

PeopleCert DevOps Foundationv3.6Exam Valid Torrent - DevOps-Foundation Training Vce & PeopleCert DevOps Foundationv3.6Exam Latest Pdf

P.S. Free 2025 Peoplecert DevOps-Foundation dumps are available on Google Drive shared by ActualVCE:
https://drive.google.com/open?id=1k_BvEM-sIx_PHU1mydsfJrbEBEYebLUW

With our users all over the world, you really should believe in the choices of so many people. Our advantage is very obvious. Of course, the right to choose is in your hands. What I want to say is that if you are eager to get an international DevOps-Foundation Certification, you must immediately select our DevOps-Foundation preparation materials. After you have studied for twenty to thirty hours on our DevOps-Foundation exam questions, you can take the test. And your pass rate will reach 99%.

We give priority to the user experiences and the clients' feedback, DevOps-Foundation practice guide will constantly improve our service and update the version to bring more conveniences to the clients and make them be satisfied. The clients' satisfaction degrees about our DevOps-Foundation training materials are our motive force source to keep forging ahead. Now you can have an understanding of our DevOps-Foundation Guide materials. Every subtle change in the mainstream of the knowledge about the DevOps-Foundation certification will be caught and we try our best to search the DevOps-Foundation study materials resources available to us.

DevOps-Foundation Updated Testkings - New DevOps-Foundation Test Tips

Just download Peoplecert DevOps-Foundation Exam Questions and start DevOps-Foundation exam preparation right now. The Peoplecert DevOps-Foundation PDF Dumps exam syllabus is updated from time to time. If you want to pass the PeopleCert DevOps Foundationv3.6Exam exam then you have to understand these changes.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q60-Q65):

NEW QUESTION # 60

Regardless of structure, what should a DevOps team NOT be?

- A. Isolated
- B. Balanced in terms of people and automation skills
- C. Continuously engaged
- D. Flat

Answer: A

Explanation:

A core goal of DevOps is to eliminate isolation between roles, teams, and departments. Isolated teams-cut off from other parts of the value stream-create bottlenecks, reduce visibility, and slow feedback.

While flat hierarchies (A), continuous engagement (C), and balanced skills (D) are positive traits, B is the opposite of DevOps principles.

Therefore, B is the correct "NOT" choice.

NEW QUESTION # 61

Which of the following sets of skills are essential for a DevOps professional?

- A. Business, technical, core (soft) skills, self-management
- B. Business, Agile, ITSM, Lean and networking
- C. Business, Agile, infrastructure, communication
- D. Business, development, cloud and containers, core skills

Answer: A

Explanation:

A DevOps professional needs:

Business skills: Understanding the business context and value.

Technical skills: Automation, coding, cloud, infrastructure.

Core (soft) skills: Collaboration, communication, empathy, learning.

Self-management: Time, priorities, feedback.

Other options miss the full blend or focus too much on tech or process.

Extract-style reference:

"DevOps success requires a blend of business, technical, and core (soft) skills, as well as the ability to self-manage and continuously learn."

- DevOps Handbook; Accelerate

PeopleCert DevOps Foundation v3.6: Holistic skillsets are emphasized for cross-functional teams.

NEW QUESTION # 62

An organization has had a series of recent failures in one of their core applications. The time it took to identify and resolve the error exceeded agreed service levels. The IT service provider is trying to identify ways to improve their ability to recover while also improving their resiliency. Which of the following principles behind the Third Way could help their situation?

- A. They could review their MTTR statistics to see where they could add more redundant systems
- B. They could provide more opportunities for feedback from DevOps stakeholders
- C. They could analyze their internal processes to identify constraints that are affecting workflow and delays
- D. They could intentionally inject faults into their infrastructure to practice their ability to recover and identify ways to increase their resiliency

Answer: D

Explanation:

The Third Way in DevOps emphasizes continual learning and experimentation. One of the most effective resilience-building practices in this category is chaos engineering or deliberate fault injection. This involves introducing controlled failures into systems—such as shutting down services, simulating network latency, or exhausting resources—to test the organization's recovery capability in realistic scenarios. By practicing recovery under controlled conditions, teams identify weaknesses in monitoring, automation, documentation, and communication before a real incident occurs. This improves Mean Time to Recovery (MTTR) and overall system resilience. Option A (constraint analysis) relates to the First Way (flow optimization). Option C focuses on feedback loops (Second Way). Option D (adding redundancy) is a possible improvement but does not inherently practice and improve operational recovery skills in the same way as deliberate fault injection.

Therefore, B is the most appropriate Third Way principle for improving resilience in this scenario.

NEW QUESTION # 63

Which statement about DevOps toolchains is CORRECT? They:

- **A. Automate tasks in a deployment pipeline**
- B. Should be standardized across applications
- C. Automate continuous testing activities
- D. Require open source tools

Answer: A

Explanation:

A DevOps toolchain is designed to automate repetitive tasks across the software delivery process. This includes compiling code, running tests, building artifacts, deploying to environments, and monitoring systems.

While a toolchain can automate continuous testing (D), that is only one of many tasks automated.

Standardization (B) is beneficial but not always required-some applications may need specialized tools.

Open source tools (C) are not mandatory; many organizations use a mix of open source and proprietary tools.

Therefore, A-automation of tasks in a deployment pipeline-is the most universally correct statement.

The DevOps Handbook- Deployment Pipeline Automation

NEW QUESTION # 64

An organization currently manages projects using traditional waterfall methods. ITIL processes are equally rigorous. A new CIO has been hired to increase IT performance and introduce DevOps practices.

Initially, which of the following would be critical success factors for DevOps?

- A. Management commitment to culture change
- B. Application of agile and lean methods
- **C. Both B and C**
- D. Forming a pilot DevOps team

Answer: C

Explanation:

Both B and C (Application of agile and lean methods + Management commitment to culture change) are critical success factors when launching DevOps in a traditional IT organization.

* Agile/Lean methods: Accelerate delivery, reduce waste, create feedback.

* Management commitment to culture change: Essential for breaking silos, changing behaviors, and making DevOps sustainable.

Forming a pilot team (A) helps, but isn't sufficient without these foundations.

Extract-style reference:

"DevOps success starts with leadership commitment to cultural change and adopting Agile and Lean principles throughout the organization."

-DevOps Handbook, State of DevOps Report

PeopleCert DevOps Foundation v3.6: Lists cultural commitment and Lean/Agile as prerequisites for DevOps transformation.

NEW QUESTION # 65

.....

We are popular not only because we own the special and well-designed DevOps-Foundation exam materials but also for we can provide you with well-rounded services beyond your imagination. At the very beginning, we have an authoritative production team and our DevOps-Foundation study guide is revised by hundreds of experts, which means that you can receive a tailor-made DevOps-Foundation Study Material according to the changes in the syllabus and the latest development in theory and breakthroughs. Without doubt, our DevOps-Foundation practice torrent keep up with the latest information.
