

# Peoplecert DevOps-Foundation Valid Test Format - DevOps-Foundation Exam Fee

DOWNLOAD the newest Itcertmaster DevOps-Foundation PDF dumps from Cloud Storage for free:  
<https://drive.google.com/open?id=11e5Y9xGNYMR1ZJUOJHB7sUHguqwOllw3>

Now you have all the necessary information about quick PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam questions preparation. Just take the best decision of your career and enroll in the PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam. Download the Itcertmaster PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam real dumps now and start this career advancement journey.

After continuous improvement for years, DevOps-Foundation test questions have built a complete set of quality service system. First of all, DevOps-Foundation test torrent is compiled by experts and approved by experienced professionals. This allows our data to make you more focused on preparation. At the same time, DevOps-Foundation latest torrents provide a free download trial of the PDF version, so that you can understand our products in advance. And according to your needs, you can make the most correct purchase decision without regretting. If there is an update, our system will be automatically sent to you. Secondly, you don't need to worry about any after-sales issues when purchasing DevOps-Foundation Test Torrent.

## Peoplecert DevOps-Foundation Exam Fee - Latest DevOps-Foundation Test Materials

Many people want to find the fast way to get the DevOps-Foundation test pdf for immediately study. Here, DevOps-Foundation technical training can satisfy your needs. You will receive your DevOps-Foundation exam dumps in about 5-10 minutes after purchase. Then you can download the DevOps-Foundation prep material instantly for study. Furthermore, we offer one year free update after your purchase. Please pay attention to your payment email, if there is any update, our system will send email attached with the Peoplecert DevOps-Foundation Updated Dumps to your email.

## Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Sharing, Shadowing and Evolving:</b> This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Measurement, Metrics, and Reporting:</b> This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Core DevOps Principles:</b> This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Business and Technology Frameworks:</b> This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.</li> </ul>

## Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q65-Q70):

### NEW QUESTION # 65

Which of the following does NOT make DevOps important now?

- A. Time to value must accelerate
- B. Enterprises have young, nimble start-up competitors
- **C. IT must continue to operate in a silo culture**
- D. Consumers have "app" mentalities and expectations

**Answer: C**

Explanation:

The urgency for DevOps adoption is driven by increasing market competition, evolving customer expectations, and the need for rapid delivery of value.

\* B: Nimble start-ups often deliver faster and more innovatively, putting pressure on established enterprises.

\* C: Customers expect continuous improvement and seamless digital experiences ("app mentality").

\* D: Reducing time-to-value is essential for staying competitive and meeting business demands.

However, A describes a siloed culture-something DevOps actively works to eliminate, not a reason for its importance. In fact, remaining siloed is an obstacle to achieving DevOps benefits, not a driver for adoption.

Therefore, A is the correct "NOT" choice.

### NEW QUESTION # 66

Which statement is NOT TRUE?

- **A. Continuous Deployment requires a manual push button**
- B. Continuous Integration requires developers commit code to trunk at least daily
- C. Waterfall approaches can take advantage of continuous integration and test-driven development practices
- D. Continuous Delivery ensures software is always in a releasable state

**Answer: A**

Explanation:

Let's clarify what these terms mean in DevOps:

\* Continuous Integration (CI): Developers integrate code into a shared repository frequently (ideally daily), with each integration automatically verified by tests.

\* Continuous Delivery (CD): Ensures software is always in a releasable state. Every change can be deployed to production, but the deployment itself may be a manual decision.

\* Continuous Deployment: Every change that passes automated tests is automatically deployed to production, without manual intervention.

Why is D ("Continuous Deployment requires a manual push button") NOT TRUE?

Because Continuous Deployment is about no manual intervention—once code passes all tests, it's automatically pushed live. Manual deployment is a feature of Continuous Delivery, not Continuous Deployment.

Extract-style reference:

"Continuous Deployment means that every change goes through the pipeline and is automatically put into production, resulting in many production deployments every day."

