

Pdf CCAS Pass Leader | CCAS Valid Exam Review

CCAS - Final Exam Review

The exam covers material from Chapters 6-9, Word, Excel, and Access. It is 85 multiple choice questions. It will be a GOOGLE FORM. There will not be any Cengage Trainings on the Final Exam.

[TEXTBOOK](#)

UIT CH 6 COMMUNICATIONS, NETWORKS, & CYBER THREATS

1. Rules for creating passwords: never choose a real word or variations of your name, your birthdate, or those of your friends or family. Should use mix letters, numbers, and punctuation marks in an oddball sequences of no fewer than eight characters.
2. Logic bomb: "detonated" when a specific event occurs.
3. Ransomware: malwares that holds a computer, its data, or a particular function hostage until a ransom is paid.
4. Denial of service: consists of making repeated requests of a computer system or network, thereby overloading it and denying legitimate users access to it.
5. Ways a virus spreads: a rogue program that migrates through the internet or via operating systems. Can spread by sharing infecting files or sending emails with virus attachments in the email.
6. Biometrics: the science of measuring individual body characters.
7. Encryption: the process of altering readable data into unreadable form to prevent unauthorized access.
8. Benevolent hackers: Ethical hackers, white-hat hackers, are usually computer professionals who break into computer systems and networks with the knowledge of their wonders to expose security flaws that can then be fixed.
9. Benefits of networks: sharing hardware, sharing software, sharing data & information, better communication, accessing databases, centralized communication, security of information
10. Bluetooth: short-range wireless digital standard aimed at linking cellphones, PDAs, computers, and peripherals up to 33 feet apart.

UIT CH 7 PERSONAL TECHNOLOGY

11. Smartphone: advanced operating system and touch screens, more expensive, access to thousands of apps, advanced cameras, have sophisticated organizer, and gives better web browsing, search functions, and streaming media.

PDFVCE recognizes the acute stress the aspirants undergo to get trust worthy and authentic Certified Cryptoasset Anti-Financial Crime Specialist Examination (CCAS) exam study material. They carry undue pressure with the very mention of appearing in the ACAMS CCAS certification test. Here the PDFVCE come forward to prevent them from stressful experiences by providing excellent and top-rated ACAMS CCAS Practice Test questions to help them hold the ACAMS CCAS certificate with pride and honor.

ACAMS CCAS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Risk Management Programs for Cryptoasset and Blockchain: This section measures expertise of Compliance Managers and Risk Officers in developing and implementing risk management frameworks specifically for the crypto sector. It includes procedures for assessing crypto-related financial crime risks, designing controls, monitoring compliance, and adapting to emerging threats within the cryptoasset ecosystem.
Topic 2	<ul style="list-style-type: none">Cryptoasset and Blockchain: This domain targets Blockchain Analysts and Crypto Risk Managers. It focuses on understanding cryptoasset technologies, blockchain fundamentals, and their operational characteristics. Candidates learn about cryptoasset transaction flows, wallets, exchanges, smart contracts, and the challenges these present to financial crime prevention.

Topic 3	<ul style="list-style-type: none"> • AML Foundations for Cryptoasset and Blockchain: This section of the exam measures skills of Anti-Money Laundering (AML) Officers and Crypto Compliance Specialists. It covers foundational knowledge of AML principles tailored to the cryptoasset and blockchain environment, introducing the regulatory landscape, typologies of financial crime, and the evolving risks associated with cryptoassets.

CCAS Valid Exam Review & CCAS Latest Test Camp

Our company is a professional certification exam materials provider, we have occupied in the field for years, and therefore we have abundant experiences. In addition, CCAS exam torrent is high quality and accuracy, for a professional team are collecting and researching the latest information for the exam. We also pass guarantee and money back guarantee for CCAS Exam Materials, if you fail to pass the exam, we will give you full refund, and the money will be returned to your payment account. We have online and offline service, and if you have any questions for CCAS exam braindumps, you can consult us.

ACAMS Certified Cryptoasset Anti-Financial Crime Specialist Examination Sample Questions (Q92-Q97):

NEW QUESTION # 92

In considering particular virtual asset products, services, or activities, which features should be considered by management?

- A. Transaction volumes.
- B. Ability for other virtual asset service providers (VASPs) to utilize the service to provide services to their own customers.
- C. Regulatory expectations.
- D. Ability to mingle funds within wider pools.

