ECCouncil Certified Cybersecurity Technician Sample Questions (Q61-Q66):

NEW QUESTION # 61
You recently purchased a smart thermostat for your home. It allows you to control the temperature remotely through a mobile app. Considering the security of your new smart thermostat, which of the following actions would be the LEAST effective In protecting It from unauthorized access?

- A. Changing the default password for the mobile app and thermostat upon initial setup.
- B. Leaving the thermostat connected to the "Guest" Wi-Fi network in your home, which is open to all guests.
- C. Keeping the thermostat firmware updated with the latest security patches from the manufacturer.
- D. Enabling remote access to the thermostat only on your secure home Wi-Fi network.

Answer: B

NEW QUESTION # 62
Dany, a member of a forensic team, was actively involved in an online crime investigation process. Dany's main responsibilities included providing legal advice on conducting the investigation and addressing legal issues involved in the forensic investigation process. Identify the role played by Dany in the above scenario.

- A. Incident analyzer

- B. Attorney
- C. Incident responder
- D. Expert witness

Answer: B

Explanation:
Attorney is the role played by Dany in the above scenario. Attorney is a member of a forensic team who provides legal advice on conducting the investigation and addresses legal issues involved in the forensic investigation process. Attorney can help with obtaining search warrants, preserving evidence, complying with laws and regulations, and presenting cases in court3. Reference: Attorney Role in Forensic Investigation

NEW QUESTION # 63
Steve, a network engineer, was tasked with troubleshooting a network issue that is causing unexpected packet drops. For this purpose, he employed a network troubleshooting utility to capture the ICMP echo request packets sent to the server. He identified that certain packets are dropped at the gateway due to poor network connection.
Identify the network troubleshooting utility employed by Steve in the above scenario.

- A. arp
- B. ipconfig
- C. traceroute
- D. dnsenurn

Answer: C

Explanation:
Traceroute is the network troubleshooting utility employed by Steve in the above scenario.
Traceroute is a utility that traces the route of packets from a source host to a destination host over a network. Traceroute sends ICMP echo request packets with increasing TTL (Time to Live) values and records the ICMP echo reply packets from each intermediate router or gateway along the path. Traceroute can help identify the network hops, latency, and packet loss between the source and destination hosts.Dnsenum is a utility that enumerates DNS information from a domain name or an IP address. Arp is a utility that displays and modifies the ARP (Address Resolution Protocol) cache of a host. Ipconfig is a utility that displays and configures the IP (Internet Protocol) settings of a host.

NEW QUESTION # 64
Arabella, a forensic officer, documented all the evidence related to the case in a standard forensic investigation report template. She filled different sections of the report covering all the details of the crime along with the daily progress of the investigation process.
In which of the following sections of the forensic investigation report did Arabella record the "nature of the claim and information provided to the officers"?

- A. Evidence information
- B. Evaluation and analysis process
- C. Investigation objectives
- D. Investigation process

Answer: A

NEW QUESTION # 65
Sam, a software engineer, visited an organization to give a demonstration on a software tool that helps in business development. The administrator at the organization created a least privileged account on a system and allocated that system to Sam for the demonstration. Using this account, Sam can only access the files that are required for the demonstration and cannot open any other file in the system.
Which of the following types of accounts the organization has given to Sam in the above scenario?

- A. User account
- B. Administrator account
- C. Service account
- D. Guest account

Answer: D

Explanation:
The correct answer is B, as it identifies the type of account that the organization has given to Sam in the above scenario. A guest account is a type of account that allows temporary or limited access to a system or network for visitors or users who do not belong to the organization. A guest account typically has minimal privileges and permissions and can only access certain files or applications. In the above scenario, the organization has given Sam a guest account for the demonstration. Using this account, Sam can only access the files that are required for the demonstration and cannot open any other file in the system. Option A is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. A service account is a type of account that allows applications or services to run on a system or network under a specific identity. A service account typically has high privileges and permissions and can access various files or applications. In the above scenario, the organization has not given Sam a service account for the demonstration. Option C is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. A user account is a type of account that allows regular access to a system or network for employees or members of an organization. A user account typically has moderate privileges and permissions and can access various files or applications depending on their role. In the above scenario, the organization has not given Sam a user account for thedemonstration. Option D is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. An administrator account is a type of account that allows full access to a system or network for administrators or managers of an organization. An administrator account typically has the highest privileges and permissions and can access and modify any files or applications. In the above scenario, the organization has not given Sam an administrator account for the demonstration.
