

Perfect Exam 2V0-12.24 Objectives for Real Exam

YOUR VMWARE 2V0-12.24 EXAM SNAPSHOT

EXAM INFO

 Duration: 115 mins	 Questions: 55
 Format: MCQs, Matching, Sequencing	
 Pass Score: 300/500	 Cost: \$250

SYLLABUS BREAKDOWN

IT Architectures, Technologies, Standards

VMware by Broadcom Solution

Plan and Design the VMware by Broadcom Solution

Install, Configure, Administrate the VMware by Broadcom Solution

Troubleshoot and Optimize the VMware by Broadcom Solution

P.S. Free & New 2V0-12.24 dumps are available on Google Drive shared by Dumpexams: https://drive.google.com/open?id=1C6D3SgfG4-UcUc_c9SZP5jIxjRnWdmyv

All these three 2V0-12.24 real dumps formats contain the actual and updated VMware vSphere Foundation 5.2 Administrator 2V0-12.24 exam questions that will surely repeat in the upcoming 2V0-12.24 exam and you can easily pass it with good scores. Today is the best time to learn new in-demand skills and upgrade your knowledge. Yes, you can do this easily. Just enroll in the VMware vSphere Foundation 5.2 Administrator 2V0-12.24 Exam and start preparation with VMware vSphere Foundation 5.2 Administrator 2V0-12.24 exam dumps. The updated, real, and verified VMware Dumps are ready for download. Just pay affordable VMware vSphere Foundation 5.2 Administrator 2V0-12.24 exam dumps charges and get the exam dumps file in your mailbox and start Dumpexams 2V0-12.24 exam preparation.

Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged 2V0-12.24 certification, can they become popular employees. So for you, the 2V0-12.24 latest braindumps compiled by our company can offer you the best help. With our test-oriented 2V0-12.24 Test Prep in hand, we guarantee that you can pass the 2V0-12.24 exam as easy as blowing away the dust, as long as you guarantee 20 to 30 hours practice with our 2V0-12.24 study materials.

2V0-12.24 Pass4sure Study Materials | 2V0-12.24 Valid Dumps Pdf

If you care about your qualification exams and have some queries about 2V0-12.24 preparation materials, we are pleased to serve for you, you can feel free to contact us via email or online service about your doubt. Our company are established more than 10 years, our quality of 2V0-12.24 valid practice test questions are the leading position in this filed. We believe our 2V0-12.24 exam guide will help you pass exam easily without too much spirit & time. All our 2V0-12.24 training materials are compiled painstakingly.

VMware vSphere Foundation 5.2 Administrator Sample Questions (Q27-Q32):

NEW QUESTION # 27

A company wants to enhance the network virtualization and security capabilities within their VMware Cloud Foundation environment. The goal is to block traffic even between virtual machines connected to the same logical segment (L2 network) using micro segmentation.

Which component can achieve the company's goals?

- A. Intrusion Prevention System
- B. VMware vDefend
- C. Network Detection and Response
- D. VMware NSX Intelligence

Answer: D

Explanation:

VMware NSX Intelligence is a component of VMware NSX that provides micro-segmentation capabilities, enabling the company to block traffic between virtual machines even if they are connected to the same logical segment (Layer 2 network). It enhances security by applying fine-grained security policies at the virtual machine level, preventing unauthorized communication.

NEW QUESTION # 28

A Cloud Administrator has been tasked with verifying all of the prerequisites are in place prior to deploying VMware Aria Suite Lifecycle. The following information has been provided for the Aria Suite Lifecycle implementation:

hostname: lcm

domain: vcf.company.com

IP address: 10.0.0.150/24

IP gateway: 10.0.0.1

Which two items must the Cloud Administrator ensure are available prior to deploying VMware Aria Suite Lifecycle? (Choose two.)

- A. A DNS A Record for lcm.vcf.company.com that points to 10.0.0.150
- B. An allocated IP address for the NSX standalone Tier-1 Gateway
- C. A CA-signed SSL certificate for Aria Suite Lifecycle added to SDDC Manager
- D. An Application Virtual Network is configured in SDDC Manager
- E. A DNS PTR Record for 10.0.0.1 that points to lcm.vcf.company.com

Answer: A,B

Explanation:

A DNS A record is necessary to resolve the hostname (lcm.vcf.company.com) to the specified IP address (10.0.0.150) so that it can be correctly accessed during the deployment.

