Free PDF PEGACPLSA23V1 Latest Exam Pattern & Leading Offer in Qualification Exams & Authorized Reliable PEGACPLSA23V1 Test Sample

Under the tremendous stress of fast pace in modern life, this version of our PEGACPLSA23V1 test prep suits office workers perfectly. It can match your office software and as well as help you spare time practicing the PEGACPLSA23V1 exam. As for its shining points, the PDF version can be readily downloaded and printed out so as to be read by you. It's really a convenient way for those who are fond of paper learning. With this kind of version, you can flip through the pages at liberty and quickly finish the check-up PEGACPLSA23V1 Test Prep. What's more, a sticky note can be used on your paper materials, which help your further understanding the knowledge and review what you have grasped from the notes.

Pegasystems PEGACPLSA23V1 Exam Syllabus Topics:

Topic	Details

Topic 1	• Data Model Design: Understand how data relationships work. Build new data models or extend existing ones. Use data pages and virtualization to manage information. Design reusable and reliable data structures. Learn dynamic class referencing and polymorphism. Extend and benefit from Pega's industry foundation models.
Topic 2	• Application Design Extended: Manage work assignment and routing, and use features like Get Next Work. Explore different ways to allocate tasks. Handle mid-case flow changes and fix issues using problem flows. Implement background processing, job schedulers, queue processors, and asynchronous integrations. Understand how to use stream services, data flows, and datasets in Pega Infinity.
Topic 3	• Security Design:Choose the right authentication and access models based on the situation. Configure access groups, roles, and role hierarchies. Understand rule-level security. Spot and prevent security threats. Apply best practices to secure applications and use event logging for monitoring.
Topic 4	• Reporting Design: Create reports that meet business needs and support performance. Troubleshoot reporting issues. Write queries, use SQL functions, and combine data through joins, subreports, and associations.
Topic 5	• Pega Platform Design: Understand the value of Center-out architecture in building scalable Pega solutions. Explore how deployment options influence app design, and apply performance monitoring. Work with distributed case designs and know when to include other Pega tools. Learn about multi-tenant systems, high availability, and features like Pega Mobile, IVA, and Process Fabric. Gain insight into containerization, Hazelcast, and cloud architecture. Understand Agile Workbench and Agile Studio tools.
Topic 6	• Application Design:Learn how Microjourneys guide app design. Understand case structure, Pega Express methods, and best practices. Create case hierarchies, and use rulesets, classes, and specialisation wisely. Apply layered design for scalable solutions.
Topic 7	• Deployment and Testing Design: Follow best practices for production deployment. Plan and build CI • CD pipelines. Design testing strategies and use automation to maintain quality. Track and assess release performance effectively.

Pegasystems Certified Pega Lead System Architecture (LSA) Exam 23 Sample Questions (Q38-Q43):

NEW QUESTION # 38
The XYZ organization plans to adopt DevOps practices to automate its deployment process.
What are three questions to ask to help you evaluate their current situation? (Choose Three)

- A. What are all the ways through which change is introduced to production? (Rule changes, code changes, platform upgrades, schema, and runtime configuration.).
- B. How much of the code base has automated test coverage? How often are those tests run?
- C. How much of the code base has regression test coverage?
- D. What parts of the change migration process are the most frequent, time-consuming, or error-prone?

Answer: A,B,D

NEW QUESTION # 39
A developer has set the Rule security mode on the access group to Deny. Select the reason for this setting.

- A. Deny access to a rule if the privilege of the user is not defined in an Access of Role to Object.
- B. Disable standard privileges providing administrator access to the application (for example AllFlows and AllFllowActions).
- C. Ensure that all rules with the option of specifying a privilege have a privilege. Only users with the privilege can execute the rules.
- D. Require Access of Role to Object rules be specified for each layer in the class hierarchy and not inherited from parent classes.

Answer: C

NEW QUESTION # 40
An attribute-based access control configuration evaluate the attributes of the operator creating the case. A data page contains the value used in the evaluation.

- A. Use the data page as a the policy condition column source in the access control policy condition
- B. Use the data page as a restriction method in the access control policy.
- C. Use the data page as a the policy condition value in the access control policy condition
- D. Use the data page as a the permit access if the value in the access control policy

Answer: C

NEW QUESTION # 41
When specializing a case using class inheritance, which two of the following options are correct?
(Choose Two)

- A. Use pattern inheritance for case specialization within an application.
- B. Use direct inheritance for case specialization across applications.
- C. Use pattern inheritance for case specialization across applications.
- D. Use direct inheritance for case specialization within an application.

Answer: A,B

NEW QUESTION # 42
What two recommendations do you provide to the development team to ensure the performance of the Pega application does not degrade over time? (Choose Two)

- A. Purge workparty UUI index tables periodically.
- B. Schedule scripts to maintain frequently fragmented tables.
- C. Add indexes to all columns.
- D. Purge and/or archive records based on the company's record retention policy.

Answer: B,D

NEW QUESTION # 43
......
