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Topic 2	Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.
Topic 3	Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.
Topic 4	Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.
Topic 5	Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q88-Q93):

NEW QUESTION # 88

Oracle Integration (OIC) is available in two editions, Standard and Enterprise. Which two OIC Enterprise Edition capabilities are also available in OIC Standard Edition?

- A. Enterprise Application adapters (such as EBS, JDE, SAP, and Siebel)
- B. File Server
- C. Visual Builder
- D. B2B Trading Partner Agreements
- E. Process Automation

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation:

Editions:

C, D: True-File Server, Visual Builder in both.

NEW QUESTION # 89

You are designing a new integration in Oracle Integration (OIC) that needs to expose a RESTful interface for client applications. Which is a valid consideration when choosing request and response options using the REST Adapter Endpoint Configuration Wizard?

- A. File attachments can be accepted as a request option for the Trigger interface, but you cannot include attachments as a response to the client.
- B. If you select a PUT or POST action (HTTP method), you must define a JSON response payload format.
- C. Although you can define both query and template parameters, only template parameters are available for mapping in the mapper because query parameters are considered optional.

- **D. Both standard and custom HTTP headers can be defined for both the request and the response.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

REST Configuration:

A:True-headers are flexible.

NEW QUESTION # 90

Which statement about the Oracle Integration (OIC) connectivity agent is NOT valid?

- A. You can create up to five agent groups for each OIC instance.
- B. The connectivity agent can use Basic Authentication or OAuth 2.0 token-based authentication when invoking OIC endpoints.
- C. You must create an agent group before you can run the connectivity agent installer.
- **D. Creating the agent group automatically creates an OAuth client application.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

Agent Facts:

B:False-no auto-OAuth creation.

NEW QUESTION # 91

There are use cases in which you need to perform an advanced XSLT task that you cannot perform in the Oracle Integration Cloud (OIC) data mapper. To perform the advanced mapping tasks, you decide to use an external XSLT mapper and then import the .xsl file back to your integration.

Which is NOT a valid consideration when handling this use case?

- **A. The exported archive must be imported into an Oracle Service Bus project in JDeveloper.**
- B. The exported archive file can include a map file that is largely complete in content or a map file that is empty of content.
- C. Once the advanced mapping is complete, you must import the entire integration that contains the updated .xsl files.
- D. You must export the entire integration that contains one or more .xsl files.

Answer: A

Explanation:

There is no need to import the archive into an Oracle Service Bus project. The focus is on modifying the XSLT mapping in OIC.

NEW QUESTION # 92

What policy is required to be in an API if that API is to be used under a Plan?

- A. Interface Filtering
- B. Basic Auth
- **C. Key Validation**
- D. Application Rate Limiting

Answer: C

Explanation:

Key Validation ensures that the API is used according to its plan. This policy checks that the correct key or token is presented for accessing the API under the given plan.

NEW QUESTION # 93
