## Peoplecert Certified Agile Service Manager V2.1 Sample Questions (Q15-Q20):

### NEW QUESTION # 15

Which is NOT one of the underlying principles of the Agile Manifesto?

- A. Simplicity-the art of maximizing the amount of work not done-is essential
- B. Deliver working software daily**
- C. The highest priority is to satisfy the customer
- D. Working software is the primary measure of progress

**Answer: B**

Explanation:

The Agile Manifesto outlines 12 principles, and while delivering value frequently is one of them, "delivering working software daily" is not explicitly stated. Let's evaluate the options:

A . Correct. The Agile Manifesto states that "working software is the primary measure of progress." B . Incorrect. The principle states, "Deliver working software frequently, from a couple of weeks to a couple of months," but it does not specify daily delivery. This makes "daily" incorrect.

C . Correct. Satisfying the customer through early and continuous delivery is the highest priority in Agile.

D . Correct. Simplicity, or minimizing unnecessary work, is one of the core principles in Agile.

Principle 3: "Deliver working software frequently..."

Principle 10: "Simplicity-the art of maximizing the amount of work not done-is essential."

### NEW QUESTION # 16

Which is the BEST description of toil?

- A. Work that is manual, repetitive, and devoid of enduring value**
- B. Work that takes a long time to complete
- C. Work that is exhausting

- D. Work that is complex and difficult to do manually

**Answer: A**

Explanation:

In Agile and DevOps, toil refers to manual, repetitive work that adds no lasting value to the product or service, consuming time and effort that could be better spent on high-value activities.

- A . Incorrect. Toil is not necessarily complex; it is often simple but repetitive.
- B . Incorrect. Toil may or may not take a long time; its defining trait is the lack of enduring value.
- C . Correct. This definition captures toil's repetitive, manual nature and its inability to create value.
- D . Incorrect. While toil can be exhausting, this description doesn't encompass its lack of value.

Agile principles: Focus on value-added activities.

**NEW QUESTION # 17**

How does the Agile Service Manager serve the Team?

- A. All of the above
- B. Ensuring the Team is customer-focused
- C. Writing clear user stories
- D. **Removing impediments to their progress**

**Answer: D**

Explanation:

The Agile Service Manager primarily serves the team by removing impediments that block progress and ensuring smooth delivery.

Let's assess the options:

- A . Incorrect. While customer focus is important, this responsibility lies with the Product Owner or similar roles, not primarily the Agile Service Manager.
- B . Incorrect. Writing user stories is a responsibility of the Product Owner or team members, not the Agile Service Manager.
- C . Correct. The Agile Service Manager supports the team by identifying and eliminating obstacles to ensure their progress and efficiency.
- D . Incorrect. While some aspects are relevant, only C accurately reflects the primary role of an Agile Service Manager.

Scrum Guide 2020: Role of the Scrum Master in removing impediments.

**NEW QUESTION # 18**

What is the starting point when designing an Agile process?

- A. Understand the practice's vision and goal
- B. **Understand who your customers are and what they value**
- C. Understand the service management architecture
- D. Getting the right stakeholders engaged

**Answer: B**

Explanation:

Designing an Agile process begins with understanding customer needs and value to ensure that processes align with delivering that value efficiently.

- A . Incorrect. While understanding the vision and goal is important, focusing on customer value takes precedence in Agile.
- B . Correct. Agile emphasizes delivering value to customers, making this the critical starting point for process design.
- C . Incorrect. Engaging stakeholders is essential but follows after understanding customer needs.
- D . Incorrect. Understanding architecture comes later in the design process, after defining customer-centric objectives.

Reference:

Agile Manifesto: Customer collaboration over contract negotiation.

ITIL 4: Service design principles.

## NEW QUESTION # 19

Which of the following is a benefit of Agile Service Management?

- A. All of the above
- B. Improve the velocity of process improvement teams
- C. Overcome constraints in process workflows
- D. Meet customer requirements faster and more accurately

**Answer: A**

Explanation:

Agile Service Management delivers numerous benefits by combining Agile principles with service management.

- A . Correct. Agile Service Management overcomes workflow constraints by improving flexibility and adaptability.
- B . Correct. Agile ensures faster delivery of services that meet customer needs.
- C . Correct. Agile fosters incremental improvements, increasing the velocity of process improvement teams.
- D . Correct. All of the above are true benefits of Agile Service Management.