A DNS PTR record is required for reverse DNS lookup, which ensures proper identification of the IP address (10.0.0.1) to the hostname (lcm.vcf.company.com), which is important for network validation during the deployment process.

NEW QUESTION # 29

An Administrator is tasked with setting up a new workload domain with VMware Cloud Foundation. The workload domain will have the following configuration:

vSphere with Tanzu to support Kubernetes workloads

NSX for container and virtual machine networking

Aria Operations will be configured for monitoring of the infrastructure Which three steps should be taken to complete the installation and configuration of this workload domain? (Choose three.)

- A. Install Aria Operations agents on all ESXi hosts.
- **B. Enable workload management in vCenter Server.**
- C. Integrate IaaS Control Plane with the existing vCenter Server.
- **D. Deploy the Supervisor Cluster for IaaS Control Plane.**
- **E. Configure NSX segments for Kubernetes namespaces.**

Answer: B,D,E

Explanation:

NSX segments need to be configured for Kubernetes namespaces to provide network connectivity and isolation for the Kubernetes workloads that will be deployed.

The Supervisor Cluster must be deployed as part of the IaaS Control Plane to manage the Kubernetes workloads and enable vSphere with Tanzu.

Enabling workload management in vCenter Server allows the deployment and management of Kubernetes workloads alongside virtual machines, utilizing vSphere with Tanzu.

NEW QUESTION # 30

An administrator successfully removed a host from a VMware vSphere cluster and decommissioned it in SDDC Manager. What must be done before the host can be recommissioned and added back to the SDDC Manager inventory?

- A. Manually uninstall the NSX VIBs on the host.
- **B. Log in to the host console and select "Reset System Configuration" from the ESXi DCUI.**
- C. Reinstall ESXi on the host.
- D. From the host console, use the /sbin/generate-certificates command to generate a new self-signed certificate.

Answer: B

Explanation:

Before the host can be recommissioned and added back to the SDDC Manager inventory, you must reset the system configuration. This can be done from the ESXi Direct Console User Interface (DCUI) by selecting the "Reset System Configuration" option. This will remove any previous configuration and allow the host to be re-added to the environment.

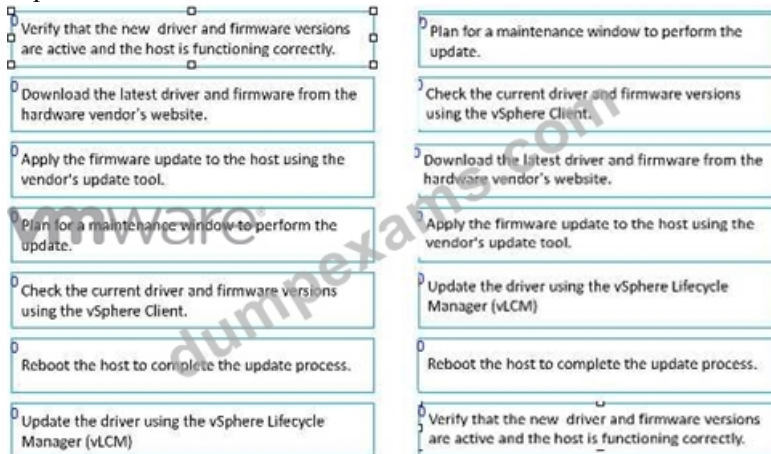

NEW QUESTION # 31

Put the following steps in the correct order to update the driver/firmware in vSAN.

Verify that the new driver and firmware versions are active and the host is functioning correctly.	Step 1
Download the latest driver and firmware from the hardware vendor's website.	Step 2
Apply the firmware update to the host using the vendor's update tool.	Step 3
Plan for a maintenance window to perform the update.	Step 4
Check the current driver and firmware versions using the vSphere Client.	Step 5
Reboot the host to complete the update process.	Step 6
Update the driver using the vSphere Lifecycle Manager (vLCM)	Step 7

Answer:

Explanation:

NEW QUESTION # 32

.....

A free trial service is provided for all customers by our 2V0-12.24 study quiz, whose purpose is to allow customers to understand our products in depth before purchase. Many students often complain that they cannot purchase counseling materials suitable for themselves. A lot of that stuff was thrown away as soon as it came back. However, you will definitely not encounter such a problem when you purchase 2V0-12.24 Preparation questions. We have free demos of the 2V0-12.24 exam questions to download.
