PDII exam materials contain all the questions and answers to pass PDII exam on first try. The Questions & answers are verified and selected by professionals in the field and ensure accuracy and efficiency throughout the whole Product. You will not need to collect additional questions and answers from any other source because this package contains every detail that you need to Pass PDII Exam.

Salesforce PDII certification is recognized as a valuable credential in the Salesforce community. It is a testament to a developer's expertise in building complex solutions on the Salesforce platform. Having this certification can enhance a developer's career opportunities and increase their earning potential.

Salesforce PDII (Salesforce Certified Platform Developer II) is an advanced certification for Salesforce developers who want to demonstrate their expertise in building complex business logic and interfaces using the Salesforce platform. Salesforce Certified Platform Developer II (PDII) certification assesses a developer's knowledge and skills in developing custom applications on the Salesforce platform, including Apex, Visualforce, and Lightning Components. The PDII Certification is designed for experienced developers who have a deep understanding of Salesforce's platform capabilities and are capable of designing and implementing complex solutions to meet specific business requirements.

Salesforce PDII Exam Dumps Fastest Way Of Preparation 2025

Being anxious for the exam ahead of you? Have a look of our PDII training engine please. Presiding over the line of our PDII practice materials over ten years, our experts are proficient as elites who made our PDII learning questions, and it is their job to officiate the routines of offering help for you. And i can say no people can know the PDII exam braindumps better than them since they are the most professional.

Salesforce Certified Platform Developer II (PDII) Sample Questions (Q189-Q194):

NEW QUESTION # 189

An Apex trigger creates an order co record every time an Opportunity is won by a Sales Rep. Recently the trigger is creating two orders.

What is the optimal technique for 2 developer to troubleshoot this?

- A. Set up debug logging for every Sales Rep, then monitor the logs for errors and exceptions,
- B. Disable all flows, and then re-enable them one at a time to see which one causes the error.
- C. Add `system.debug()` statements to the code and use the Developer Console logs to trace the code.
- D. Run the Apex Test Classes for the Apex trigger to ensure the code still has sufficient code coverage.

Answer: C

Explanation:

To troubleshoot the issue of a trigger creating two order records, adding `System.debug()` statements in the trigger and analyzing the log output in the Developer Console is an effective technique. This will help identify if the trigger is being called more than once or if there is another automation (such as a flow or workflow) causing the additional record creation.

References: Salesforce Developer Guide - Debugging

NEW QUESTION # 190

A developer has been asked to create code that will meet the following requirements: Receives input of: Map<Id, Project__c>, List<Account> Performs a potentially long-running callout to an outside web service Provides a way to confirm that the process executed successfully Which asynchronous feature should be used?

- A. Schedulable interface
- B. Database.AllowsCallouts interface
- C. `@future (callout=true)`
- D. Queueable interface

Answer: D

NEW QUESTION # 191

Universal Containers wants to use a Customer Community with Customer Community Plus licenses to allow their customers access to track how many containers they have rented and when they are due back. Universal Containers uses a Private sharing model for External users, Many of their customers are multi-national corporations with complex Account hierarchies. Each account on the hierarchy represents a department within the same business, One of the requirements is to allow certain community users within the same Account hierarchy to see several departments' containers, based on a custom junction object that relates the Contact to the various Account records that represent the departments.

Which solution solves these requirements?

- A. A custom list view on the junction object with filters that will show the proper records based on owner
- B. An Apex trigger that creates Apex managed sharing records based on the junction object's relationships
- C. A Visualforce page that uses a custom controller that specifies without sharing [0 expose the records
- D. A Lightning web component on the Community Home Page that uses Lightning Data Services.

Answer: B

Explanation:

For community users within the same Account hierarchy to see records based on a custom junction object, Apex managed sharing

can be used. An Apex trigger can create sharing records based on the junction object relationships, allowing users to see records from different departments as required. References: Apex Developer Guide - Sharing a Record Using Apex

NEW QUESTION # 192

A company wants to incorporate a third-party web service to set the Address fields when an Account is inserted, if they have not already been set.

What is the optimal way to achieve this?

- A. Create a Process, call an Apex `@future(callout=true)` method from it, and make the callout from that Apex method.
- B. Create a Process, call an Apex `@InvocableMethod` from it, and make the callout from that Apex method.
- **C. Create an after insert trigger, call an `@future(callout=true)` method from it, and make the callout from that Apex method.**
- D. Create an after insert trigger, call an Apex `@InvocableMethod` method from it, and make the callout from that Apex method.

Answer: C

NEW QUESTION # 193

An org has an existing process, built using Process Builder, on Opportunity that sets a custom field, `commissionBaseAmount_c`, when an Opportunity is edited and the Opportunity's Amount changes.

A developer recently deployed an Opportunity before update trigger that use the `commissionBaseAmount_c`, and complex logic to calculate a value for a custom field, `CommissionAmount_c`, when an Opportunity stage changes to Closed/Won.

Users report that when they change the Opportunity stage changes to Closed/Won and also change the Amount during the same save, the `commission_c` is incorrect.

Which action should the developer take to correct this problem?

- A. Call the process from the trigger.
- **B. Replace the process with a fast field Update record-trigger flow.**
- C. Call the trigger from the process.

Answer: B

NEW QUESTION # 194

.....