-Accelerate: The Science of Lean Software and DevOps, Jez Humble & Nicole Forsgren DevOps Foundation v3.6 distinguishes between Continuous Delivery (manual trigger) and Continuous Deployment (fully automated).

### NEW QUESTION # 67

What are the CORRECT set of DevOps values?

- A. Culture, Collaboration, Communication, Commitment
- B. Culture, Accountability, Lean, Metrics, Sharing
- **C. Culture, Automation, Lean, Measurement, Sharing**
- D. Culture, Automation, Lean, Metrics, Sharing

**Answer: C**

Explanation:

According to PeopleCert DevOps Foundation v3.6, the five primary values that guide successful DevOps adoption are summarized in the CALMS framework: Culture, Automation, Lean, Measurement, and Sharing.

\* Culture focuses on breaking down silos, encouraging trust, and promoting collaboration between development, operations, security, QA, and business teams.

\* Automation is essential for speeding up delivery, reducing manual errors, and ensuring repeatability across the software delivery lifecycle.

\* Lean emphasizes the elimination of waste, limiting work in progress (WIP), and improving flow.

\* Measurement means using metrics and data to inform decisions, identify bottlenecks, and drive continuous improvement.

\* Sharing fosters transparency, knowledge transfer, and a unified approach to goals and problem-solving.

Option A replaces automation and lean principles with softer collaboration aspects, which are important but not recognized as the formal value set. Option C replaces "Measurement" with "Metrics," which is only a part of measurement. Option D substitutes "Accountability" for "Automation," which is not part of the CALMS model.

Therefore, the official correct set of values per the DevOps Foundation syllabus is B.

### NEW QUESTION # 68

Which of the following is NOT a reason business is interested in DevOps?

- A. Customers value outcomes, not products
- B. Intelligent data must drive direction quickly
- **C. DevOps must automate all the things**
- D. IoT is rapidly increasing

**Answer: C**

Explanation:

Businesses are drawn to DevOps because it improves agility, responsiveness, and quality.

\* A: The growth of IoT requires scalable, automated, and reliable delivery processes.

\* B: Fast, intelligent decision-making is needed to respond to market changes.

\* D: The shift toward valuing customer outcomes over products is central to modern service delivery.

However, C is a misconception. While automation is a key DevOps practice, the goal is strategic automation- automating where it adds measurable value, improves quality, or accelerates delivery. "Automate all the things" without consideration can waste resources, increase complexity, and reduce adaptability.

### NEW QUESTION # 69

Which of the following would enable an IT organization to consolidate gains from a DevOps pilot?

- A. Introducing more advanced tools and techniques
- B. Hiring new people to expand the DevOps program
- C. Sharing lessons learned
- D. Rewarding the people who participated in the pilot

**Answer: C**

Explanation:

After a DevOps pilot, consolidating gains requires capturing and sharing lessons learned so that other teams can benefit from successes and avoid repeating mistakes.

This practice supports scaling DevOps practices across the organization by creating a shared knowledge base and promoting continuous improvement.

A (rewards) can motivate but doesn't spread the learning. B (hiring) may expand resources but doesn't ensure knowledge transfer. D (advanced tools) may enhance capability but should come after understanding what worked in the pilot.

Thus, C is the most effective action for consolidating pilot gains.

### NEW QUESTION # 70

.....

As the authoritative provider of DevOps-Foundation guide training, we can guarantee a high pass rate compared with peers, which is also proved by practice. Our good reputation is your motivation to choose our learning materials. We guarantee that if you under the guidance of our DevOps-Foundation study tool step by step you will pass the exam without a doubt and get a certificate. Our learning materials are carefully compiled over many years of practical effort and are adaptable to the needs of the exam. We firmly believe that you cannot be an exception. Choosing our DevOps-Foundation Exam Questions actually means that you will have more opportunities to be promoted in the near future. If you eventually fail the exam, we will refund the fee by the contract. We are confident that in the future, our DevOps-Foundation study tool will be more attractive and the pass rate will be further enhanced.