Answer: A,B,C,D

Explanation:

Management must consider a comprehensive set of features when evaluating virtual asset products and services, including:
Ability for other VASPs to utilize the service (A): This increases risk exposure as services may be used indirectly by unknown parties.

Ability to mingle funds within wider pools (B): Mixing services or pooled wallets increase anonymity and laundering risk.

Regulatory expectations (C): Management must ensure compliance with all applicable laws and guidelines.

Transaction volumes (D): High transaction volumes can increase operational risk and require enhanced monitoring.

The DFSA AML and COB Modules, as well as FATF guidance, stress that a risk-based approach requires consideration of all these features in product/service risk assessments.

NEW QUESTION # 93

Under FATF guidelines, VASPs must file a Suspicious Transaction Report (STR) when:

- A. A politically exposed person makes a deposit
- B. The transaction involves an unhosted wallet
- C. Any transaction is over \$1,000
- D. They suspect funds are linked to criminal activity, regardless of amount

Answer: D

Explanation:

FATF Recommendation 20 mandates that STRs be filed whenever there is suspicion or reasonable grounds to suspect criminal proceeds, regardless of the transaction value. This is mirrored in DFSA and FSRA AML regulations, ensuring that the reporting obligation is triggered by suspicion, not just thresholds.

NEW QUESTION # 94

In a blockchain 51% attack, what does 51% refer to?

- A. Exchanges
- B. Wallets
- C. Governance tokens
- D. Computational power required for mining

Answer: D

Explanation:

A 51% attack refers to a situation where a single miner or group controls more than 50% of the blockchain network's computational (hashing) power. This majority control allows them to manipulate the blockchain ledger by double-spending or blocking transactions. This term is widely recognized in blockchain security contexts and is referenced in typology papers on crypto financial crime risks, including those issued by UAE authorities and FATF.

Supporting extracts:

DFSA AML thematic reviews mention the risk of manipulation and double spending in blockchains susceptible to 51% attacks.

Typology reports on cryptoasset risks highlight computational power concentration as a core vulnerability.

"51% refers to the percentage of total mining power or computational power in the network" is the standard definition across crypto AML/CFT frameworks [\[31.92._TFS_Typology_Paper_Eng_4.pdf, AMLCFT_Guidance_for_FIs.pdf\]](#) .

Thus, C is correct.

NEW QUESTION # 95

Which is a type of restricted blockchain?

- A. Hybrid
- B. Private
- C. Public
- D. Consortium

Answer: D

Explanation:

A restricted blockchain is one where participation-either in transaction validation, data access, or both-is limited to selected entities rather than being open to the public.

Consortium blockchain (D) is a common type of restricted blockchain in which multiple pre-approved organizations collectively manage the network. It offers partial decentralization but with controlled membership, making it suitable for regulated environments such as financial services, supply chain tracking, and interbank settlements.

Other options explained:

Hybrid (A): Combines elements of public and private chains, but not necessarily "restricted" in the strict governance sense.

Public (B): Open to anyone to join, read, and write data; not restricted.

Private (C): While private blockchains are also restricted, in AML/CFT guidance, "restricted blockchain" generally refers to consortium arrangements involving multiple vetted participants, rather than a single organization's closed chain.

Regulatory and technical literature in DIFC/ADGM contexts note that consortium blockchains allow for compliance controls, participant vetting, and transaction monitoring-making them particularly suitable for financial ecosystems where controlled access is essential.

NEW QUESTION # 96

Which blockchain type is accessible only to a single organization?

- A. Consortium
- B. Hybrid
- C. Private
- D. Public

Answer: C

Explanation:

Private blockchains are controlled by a single organization with full access restrictions. This model is often used for internal record-keeping but lacks the decentralized trust of public chains.

NEW QUESTION # 97

.....

Do you feel anxiety about your coming CCAS exam test? Do you want to find the valid and latest material for the CCAS actual test? PDFVCE will help you and bring you to the right direction. Firstly, CCAS free demo is allowable for you to try before you buy. Besides, we will offer you the benefits of 365 days free update. SO, even if the CCAS Actual Test is changed frequently, you do not worry about it, because our CCAS training material is updated according to the actual test and can ensure you pass.
