

# Passing VMware NSX 4.X Professional V2 actual test, valid 2V0-41.24 test braindump

BTW, DOWNLOAD part of Actual4Exams 2V0-41.24 dumps from Cloud Storage: <https://drive.google.com/open?id=1osFDmNF1-ea8Udy3aGqja09jDXMg-H7i>

About the upcoming 2V0-41.24 exam, do you have mastered the key parts which the exam will test up to now? Everyone is conscious of the importance and only the smart one with smart way can make it. Maybe you are unfamiliar with our 2V0-41.24 Latest Material, but our 2V0-41.24 real questions are applicable to this exam with high passing rate up to 98 percent and over.

## VMware 2V0-41.24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Troubleshoot and Optimize the VMware Solution: This section evaluates the skills of VMware Networking Professionals in troubleshooting and optimizing NSX solutions. Candidates will use log files to identify issues, including locating default log file locations and generating log bundles to assist in diagnostics.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• VMware Solution: This section measures the skills of VMware NSX Networking professionals and covers knowledge of the VMware Virtual Cloud Network and NSX. Candidates will demonstrate an understanding of the NSX management cluster and the data plane, focusing on how these components interact to provide network virtualization.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Install, Configure, and Administrate the VMware Solution: This domain targets VMware System administrators and emphasizes preparing an NSX infrastructure for deployment. Candidates will learn to create transport zones and configure essential components necessary for a functional NSX environment.</li></ul>

## 2V0-41.24 Valid Test Forum - 2V0-41.24 Latest Exam Experience

If you want to success in your career as a VMware Certified Professional, you must think outside the box. It would be beneficial if you considered adding VMware NSX 4.X Professional V2 to your resume. To get this certification, you must pass the 2V0-41.24 exam conducted by VMware. Passing the VMware NSX 4.X Professional V2 exam will help you advance your career. It is not an easy task to pass the VMware NSX 4.X Professional V2 certification exam on the first attempt, but now Actual4Exams is here to help. To assist you with remote study, Actual4Exams provides VMware 2V0-41.24 Exam Questions to make your test preparation complete. The VMware 2V0-41.24 exam questions simulate the actual exam pattern, allowing you to pass the VMware NSX 4.X Professional V2 certification exam the first time.

## VMware NSX 4.X Professional V2 Sample Questions (Q117-Q122):

### NEW QUESTION # 117

Which of the following exist only on Tier-1 Gateway firewall configurations and not on Tier-0?

