Download the free PCNSE pdf demo file of PDFVCE brain dumps. Checking the worth of the PCNSE exam questions and learns the format of questions and answers. A few moments are enough to introduce you to the excellent of the PCNSE Brain Dumps and the authenticity and relevance of the information contained in them.

The PCNSE certification exam is a rigorous assessment of a candidate's knowledge and skills in Palo Alto Networks technologies. PCNSE exam consists of 75 multiple-choice questions and takes approximately 90 minutes to complete. Candidates are required to score at least 70% to pass the exam and earn the PCNSE certification. Palo Alto Networks Certified Network Security Engineer Exam certification is valid for two years, after which candidates must renew their certification by passing a recertification exam or completing continuing education credits.

The PCNSE certification is intended for security professionals, network engineers, system administrators, and anyone who manages or deploys Palo Alto Networks Next-Generation Firewalls. Palo Alto Networks Certified Network Security Engineer Exam certification is a valuable asset for professionals looking to advance their careers in the IT security industry. The PCNSE Certification Exam is challenging, and candidates are required to have in-depth knowledge and hands-on experience with Palo Alto Networks Firewalls. However, the certification is well worth the effort and time investment, as it opens up new career opportunities and validates a candidate's expertise in network security.

The Palo Alto Networks PCNSE exam consists of 75 multiple-choice questions and has a time limit of 90 minutes. The questions are designed to test the candidate's knowledge of Palo Alto Networks security technologies, including firewalls, VPNs, intrusion prevention systems, and endpoint protection. PCNSE exam also covers the configuration and management of these technologies, as well as troubleshooting common issues that may arise.

The PCNSE exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our PCNSE Test Torrent provides the statistics report function and help the students find the weak links and deal with them.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q280-Q285):

NEW QUESTION # 280

Use the image below If the firewall has the displayed link monitoring configuration what will cause a failover?

- A. ethernet1/3 or ethernet1/6 going down
- B. ethernet1/3 and ethernet1/6 going down
- C. ethernet1/3 going down
- D. ethernet1/6 going down

Answer: B

NEW QUESTION # 281

The administrator has enabled BGP on a virtual router on the Palo Alto Networks NGFW, but new routes do not seem to be populating the virtual router.

Which two options would help the administrator troubleshoot this issue? (Choose two.)

- A. View the Runtime Stats and look for problems with BGP configuration.
- B. View the ACC tab to isolate routing issues.
- C. Perform a traffic pcap on the NGFW to see any BGP problems.
- D. View the System logs and look for the error messages about BGP.

Answer: A,B

NEW QUESTION # 282

While troubleshooting an SSL Forward Proxy decryption issue, which PAN-OS CLI command would you use to check the details of the end entity certificate that is signed by the Forward Trust Certificate or Forward Untrust Certificate?

- A. show system setting ssl-decrypt certificate-cache
- B. show system setting ssl-decrypt certs
- C. debug dataplane show ssl-decrypt ssl-stats
- D. show system setting ssl-decrypt certificate

Answer: D

Explanation:

NEW QUESTION # 283

Which User-ID method maps IP addresses to usernames for users connecting through an 802.1x-enabled wireless network device that has no native integration with PAN-OS® software?

- A. Client Probing
- B. XML API

- C. Server Monitoring
- D. Port Mapping

Answer: B

Explanation:

Captive Portal and the other standard user mapping methods might not work for certain types of user access. For example, the standard methods cannot add mappings of users connecting from a third-party VPN solution or users connecting to a 802.1x-enabled wireless network. For such cases, you can use the PAN-OS XML API to capture login events and send them to the PAN-OS integrated User-ID agent Reference:

NEW QUESTION # 284

What must be configured to apply tags automatically based on User-ID logs?

- A. Device ID
- B. Log settings
- C. Group mapping
- **D. Log Forwarding profile**

Answer: D

Explanation:

Explanation

To apply tags automatically based on User-ID logs, the engineer must configure a Log Forwarding profile that specifies the criteria for matching the logs and the tags to apply. The Log Forwarding profile can be attached to a security policy rule or a decryption policy rule to enable auto-tagging for the traffic that matches the rule. The tags can then be used for dynamic address groups, policy enforcement, or reporting¹. References: Use Auto-Tagging to Automate Security Actions, PCNSE Study Guide (page 49)

NEW QUESTION # 285

.....

The PDF file of PCNSE real exam questions is easy to use on laptops, tablets, and smartphones.
