

Pegasystems PEGACPRSA22V1 High Quality & Guaranteed PEGACPRSA22V1 Success

You should prepare with PassExamDumps PEGACPRSA22V1 Questions that are in compliance with PEGACPRSA22V1 exam content. More than 90,000 professionals worldwide have provided their feedback, helping create and launch PEGACPRSA22V1 questions in the market. So, if you're determined to pass the Pegasystems exam and achieve PEGACPRSA22V1 Certification to accelerate your career, it's time to build your knowledge and skills. You can try the demo version of Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) practice dumps before payment.

Pegasystems PEGACPRSA22V1 (Certified Pega Robotics System Architect 22) Exam is a certification exam designed for professionals who are interested in building and developing robotic process automation (RPA) solutions using Pega's Robotic Automation Studio. PEGACPRSA22V1 Exam is an excellent opportunity for individuals who want to prove their skills and expertise in using Pega's RPA technology to solve business problems.

2025 100% Free PEGACPRSA22V1 –Efficient 100% Free High Quality | Guaranteed PEGACPRSA22V1 Success

Practicing for an Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam is one of the best ways to ensure success. It helps students become familiar with the format of the actual PEGACPRSA22V1 practice test. It also helps to identify areas where more focus and attention are needed. Furthermore, it can help reduce the anxiety and stress associated with taking an Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam as it allows students to gain confidence in their knowledge and skills.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q58-Q63):

NEW QUESTION # 58

An Insurance Call Center project requires the use of the Interaction Framework. The supporting applications should perform specific work when processing claims. The claim requires the claim number and the claim date, but it may also share other claim

information in the interaction's context values.

Based on the information, which interaction.xml activity entry configures the project requirements?

```
<Activity Name="ProcessClaim"
  <Value Name="ClaimNum" Type="String"/>
  <Value Name="ClaimDate" Type="String"/>
</Activity>
```

```
<Activity Name="ProcessClaim"> </Activity>
  <Value Name="ClaimNum" Type="String"/>
  <Value Name="ClaimDate" Type="String"/>
```

C

```
<Activity Name="ProcessClaim">
  <Value Name="ClaimNum" Type="String" />
</Activity>
<Activity Name="ProcessClaim">
  <Value Name="ClaimDate" Type="String" />
</Activity>
```

D

```
<Activity Name="ProcessClaim">
  <Value Name="ClaimNum" Type="String"/>
  <Value Name="ClaimDate" Type="String"/>
</Activity>
```

- A. Exhibit C
- B. Exhibit A
- **C. Exhibit D**
- D. Exhibit B

Answer: C

NEW QUESTION # 59

When performing application discovery, it is important that you _____ and _____ . (Choose two.)

- **A. utilize test methods to validate that you can interact with representatives of the controls in the use case**
- B. interrogate all controls required for the use case
- C. interrogate 100 percent of the controls in the application
- **D. write automations to accomplish the basic search functionality of the application**

Answer: A,D

NEW QUESTION # 60

Using the values from the data page definition, the value FETCH_SCORE is configured for which robot activity property in Pega Robot Studio?

Source	Robotic automation name	Timeout	Request data transform	Response data transform	Parameters
Robotic desktop automation	FETCH_SCORE	5	Request	RDAResponse	

- A. ActivityName
- B. (Name)
- C. FullName
- D. UniqueID

Answer: A

Explanation:

In Pega Robot Studio, a Robot Activity serves as the link between a robotic automation (built in Pega Robot Studio) and the Pega Platform. This link allows a Pega case or data page to invoke robotic automations through the Robotic Desktop Automation (RDA) integration.

The Data Sources configuration in Pega Platform, as shown in the screenshot, defines the connection between a data page and a robotic automation. The field labeled "Robotic automation name" directly corresponds to the ActivityName property in the Robot Studio's activity definition.

From the Pega Robotics System Design and Implementation Guide, section "Configuring Robot Activities and Integrating with Pega Platform":

"Each robotic activity exposed to Pega Platform must have its ActivityName property defined in Robot Studio.

The ActivityName identifies the automation when it is invoked from Pega Platform through Robotic Desktop Automation (RDA) or Robotic Process Automation (RPA).

The name entered in the Pega Platform's data page configuration (for example, FETCH_SCORE) must match exactly the ActivityName defined in the Robot Studio activity." Detailed Reasoning:

* The screenshot shows a Data Page Source configuration where:

* Source = Robotic desktop automation

* Robotic automation name = FETCH_SCORE

* Timeout = 5 seconds

* Request Data Transform = Request

* Response Data Transform = RDAResponse

* The Robotic automation name (FETCH_SCORE) identifies which Robot Studio activity should execute when the Pega Platform requests the data.

* In Robot Studio, this is mapped to the ActivityName property of the automation's activity component, ensuring a direct call mapping between Pega and Robot Studio.

Option Analysis:

* A. ActivityName: Correct - this is the property used to link the automation in Pega Platform to the robotic activity in Robot Studio.

* B. FullName: Incorrect - FullName refers to the namespace or project structure reference, not the callable identifier.

* C. (Name): Incorrect - This refers to the internal object label, not the platform reference name.

* D. UniqueID: Incorrect - This is an internal system identifier used by Robot Studio for distinguishing components, not for integration with Pega Platform.

Therefore, the correct answer is A. ActivityName.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Robot Activity Configuration and Pega Platform Integration (RDA/RPA) section (Pega Robotics 19.1 and later).

NEW QUESTION # 61

Lines in the RuntimeLog containing the text "ExecutionLink From:" refer specifically to what item from your solution?

- A. Yellow execution lines
- B. Automation entry points
- C. Blue data lines
- D. Automation execution threads

Answer: A

Explanation:

References:

NEW QUESTION # 62

You are debugging a script component for your project. When the automation executes your script, the intended result does not occur. You suspect that one or more variables within your script are not being set to the proper value. Your version of Pega Robot Studio does not support the use of breakpoints within the script designer.

In what two ways can you debug the script? (Choose two.)

- A. Add a breakpoint before calling the script so that you can assign a watch for the variable(s) used within the script.
- B. Modify the script so that the variable values are returned in the automation.
- C. Enable Runtime logging and enter a diagnostic message to log the variable values during script execution.
- D. Check with the Support team to upgrade Robotic Automation Studio to the version which contains script debugging.

Answer: C,D

NEW QUESTION # 63

.....

Everybody knows that Pegasystems is an influential company with high-end products and best-quality service. It will be a long and tough way to pass PEGACPRSA22V1 exam test, especially for people who have no time to prepare the PEGACPRSA22V1 Questions and answers. So choosing right PEGACPRSA22V1 dumps torrent is very necessary and important for people who want to pass test at first attempt.
