

PCEP-30-02 Learning Materials: PCEP - Certified Entry-Level Python Programmer & PCEP-30-02 Test Braindumps

BTW, DOWNLOAD part of TestkingPass PCEP-30-02 dumps from Cloud Storage: <https://drive.google.com/open?id=1u55UbYCW5ozh36QkQkxI6RcO7FAB0Vnk>

Being respected and gaining a high social status maybe what you always long for. But if you want to achieve that you must own good abilities and profound knowledge in some certain area. Passing the PCEP-30-02 certification can prove that and help you realize your goal and if you buy our PCEP-30-02 Quiz prep you will pass the exam successfully. Our product is compiled by experts and approved by professionals with years of experiences. You can download and try out our latest PCEP-30-02 quiz torrent freely before your purchase.

To do this you just need to enroll in the PCEP-30-02 test and put all your efforts and prepare well for the PCEP-30-02 exam. For the quick and complete PCEP-30-02 exam preparation you can trust real and updated PCEP-30-02 PDF Questions and practice tests which you can download from TestkingPass. We are quite confident that with Python Institute PCEP-30-02 Exam Dumps you can not only prepare well but also pass the challenging PCEP-30-02 exam with flying colors.

Exam PCEP-30-02 Questions Answers & Pass Leader PCEP-30-02 Dumps

If you want to choose the best PCEP-30-02 exam bootcamp, you should not miss our PCEP-30-02 exam materials. We have not only experienced industries elites who compile the high-quality products but also professional IT staff to develop three formats of our PCEP-30-02 study guide and the fast shopping environment. Buyers can enjoy free-worry shopping experience. Besides we provide one year free updates of our PCEP-30-02 training braindump and service warranty for buyers. With our PCEP-30-02 exam questions, your success is guaranteed.

Python Institute PCEP-30-02 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> • Data Collections: In this section, the focus is on list construction, indexing, slicing, methods, and comprehensions; it covers Tuples, Dictionaries, and Strings.
Topic 2	<ul style="list-style-type: none"> • Functions and Exceptions: This part of the exam covers the definition of function and invocation
Topic 3	<ul style="list-style-type: none"> • Loops: while, for, range(), loops control, and nesting of loops.

Python Institute PCEP - Certified Entry-Level Python Programmer Sample Questions (Q21-Q26):

NEW QUESTION # 21

Assuming that the `phone_dir` dictionary contains name:number pairs, arrange the code boxes to create a valid line of code which adds Oliver Twist's phone number (5551122333) to the directory.

Answer:

Explanation:

```
phone_dir["Oliver Twist"] = ["5551122333"]
```

Explanation:

To correctly add Oliver Twist's phone number to the `phone_dir` dictionary, the code must follow this `phone_dir["Oliver Twist"] = ["5551122333"]`. Now, let's match that with your code boxes and arrange them:

```
* phone_dir
```

```
* [
```

```
* "Oliver Twist"
```

```
* ]
```

```
* =
```

```
* [
```

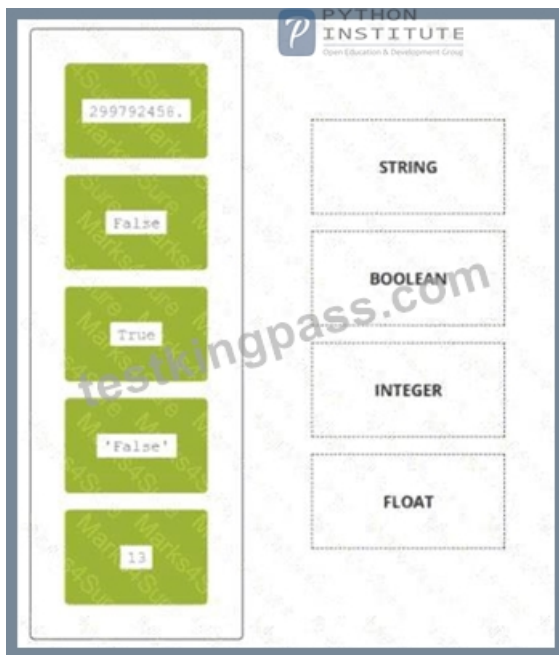

```
* "5551122333"
```

```
* ]
```

Final Order: `phone_dir["Oliver Twist"] = ["5551122333"]`

NEW QUESTION # 22

Drag and drop the literals to match their data type names.

Answer:

Explanation:

Explanation:

NEW QUESTION # 23

Python Is an example of which programming language category?

- A. compiled
- B. machine
- C. interpreted
- D. assembly

Answer: C

Explanation:

Python is an interpreted programming language, which means that the source code is translated into executable code by an interpreter at runtime, rather than by a compiler beforehand. Interpreted languages are more flexible and portable than compiled languages, but they are also slower and less efficient. Assembly and machine languages are low-level languages that are directly executed by the hardware, while compiled languages are high-level languages that are translated into machine code by a compiler before execution.

NEW QUESTION # 24

Drag and drop the code boxes in order to build a program which prints Unavailable to the screen.

(Note: one code box will not be used.)

pass

except. KeyError:

except:

```
prices = { "pizza": 3.99 }
try:
    charge = prices["calzone"]
    print("Charged")
    print("Unavailable")
    print("Out of bounds")
```

**PYTHON
INSTITUTE**

Open Education & Development Group

Answer:

Explanation:

pass

except. KeyError:

except:

```
prices = { "pizza": 3.99 }
try:
    charge = prices["calzone"]
    print("Charged")
except. KeyError:
    print("Unavailable")
except:
    print("Out of bounds")
```

**PYTHON
INSTITUTE**

Open Education & Development Group

pass

P

PYTHON
INSTITUTE

Open Education & Development Group

```

prices = { "pizza": 3.99 }

try:
    charge ← prices["calzone"]
    print("Charged")
except KeyError:
    print("Unavailable")
except:
    print("Out of bounds")

```

NEW QUESTION # 25

Insert the code boxes in the correct positions in order to build a line of code which asks the user for an integer value and assigns it to the depth variable.

(Note: some code boxes will not be used.)

input(

)

"Enter immersion depth:")

—

int(

—

float(

```

depth = input(
    "Enter immersion depth:" )
depth = int(
    depth)

```

Answer:

Explanation:

Explanation:

One possible way to insert the code boxes in the correct positions in order to build a line of code which asks the user for an integer value and assigns it to the depth variable is:

```
depth = int(input("Enter the immersion depth: "))
```

This line of code uses the input function to prompt the user for a string value, and then uses the int function to convert that string value into an integer number. The result is then assigned to the variable depth.

You can find more information about the input and int functions in Python in the following references:

- * [Python input() Function]
- * [Python int() Function]

NEW QUESTION # 26

.....

The contents of PCEP-30-02 study materials are all compiled by industry experts based on the examination outlines and industry development trends over the years. And our PCEP-30-02 exam guide has its own system and levels of hierarchy, which can make users improve effectively. Our PCEP-30-02 learning dumps can simulate the real test environment. After the exam is over, the system also gives the total score and correct answer rate.
