# PDF 1Z0-1111-25 Cram Exam, Free 1Z0-1111-25 Exam Questions

Look at our 1Z0-1111-25 study questions, you can easily find there are three varied versions: the PDF, Software and APP online. And no matter which version you buy, you will find that our system can support long time usage. The durability and persistence can stand the test of practice. All in all, the performance of our 1Z0-1111-25 Learning Materials is excellent. Come to enjoy the pleasant learning process. It is no use if you do not try our 1Z0-1111-25 exam braindumps by yourself.

## Oracle 1Z0-1111-25 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Monitor Applications with Deep Visibility into End-User Experience: This domain tests the knowledge of Application Performance Engineers and DevOps Specialists in using OCI Application Performance Monitoring (APM). It includes instrumenting applications for data collection, analyzing performance metrics, visualizing distributed application components, and diagnosing issues across multi-tier architectures. |
| Topic 2 | • Respond to Cloud Resource Changes in Real-Time: This domain measures the skills of Event Managers and Integration Specialists in using OCI Events Service. It covers event structures, types, rules, and integration with other OCI services to respond effectively to resource changes and automate workflows. |
| Topic 3 | • Centrally Manage and Visualize Log Data: This section assesses the abilities of Logging Analysts and Security Engineers in managing logs across an entire IT environment. It includes enabling log collection, creating connectors for log transitions, identifying log patterns, and visualizing logs for advanced analytics using OCI Logging Service. |
|  |  |

| Topic 4 | • Define the Pillars of Observability: This section of the exam measures the skills of Cloud Architects and Site Reliability Engineers (SREs) in understanding the three pillars of observability: logs, metrics, and traces. It explains how these components provide insights into system health and performance, enabling effective monitoring and troubleshooting in distributed cloud environments. |

# Free 1Z0-1111-25 Exam Questions, 1Z0-1111-25 Download

The web-based 1Z0-1111-25 practice test can be taken via any operating system without the need to install additional software. Also, this 1Z0-1111-25 web-based practice exam is compatible with all browsers. Both Oracle 1Z0-1111-25 Practice Tests of BraindumpQuiz keep result of your attempts and assist you in fixing errors. Moreover, you can alter settings of these 1Z0-1111-25 practice exams to suit your learning requirements.

# Oracle Cloud Infrastructure 2025 Observability Professional Sample Questions (Q59-Q64):

**NEW QUESTION # 59**
In Application Performance Monitoring (APM), a distributed tracing user initiates a request through a browser. What is the first span called?

- A. Root span
- B. Trace ID
- C. Ajax call

**Answer: A**

Explanation:
In distributed tracing within OCI APM:
Root span (C): The first span in a trace, representing the entry point of a user request (e.g., an HTTP request from a browser). It has no parent span and initiates the chain of subsequent spans across services.
Why not A or B?
Ajax call (A): A type of request, not a span term.
Trace ID (B): A unique identifier for the entire trace, not a span.
The root span is foundational to tracing a request's journey.

**NEW QUESTION # 60**
Which of the following TWO are stored in a Log Source of Logging Analytics? (Choose two.)

- A. Where to store Log data
- B. Which Parsers to use
- C. Which Management Agents to use
- D. Where to find Logs

**Answer: B,D**

Explanation:
A Log Source in Logging Analytics defines how logs are collected and processed:
Which Parsers to use (A): Specifies the parsers (e.g., Syslog, JSON) that extract fields from logs, enabling structured analysis.
Where to find Logs (C): Defines the log location (e.g., file path /var/log/messages, database connection string), directing the collection process.
Why not B or D?
Where to store Log data (B): Storage is managed by Logging Analytics, not defined in the Source.
Which Management Agents to use (D): Agents are associated with Entities, not specified in the Source.
These elements configure log ingestion effectively.

**NEW QUESTION # 61**
Which two are use cases of Oracle Cloud Infrastructure (OCI) Events Service? (Choose two.)

- A. Migrate Events generated by OCI resources from a Source to Target services
- B. Perform configuration management for deploying, configuring, and managing servers
- C. Perform cleanup tasks when an OCI resource is terminated
- D. Process files when they are uploaded in an Object Storage bucket

**Answer: C,D**

Explanation:
The OCI Events Service enables event-driven automation by reacting to changes in OCI resources. Two valid use cases are:
Process files when they are uploaded in an Object Storage bucket (A): You can create an event rule to trigger an action (e.g., invoking an Oracle Function) when an object is created (com.oraclecloud.objectstorage.createobject). The function could process the file (e.g., image resizing).
Perform cleanup tasks when an OCI resource is terminated (B): An event rule can detect resource termination (e.g., com.oraclecloud.computeapi.terminateinstance.end) and trigger a function to clean up associated resources (e.g., delete volumes).
Why not C or D?
Migrate Events (C): Events Service doesn't "migrate" events; it triggers actions. Migration is more aligned with Service Connector Hub.
Configuration management (D): This is handled by services like Resource Manager or Ansible, not Events Service.
These use cases showcase the service's ability to automate workflows based on resource state changes.

**NEW QUESTION # 62**
Which of the following is not a key interaction element in the Log Explorer UI of Logging Analytics?

- A. Time Picker
- B. Dashboard
- C. Scope Filter
- D. Fields Panel

**Answer: B**

Explanation:
The Log Explorer UI in OCI Logging Analytics includes four key interaction elements: Fields Panel, Time Picker, Scope Filter, and Results Panel. These allow users to search, filter, and analyze logs interactively.
Dashboard (D): This is not part of the Log Explorer UI. Dashboards are separate visualizations in Logging Analytics for summarizing data, not an interactive element of the Log Explorer.
Why A, B, and C are key elements:
Fields Panel (A): Displays log fields for filtering and analysis.
Time Picker (B): Sets the time range for log queries.
Scope Filter (C): Defines the scope (e.g., compartments, log groups) of the log search.

**NEW QUESTION # 63**
In Application Performance Monitoring (APM), where is the span context information located during transfer?

- A. In the service boundaries
- B. In HTTP call
- C. In HTTP header
- D. In the browser and the microservices

**Answer: C**

Explanation:
In OCI APM, span context (e.g., Trace ID, Span ID) is propagated across services to track requests.
In HTTP header (B): Span context is embedded in HTTP headers (e.g., X-B3-TraceId) during transfer between services. This allows APM to correlate spans across distributed systems for a single user request.
Why not A, C, or D?

Service boundaries (A): This is a conceptual term, not a location for data.
HTTP call (C): Too vague-"HTTP call" isn't a specific storage location.
Browser and microservices (D): Context originates here but is transferred via headers, not stored locally during transit.
This follows the OpenTracing standard used by OCI APM.

**NEW QUESTION # 64**
......

Our 1Z0-1111-25 exam questions are famous for the good performance and stale operation. Customers usually attach great importance on the function of a product. So after a long period of research and development, our 1Z0-1111-25 learning prep has been optimized greatly. We can promise that all of your operation is totally flexible. Even if we come across much technology problems, we have never given up. Also, we take our customers' suggestions of the 1Z0-1111-25 Actual Test guide seriously. Sometimes, we will receive some good suggestions from our users. Once our researchers regard it possible to realize, we will try our best to perfect the details of the 1Z0-1111-25 learning prep. We are keeping advancing with you. You will regret if you do not choose our study materials.
