

PCI SSC QSA_New_V4 Valid Test Vce Free & Valid QSA_New_V4 Mock Exam

P.S. Free & New QSA_New_V4 dumps are available on Google Drive shared by BraindumpsIT: <https://drive.google.com/open?id=1JM8CGA69t-4OMQWSuQ2pSrIEMi-T0X5B>

BraindumpsIT is an invisible asset that can give your advantage and get better life higher than your current situation and help you stand out among the average with the best and most accurate QSA_New_V4 study braindumps. For the great merit of our QSA_New_V4 Exam Guide is too many to count. Our experts have been dedicated in this area for more than ten years on compiling the content of our QSA_New_V4 training guide and keeping updating it to the latest.

Only if you download our software and practice no more than 30 hours will you attend your test confidently. Because our QSA_New_V4 exam torrent can simulate limited-timed examination and online error correcting, it just takes less time and energy for you to prepare the QSA_New_V4 exam than other study materials. As is known to us, maybe you are a worker who is busy in your career. Therefore, purchasing the QSA_New_V4 Guide Torrent is the best and wisest choice for you to prepare your test. If you buy our QSA_New_V4 questions torrent, the day of regretting will not come anymore. It is very economical that you just spend 20 or 30 hours then you have the QSA_New_V4 certificate in your hand, which is typically beneficial for your career in the future.

Most Probable Real PCI SSC Exam Questions in PCI SSC QSA_New_V4 PDF Format

The Qualified Security Assessor V4 Exam (QSA_New_V4) study material of BraindumpsIT is available in three different and easy-to-access formats. The first one is printable and portable Qualified Security Assessor V4 Exam (QSA_New_V4) PDF format. With the PDF version, you can access the collection of actual Qualified Security Assessor V4 Exam (QSA_New_V4) questions with your smart devices like smartphones, tablets, and laptops.

PCI SSC QSA_New_V4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> PCI Validation Requirements: This section of the exam measures the skills of Compliance Analysts and evaluates the processes involved in validating PCI DSS compliance. Candidates must understand the different levels of merchant and service provider validation, including self-assessment questionnaires and external audits. One essential skill tested is determining the appropriate validation method based on business type.
Topic 2	<ul style="list-style-type: none"> PCI Reporting Requirements: This section of the exam measures the skills of Risk Management Professionals and covers the reporting obligations associated with PCI DSS compliance. Candidates must be able to prepare and submit necessary documentation, such as Reports on Compliance (ROCs) and Self-Assessment Questionnaires (SAQs). One critical skill assessed is compiling and submitting accurate PCI compliance reports.
Topic 3	<ul style="list-style-type: none"> Payment Brand Specific Requirements: This section of the exam measures the skills of Payment Security Specialists and focuses on the unique security and compliance requirements set by different payment brands, such as Visa, Mastercard, and American Express. Candidates must be familiar with the specific mandates and expectations of each brand when handling cardholder data. One skill assessed is identifying brand-specific compliance variations.
Topic 4	<ul style="list-style-type: none"> Real-World Case Studies: This section of the exam measures the skills of Cybersecurity Consultants and involves analyzing real-world breaches, compliance failures, and best practices in PCI DSS implementation. Candidates must review case studies to understand practical applications of security standards and identify lessons learned. One key skill evaluated is applying PCI DSS principles to prevent security breaches.
Topic 5	<ul style="list-style-type: none"> PCI DSS Testing Procedures: This section of the exam measures the skills of PCI Compliance Auditors and covers the testing procedures required to assess compliance with the Payment Card Industry Data Security Standard (PCI DSS). Candidates must understand how to evaluate security controls, identify vulnerabilities, and ensure that organizations meet compliance requirements. One key skill evaluated is assessing security measures against PCI DSS standards.

PCI SSC Qualified Security Assessor V4 Exam Sample Questions (Q62-Q67):

NEW QUESTION # 62

A network firewall has been configured with the latest vendor security patches. What additional configuration is needed to harden the firewall?

- A. Synchronize the firewall rules with the other firewalls in the environment.
- B. Configure the firewall to permit all traffic until additional rules are defined.
- C. Disable any firewall functions that are not needed in production.
- D. Remove the default "Firewall Administrator" account and create a shared account for firewall administrators to use.

Answer: C

Explanation:

Per Requirement 2.2.5, all insecure and unnecessary services, protocols, daemons, or functions must be disabled. This includes unnecessary features on firewalls and other devices. Disabling unneeded functions reduces the attack surface and aligns with secure configuration principles.

* Option A#Incorrect. Shared accounts violate Requirement 8.2.1, which mandates unique IDs.

* Option B#Incorrect. Allowing all traffic is a violation of Requirement 1.2.1, which requires "deny all unless explicitly allowed".

