BCS Foundation Certificate in Business Analysis V4.0 Sample Questions (Q50-Q55):

NEW QUESTION # 50

Which of the following terms may be used to describe the attitude of a stakeholder who is NOT in favour of the project but is probably not actively opposed to it?

- A. Critic.
- B. Neutral.
- C. Blocker.
- D. Opponent.

Answer: A

NEW QUESTION # 51

In which section of a requirements document would technical requirements be recorded?

- A. Data model
- B. Function models
- C. Requirements catalogue
- D. Glossary of terms

Answer: C

Explanation:

The Requirements Catalogue (or the Requirements Specification section) is the comprehensive, organised list of all types of requirements. Technical Requirements are the non-functional constraints placed on the solution's design or build (e.g., specific hardware, operating system compatibility, integration protocols). While these inform other models, they are typically documented and tracked with other requirements (Functional and Non-functional) in the master Requirements Catalogue, often within the Non-functional or System Requirements section of the catalogue structure. Options A, B, and C are supporting documents or models, not the primary repository for a list of technical requirements.
