Pdf Databricks-Certified-Data-Engineer-Associate Pass Leader - Databricks-Certified-Data-Engineer-Associate Exam Details

What's more, part of that DumpsFree Databricks-Certified-Data-Engineer-Associate dumps now are free: https://drive.google.com/open?id=1R1pRI6lmGh9fp1ShwPtFhyS7OZuYVqAS

The Databricks-Certified-Data-Engineer-Associate practice test of DumpsFree is created and updated after feedback from thousands of professionals. Additionally, we also offer up to free Databricks-Certified-Data-Engineer-Associate exam dumps updates. These free updates will help you study as per the Databricks Databricks-Certified-Data-Engineer-Associate latest examination content. Our valued customers can also download a free demo of our Databricks Databricks-Certified-Data-Engineer-Associate exam dumps before purchasing.

Another outstanding quality is that you can print out the Databricks Databricks-Certified-Data-Engineer-Associate questions. The hard copy will enable you to prepare for the Databricks Databricks-Certified-Data-Engineer-Associate exam questions comfortably. DumpsFree adds another favor to its users by ensuring them a money-back deal. The unparalleled authority of the DumpsFree lies in its mission to provide its users with the updated material of the actual Databricks Databricks-Certified-Data-Engineer-Associate Certification Exam.

Pdf Databricks-Certified-Data-Engineer-Associate Pass Leader - 100% Pass Quiz 2025 First-grade Databricks-Certified-Data-Engineer-Associate: Databricks Certified Data Engineer Associate Exam Exam Details

Stop wasting time on meaningless things. There are a lot wonderful things waiting for you to do. You still have the opportunities to become successful and wealthy. The Databricks-Certified-Data-Engineer-Associate study materials is a kind of intelligent learning assistant, which is capable of aiding you pass the Databricks-Certified-Data-Engineer-Associate Exam easily. As long as you have the passion to become matter and take a challenge, you will find that our Databricks-Certified-Data-Engineer-Associate practice engine can lead you to a bighter future.

Databricks Certified Data Engineer Associate Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which of the following data workloads will utilize a Gold table as its source?

- A. A job that enriches data by parsing its timestamps into a human-readable format
- B. A job that ingests raw data from a streaming source into the Lakehouse
- C. A job that cleans data by removing malformatted records
- D. A job that queries aggregated data designed to feed into a dashboard

- E. A job that aggregates uncleaned data to create standard summary statistics

Answer: D

NEW QUESTION # 27

A data engineer has three tables in a Delta Live Tables (DLT) pipeline. They have configured the pipeline to drop invalid records at each table. They notice that some data is being dropped due to quality concerns at some point in the DLT pipeline. They would like to determine at which table in their pipeline the data is being dropped.

Which of the following approaches can the data engineer take to identify the table that is dropping the records?

- A. They cannot determine which table is dropping the records.
- B. They can navigate to the DLT pipeline page, click on each table, and view the data quality statistics.
- C. They can set up separate expectations for each table when developing their DLT pipeline.
- D. They can navigate to the DLT pipeline page, click on the "Error" button, and review the present errors.
- E. They can set up DLT to notify them via email when records are dropped.

Answer: D

NEW QUESTION # 28

A data engineer is attempting to drop a Spark SQL table my_table. The data engineer wants to delete all table metadata and data.
They run the following command:
DROP TABLE IF EXISTS my_table
While the object no longer appears when they run SHOW TABLES, the data files still exist.
Which of the following describes why the data files still exist and the metadata files were deleted?

- A. The table was external
- B. The table was managed
- C. The table's data was larger than 10 GB
- D. The table did not have a location
- E. The table's data was smaller than 10 GB

Answer: A

Explanation:
Explanation
The reason why the data files still exist while the metadata files were deleted is because the table was external.
When a table is external in Spark SQL (or in other database systems), it means that the table metadata (such as schema information and table structure) is managed externally, and Spark SQL assumes that the data is managed and maintained outside of the system. Therefore, when you execute a DROP TABLE statement for an external table, it removes only the table metadata from the catalog, leaving the data files intact. On the other hand, for managed tables (option E), Spark SQL manages both the metadata and the data files. When you drop a managed table, it deletes both the metadata and the associated data files, resulting in a complete removal of the table.

NEW QUESTION # 29

A data engineer needs to create a table in Databricks using data from their organization's existing SQLite database.
They run the following command:

```
CREATE TABLE jdbc_customer360
USING _____        databricks
OPTIONS (
  url "jdbc:sqlite:/customers.db",
  dbtable "customer360"
)
```

Which of the following lines of code fills in the above blank to successfully complete the task?

- A. org.apache.spark.sql.jdbc
- B. org.apache.spark.sql.sqlite
- C. sqlite

- D. DELTA
- E. autoloader

Answer: B

NEW QUESTION # 30

A data engineer and data analyst are working together on a data pipeline. The data engineer is working on the raw, bronze, and silver layers of the pipeline using Python, and the data analyst is working on the gold layer of the pipeline using SQL. The raw source of the pipeline is a streaming input. They now want to migrate their pipeline to use Delta Live Tables.
Which of the following changes will need to be made to the pipeline when migrating to Delta Live Tables?

- A. The pipeline will need to be written entirely in Python
- B. The pipeline will need to be written entirely in SQL
- C. The pipeline will need to stop using the medallion-based multi-hop architecture
- D. None of these changes will need to be made
- E. The pipeline will need to use a batch source in place of a streaming source

Answer: D

Explanation:
Delta Live Tables is a declarative framework for building reliable, maintainable, and testable data processing pipelines. You define the transformations to perform on your data and Delta Live Tables manages task orchestration, cluster management, monitoring, data quality, and error handling. Delta Live Tables supports both SQL and Python as the languages for defining your datasets and expectations. Delta Live Tables also supports both streaming and batch sources, and can handle both append-only and upsert data patterns. Delta Live Tables follows the medallion lakehouse architecture, which consists of three layers of data: bronze, silver, and gold. Therefore, migrating to Delta Live Tables does not require any of the changes listed in the options B, C, D, or E. The data engineer and data analyst can use the same languages, sources, and architecture as before, and simply declare their datasets and expectations using Delta Live Tables syntax. References:
* What is Delta Live Tables?
* Transform data with Delta Live Tables
* What is the medallion lakehouse architecture?

NEW QUESTION # 31