* Option C#Incorrect. Synchronizing rules may be useful but does not directly relate to hardening.

* Option D#Correct. Disabling unused firewall features aligns with secure configuration.

References:

PCI DSS v4.0.1 - Requirement 2.2.5

PCI DSS v4.0.1 - Requirement 1.2.1 (deny-all approach)

NEW QUESTION # 63

Which of the following describes "stateful responses" to communication Initiated by a trusted network?

- A. Logs of user activity on the firewall are correlated to identify and respond to suspicious behavior.
- **B. Active network connections are tracked so that invalid "response" traffic can be identified.**
- C. Administrative access to respond to requests to change the firewall is limited to one individual at a time.
- D. A current baseline of application configurations is maintained and any mis-configuration is responded to promptly.

Answer: B

Explanation:

Stateful Inspection

* PCI DSS Requirement 1.2 specifies the need for stateful inspection to track the state of active connections. This ensures that only valid responses to communication initiated by trusted networks are allowed.

* Invalid or unsolicited response traffic is blocked to prevent exploitation of vulnerabilities.

Key Functionality of Stateful Firewalls

* Stateful firewalls maintain session information and only allow traffic that matches an existing session or expected response.

Incorrect Options

* Option A: Administrative access restrictions are important but unrelated to stateful responses.

* Option C: Baseline configurations are a different security control.

* Option D: Logging and correlation are for threat detection, not stateful response.

NEW QUESTION # 64

Which of the following file types must be monitored by a change-detection mechanism (e.g., a file-integrity monitoring tool)?

- A. Files that regularly change
- **B. System configuration and parameter files**
- C. Security policy and procedure documents
- D. Application vendor manuals

Answer: B

Explanation:

PCI DSS Requirement 11.5.2 mandates the use of file-integrity monitoring (FIM) or change-detection tools to monitor critical files such as system binaries, configuration files, and system parameters.

* Option A: Incorrect. Manuals are not critical system files.

* Option B: Incorrect. Regularly changing files (e.g., logs or temp files) are typically excluded.

* Option C: Incorrect. Policies and procedures are reviewed but not subject to FIM.

* Option D: Correct. System config and parameter files must be monitored for unauthorized changes.

Reference: PCI DSS v4.0.1 - Requirement 11.5.2.

NEW QUESTION # 65

The intent of assigning a risk ranking to vulnerabilities is to?

- A. Ensure that critical security patches are installed at least quarterly.
- **B. Prioritize the highest risk items so they can be addressed more quickly.**
- C. Replace the need for quarterly ASV scans.
- D. Ensure all vulnerabilities are addressed within 30 days.

Answer: B

Explanation:

PCI DSS Requirement 6.3.1 requires entities to assign a risk ranking to vulnerabilities (e.g., high, medium, low) to ensure that remediation efforts are prioritised. This risk-based approach helps organisations focus resources where they are most needed.

* Option A: Incorrect. Timeframes depend on the severity and internal policy, not always 30 days.

* Option B: Incorrect. Risk ranking supports remediation but doesn't replace scanning.

* Option C: Correct. The purpose is to prioritise higher-risk items for faster action.

* Option D: Incorrect. Patch frequency is addressed elsewhere (Requirement 6.3.3).

NEW QUESTION # 66

An organization has implemented a change-detection mechanism on their systems. How often must critical file comparisons be performed?

- A. At least monthly
- **B. At least weekly**
- C. Periodically as defined by the entity
- D. Only after a valid change is installed

Answer: B

Explanation:

As specified under Requirement 11.5.2.1, comparisons of critical files (e.g., config files, executables) using change-detection mechanisms (e.g., FIM tools) must occur at least weekly. This ensures timely detection of unauthorized changes or tampering.

* Option A: #Correct. Weekly is the minimum frequency required.

* Option B: #Incorrect. A defined "period" is not sufficient unless it's weekly or more frequent.

* Option C: #Incorrect. Scans should not wait for changes; they should detect unexpected ones.

* Option D: #Incorrect. Monthly is too infrequent for PCI DSS compliance.

Reference: PCI DSS v4.0.1 - Requirement 11.5.2.1.

NEW QUESTION # 67

.....

An Qualified Security Assessor V4 Exam (QSA_New_V4) practice questions is a helpful, proven strategy to crack the PCI SSC QSA_New_V4 exam successfully. It helps candidates to know their weaknesses and overall performance. BraindumpsIT has hundreds of Qualified Security Assessor V4 Exam (QSA_New_V4) exam dumps that are useful to practice in real time. The PCI SSC QSA_New_V4 practice questions have a close resemblance with the actual QSA_New_V4 exam