- A. Sources
- **B. Profiles**
- C. Actions
- D. Applied To

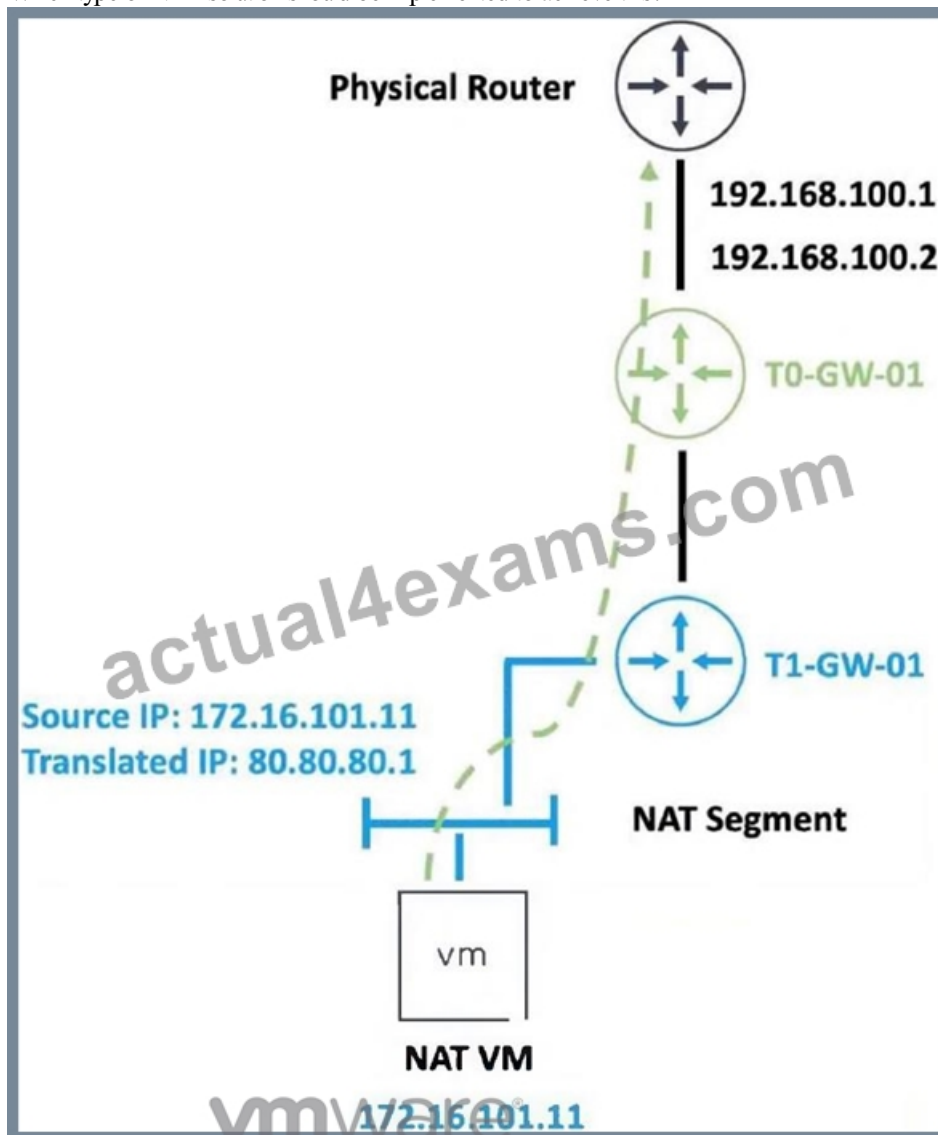

**Answer: B**

### NEW QUESTION # 118

Refer to the exhibit.

An administrator would like to change the private IP address of the NAT VM 172.16.101.11 to a public address of 80.80.80.1 as the packets leave the NAT-Segment network.

Which type of NAT solution should be implemented to achieve this?

- **A. SNAT**
- B. DNAT
- C. NAT64
- D. Reflexive NAT

**Answer: A**

Explanation:

Source NAT (SNAT) is used to translate the private IP address (172.16.101.11) of the NAT VM to a public IP address

(80.80.80.1) as the packets leave the NAT-Segment network. SNAT changes the source IP of outbound packets, allowing private IP addresses within the internal network to be mapped to public IP addresses for communication with external networks.

#### NEW QUESTION # 119

How does the Traceflow tool identify issues in a network?

- **A. Injects synthetic traffic into the data plane and observes the results in the control plane.**
- B. Injects ICMP traffic into the data plane and observes the results in the control plane.
- C. Compares intended network state in the control plane with Tunnel End Point (TEP) keepalives in the data plane.
- D. Compares the management plane configuration states containing control plane traffic and error reporting from transport node agents.

**Answer: A**

Explanation:

The Traceflow tool in NSX injects synthetic traffic into the data plane and monitors the traffic flow through the network, allowing administrators to observe how the traffic is handled at each hop. This approach helps identify issues such as dropped packets, routing errors, or misconfigurations by providing visibility into the path taken by the traffic and any potential disruptions.

#### NEW QUESTION # 120

What are two valid options when configuring the scope of a distributed firewall rule? (Choose two.)

- A. Segment Port
- B. Tier-1 Gateway
- **C. Group**
- **D. DFW**
- E. Segment

**Answer: C,D**

Explanation:

A group is a logical construct that represents a collection of objects in NSX, such as segments, segment ports, virtual machines, IP addresses, MAC addresses, tags, or security policies. A group can be used to define dynamic membership criteria based on various attributes or filters. A group can also be used as the scope of a distributed firewall rule, which means that the rule will apply to all the traffic that matches the group membership criteria<sup>32</sup> Reference:

#### NEW QUESTION # 121

Which statement is true about an alarm in a Suppressed state?

- A. An alarm can be suppressed for a specific duration in days.
- B. An alarm can be suppressed for a specific duration in minutes
- C. An alarm can be suppressed for a specific duration in seconds.
- **D. An alarm can be suppressed for a specific duration in hours.**

**Answer: D**

Explanation:

In NSX and VMware environments, an alarm in a suppressed state can typically be set to remain suppressed for a specific duration measured in hours. This allows administrators to temporarily ignore the alarm for a set period while working on a resolution without continuous alerts.

#### NEW QUESTION # 122
