And higher chance of desirable salary and managers' recognition, as well as promotion will not be just dreams.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q262-Q267):

NEW QUESTION # 262

What is one way to understand WIP in a system?

- A. Pair to complete the work faster
- B. Size stories smaller
- C. Split stories
- D. Make current work visible

Answer: D

Explanation:

WIP stands for work in process, which is the amount of work that is currently being done in a system. One way to understand WIP is to make it visible to all stakeholders, using tools such as Kanban boards, cumulative flow diagrams, or burn-up charts. By making WIP visible, we can see the current state of the work, identify bottlenecks, limit WIP to match capacity, and improve flow efficiency.

References: Principle

#6 - Visualize and limit WIP, reduce batch sizes, and manage queue lengths, Make Value Flow without Interruptions, SAFe Principle 6: Visualise and limit WIP, reduce batch sizes, and manage queued lengths

NEW QUESTION # 263

What is found on an ART planning board?

- A. Tasks
- B. User stories
- C. Features
- D. Epics

Answer: C

Explanation:

According to the Scaled Agile Framework, the ART Planning Board is a visualization of the PI's feature delivery dates, feature dependencies among teams, and relevant milestones¹. Features are the primary elements that are planned and tracked on the ART Planning Board².

Epics, user stories, and tasks are not found on the ART Planning Board, but they are related to features in different ways. Epics are large initiatives that span multiple ARTs and PIs, and they are decomposed into features and enablers². User stories and tasks are smaller units of work that are used by teams to implement features within iterations².

NEW QUESTION # 264

Uncommitted objectives don't count in velocity/capacity.

- A. TRUE
- B. FALSE

Answer: B

NEW QUESTION # 265

What is at the roof of the House of Lean?

- A. Value
- B. Relentless Improvement
- C. Leadership
- D. Innovation

Answer: A

NEW QUESTION # 266

What is used to capture the current state of the Portfolio and provide input for defining the future state?

- A. Portfolio Canvas
- B. Portfolio Backlog

- C. Portfolio Kanban
- D. Portfolio Vision

Answer: A

Explanation:

The Portfolio Canvas is a tool that defines the current state of the portfolio, as well as the future state vision, using the Business Model Canvas template¹. It describes the development value streams, the solutions they deliver, the customers they serve, the budget allocated to each value stream, and other vital activities and events required to achieve the portfolio vision². The Portfolio Canvas is used to capture and analyze the current state of the portfolio, as well as to generate and evaluate multiple future state scenarios, based on the SWOT and TOWS analysis². The Portfolio Canvas provides input for defining the future state vision and the portfolio backlog². References: Business Model Canvas, Portfolio Vision
