## ISACA COBIT-2019 PDF Questions – Best Exam Preparation Strategy

Questions of COBIT 2019 Foundation desktop practice exam software are similar to the actual COBIT-2019 exam questions. This gives you a genuine feeling of being in an COBIT-2019 exam atmosphere. This feature helps you become familiar with the COBIT-2019 real test format and improves your ability to do well on the actual COBIT-2019 exam.

ISACA COBIT-2019: COBIT 2019 Foundation exam is an important certification for anyone who is interested in improving their organization's IT governance practices. By gaining a deeper understanding of the COBIT 2019 framework, individuals can help their organizations to better align IT with business objectives, improve resource utilization, and enhance overall IT performance.

## ISACA COBIT 2019 Foundation Sample Questions (Q35-Q40):

### NEW QUESTION # 35

Which projects should be included when reporting on performance measurements related to an EGIT implementation program plan?

- A. All projects
- **B. All projects deemed appropriate by IT management**
- C. Only projects that are achieving desired results
- D. Only projects that require corrective action

**Answer: B**

Explanation:

When reporting on performance measurements related to an EGIT implementation program plan, it is important to include all projects that are deemed appropriate by IT management. This is because each project should be evaluated for its ability to provide the desired outcomes and meet the planned objectives, and only projects that have been deemed appropriate should be included in the report. For more information, please refer to the Isaca COBIT 2019 official Manual or book.

### NEW QUESTION # 36

Which of the following is a principle of a proper governance framework?

- A. It should be self-contained and not allow for the addition of new content.
- B. It should be independent of other standards, frameworks and regulations.
- **C. It should be based on a conceptual model.**

**Answer: C**

Explanation:

Explanation

A principle of a proper governance framework is that it should be based on a conceptual model. A conceptual model is "a representation of a system that uses concepts and ideas to form said representation" 8. A conceptual model helps to define the scope, purpose, structure, and content of a governance framework. It also helps to communicate the key concepts and relationships of a governance system to stakeholders. COBIT is based on a conceptual model that consists of three main components: the governance system, the governance components, and the design factors9. 8: [https://en.wikipedia.org/wiki/Conceptual\\_model](https://en.wikipedia.org/wiki/Conceptual_model) 9: COBIT 2019 Framework: Introduction and Methodology, page 26

### NEW QUESTION # 37

After IT department goals have been aligned with enterprise goals, the NEXT step is to link the alignment goals with:

- A. governance and management practices.
- B. governance and management performance metrics.
- **C. governance and management objectives.**

**Answer: C**

### NEW QUESTION # 38

Which role is responsible for managing the development, implementation, evaluation and ongoing maintenance of new and existing products and services?

- A. Business process owner
- **B. Service manager**
- C. Product manager

**Answer: B**

Explanation:

According to the COBIT 2019 Design Guide, a service manager is responsible for managing the development, implementation, evaluation and ongoing maintenance of new and existing products and services. A service manager ensures that the products and services meet the needs and expectations of the customers and stakeholders, and that they are aligned with the enterprise strategy and objectives. A service manager also monitors and reports on the performance and quality of the products and services, and initiates improvement actions when necessary. 1, p. 64 References: 1: COBIT 2019 Design Guide: Designing an Information and Technology Governance Solution

### NEW QUESTION # 39

Which of the following is based on generic components of a governance system but are tailored for a specific purpose or context within a focus area?

- A. Variant components
- B. Design factors
- C. Guiding principles

Answer: A

Explanation:

These components (of a governance system) can be either generic or "variants of generic." Generic components are described in the COBIT Core Model and apply in principle to any situation (although they "generally need customization before being practically implemented.") Whereas variants are based on the generic components but tailored for a specific purpose or context within a focus area.

### NEW QUESTION # 40
