Generally, the system will send the FCP_FMG_AD-7.4 Certification material to your mailbox within 10 minutes. If you don't receive it please contact our after-sale service timely.

Fortinet FCP_FMG_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.

Topic 2	• Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).
Topic 3	• Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.
Topic 4	• Troubleshooting: This section covers how to fimiliarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.
Topic 5	• Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38
An administrator created a new global policy package that includes header and footer policies and then assigned it to an ADOM. What are two outcomes of this action? (Choose two.)

- A. You can edit or delete all the global objects in the global ADOM.
- B. After you assign the global policy package to an ADOM. the impacted policy packages become hidden in that ADOM.
- C. To assign another global policy package later to the same ADOM. you must unassign this policy first.
- D. You must manually move the header and footer policies after the policy assignment.

Answer: A,C

Explanation:
* Option A: To assign another global policy package later to the same ADOM, you must unassign this policy first.This is correct. FortiManager does not allow multiple global policy packages to be assigned to a single ADOM simultaneously. If you want to assign a different global policy package, the existing one must be unassigned first.
* Option C: You can edit or delete all the global objects in the global ADOM.This is correct. Once a global policy package is assigned, you have the flexibility to edit or delete global objects in the global ADOM, affecting all ADOMs to which this package is assigned.
Explanation of Incorrect Options:
* Option B: After you assign the global policy package to an ADOM, the impacted policy packages become hidden in that ADOMis incorrect because the policy packages do not become hidden; they are modified according to the global policies.
* Option D: You must manually move the header and footer policies after the policy assignmentis incorrect because header and footer policies are automatically applied when assigned.
FortiManager References:
* See the "Global Policy and ADOM Management" section in the FortiManager Administration Guide.

NEW QUESTION # 39
Which two statements about Security Fabric integration with FortiManager are true? (Choose two.)

- A. The Security Fabric settings are part of the device-level settings.
- B. The Security Fabric license, group name, and password are required for the FortiManager Security Fabric integration.
- C. The Fabric View module enables you to generate the Security Fabric ratings for Security Fabric devices.
- D. The Fabric View module enables you to view the Security Fabric ratings for Security Fabric devices.

Answer: A,D

NEW QUESTION # 40
Refer to the exhibit. Which statement about the environment shown in the exhibit is correct?

- A. FortiAnalyzer features are not enabled on this FortiManager device.
- B. A failover will take place after five minutes without receiving heartbeat packets.
- C. You must restart the secondary unit if you promote it to become the primary.
- D. No FortiGuard packages have been synchronized between the cluster members yet.

Answer: A

Explanation:
If FortiAnalyzer features are enabled, you cannot add FortiAnalyzer to FortiManager. You will also not be able to configure FortiManager high availability (HA).

NEW QUESTION # 41
When using the FortiManager JSON API, what is the purpose of the session ID received after successful authentication?

- A. It contains information about the HTTP request method used.
- B. It is used to identify the FortiManager metadata on the client.
- C. It includes a hash to check the integrity of the JSON response sent by FortiManager.
- D. It serves as an authentication token for subsequent API requests.
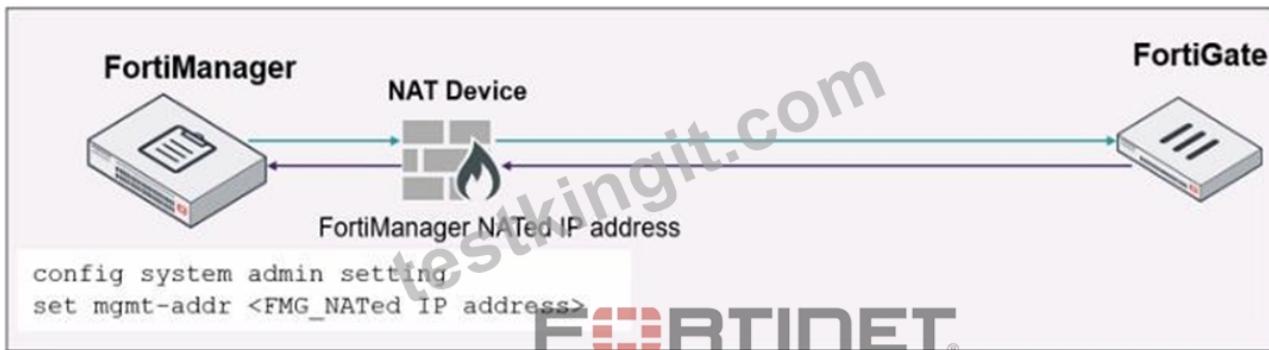

Answer: D

Explanation:
The session ID is used to authenticate the client for further requests, ensuring that subsequent API calls are made by an authenticated user.

NEW QUESTION # 42
Refer to the exhibit.

An administrator is about to add the FortiGate device to FortiManager using the discovery process.
FortiManager is operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.
What is the expected result?

- A. During discovery, FortiManager sets both the FortiManager NATed IP address and NAT device IP address on FortiGate.
- B. During discovery. FortiManager sets the NATed device IP address on FortiGate.
- C. During discovery, FortiManager sets the FortiManager NATed IP address on FortiGate.
- D. During discovery. FortiManager uses only the FortiGate serial number to establish the connection.

Answer: C

Explanation:
When adding a FortiGate device to FortiManager that is operating behind a NAT device, and the FortiManager NATed IP address is configured under the system administration settings, FortiManager will set the FortiManager NATed IP address on the FortiGate device during the discovery process. This ensures that the FortiGate knows how to reach the FortiManager through the NAT device.
Options A, B, and C are incorrect because:
* A is incorrect because the discovery process also requires knowing the NATed IP to establish a connection, not just the serial number.
* B is incorrect because FortiManager does not set the NAT device's IP address on the FortiGate.
* C is incorrect because it implies that the NAT device IP is set on FortiGate, which is not the expected outcome.
FortiManager References:
* Refer to FortiManager 7.4 Administrator Guide: Device Discovery and Management with NAT.

NEW QUESTION # 43

......

Our company have the higher class operation system than other companies, so we can assure you that you can start to prepare for the FCP_FMG_AD-7.4 exam with our study materials in the shortest time. In addition, if you decide to buy FCP_FMG_AD-7.4 exam materials from our company, we can make sure that your benefits will far exceed the costs of you. The rate of return will be very obvious for you. We sincerely reassure all people on the FCP_FMG_AD-7.4 Test Question from our company and enjoy the benefits that our study materials bring. We believe that our study materials will have the ability to help all people pass their FCP_FMG_AD-7.4 exam and get the related exam in the near future.
