Unlike the traditional way of learning, the great

benefit of our PEGACPSA24V1 learning material is that users can flexibly adjust their learning plans. We hope that our new design of PEGACPSA24V1 test questions will make the user's learning more interesting and colorful.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q140-Q145):

NEW QUESTION # 140

How does Pega handle potential duplicate cases when a match is found?

- **A. The system notifies the user to take action**
- B. The system automatically deletes the duplicate case
- C. The system marks both cases as resolved
- D. The duplicate case is merged with the existing case

Answer: A

Explanation:

When a potential duplicate case is detected, Pega notifies the user to take action. The user can review and decide whether to proceed, merge, or close the duplicate. This prevents unintentional duplicate processing while maintaining data integrity. Automatic deletion is not performed to avoid data loss.

NEW QUESTION # 141

Which feature allows dynamically adding and removing rows in a Repeat Grid?

- A. Case Status Tracker
- B. SLA Goal Timer
- **C. Editable Mode**
- D. Work Queue Mapping

Answer: C

Explanation:

Enabling Editable Mode in a Repeat Grid allows users to add, modify, and delete rows dynamically. This feature is useful for line items in invoices, address lists, and form-based data entry. SLA goal timers and work queue mappings do not control grid row updates.

NEW QUESTION # 142

Which Pega feature allows retrieving real-time data from an API when a user interacts with a UI control?

- **A. Data Page with Refresh Strategy**
- B. Case Dependency
- C. Work Queue Processing
- D. SLA Escalation

Answer: A

Explanation:

A Data Page with a Refresh Strategy ensures that UI elements fetch real-time data from an external API.

This is used in dropdown lists, live search, and auto-suggest fields to provide updated selections. It prevents users from selecting outdated or incorrect data. Proper refresh logic ensures accuracy and better user experience.

NEW QUESTION # 143

Which Pega rule type allows users to define if-else logic for workflow decisions?

- **A. Decision Tree**
- B. SLA Reassignment
- C. Work Queue Processing

- D. Case Type Rule

Answer: A

Explanation:

A Decision Tree evaluates multiple if-else conditions in a structured manner to determine a workflow decision. It is used for complex rule evaluations such as loan approvals, medical diagnoses, and fraud detection. Decision Trees reduce manual decision-making efforts. They improve efficiency in automated workflows.

NEW QUESTION # 144

Which component ensures that multiple values from a Data Page are displayed in the UI?

- A. Work Queue
- **B. Repeat Grid**
- C. Case Status
- D. SLA Timer

Answer: B

Explanation:

A Repeat Grid displays multiple records dynamically from a Data Page or system of record. This is useful for customer lists, transaction histories, and product catalogs. It ensures that users can view, filter, and interact with structured data efficiently. This improves case visibility and decision-making in business processes.

NEW QUESTION # 145

.....

ActualTestsIT PEGACPSA24V1 exam dumps in three different formats has PEGACPSA24V1 questions PDF and the facility of Pegasystems PEGACPSA24V1 dumps. We have made these Pegasystems PEGACPSA24V1 questions after counseling a lot of experts and getting their feedback. The 24/7 customer support team is available at ActualTestsIT for Pegasystems PEGACPSA24V1 Dumps users so that they don't get stuck in any hitch.
