Dies kann bessere Resultate bei weniger Einsatz erzielen. Unsere Fast2test Website strebt danach, den Kandidaten alle echten Schulungsunterlagen zur CompTIA PK0-005 Zertifizierungsprüfung zur Verfügung zu stellen. Die Software-Version zur CompTIA PK0-005 Zertifizierungsprüfung hat eine breite Abdeckung und kann Ihnen eine große Menge Zeit und Energie ersparen.

CompTIA Project+ Certification Exam PK0-005 Prüfungsfragen mit Lösungen (Q199-Q204):

199. Frage

During the testing phase of a project, the legal department rejected a deliverable due to compliance issues. The project manager reviewed the risk register and triggered the mitigation plan for this item. Which of the following documents should the project manager update next?

- A. Status report
- B. Task board
- C. Issue log
- D. Schedule

Antwort: C

Begründung:

An issue log is a document that records and tracks any issues that arise during a project and how they are resolved¹. It is different from a risk register, which records and tracks potential risks that may or may not occur during a project². When a risk becomes an issue, it means that it has occurred and has a negative impact on the project. Therefore, the project manager should update the issue log next to document the compliance issue, its cause, its impact, its priority, its owner, and its resolution status³. Updating the issue log will help the project manager communicate the issue to the stakeholders, monitor the progress of the mitigation plan, and prevent similar issues from happening again⁴. 200. Frage

A critical piece of equipment that is needed for the installation of a point-of-sale solution is delayed from the manufacturer. The delay will cause the project to be significantly behind schedule. The project manager decides to buy the item at a higher cost from another vendor who can supply it immediately. Which of the following risk management approaches has the project manager taken?

- A. Share
- B. Accept
- C. Mitigate
- D. Transfer

Antwort: C

Begründung:

The project manager has taken a risk mitigation approach by buying the item from another vendor who can supply it immediately. Risk mitigation is a strategy that involves reducing the probability and/or impact of a negative risk to an acceptable level. By purchasing the item from another vendor, the project manager has reduced the impact of the delay on the project schedule, even though it may have increased the project cost.

Risk mitigation is different from risk transfer, which involves shifting the responsibility or burden of a risk to a third party, usually through a contract or insurance. Risk acceptance is a strategy that involves acknowledging the risk and being prepared to deal with

its consequences. Risk sharing is a strategy that involves allocating some or all of the ownership of a risk to another party who is willing to take on that risk, usually for some form of incentive or reward. 201. Frage

A financial manager reports that several employees' allocations from the past month appear to be 200% even though they are only assigned to a particular project. Which of the following could MOST likely be the cause of this issue?

- A. A project manager did not release the resources
- B. A project manager assigned the wrong resources.
- C. A project manager did not provide the project sign-off.
- D. A project manager did not remove the system access.

Antwort: A

Begründung:

Explanation

A project manager did not release the resources. A project manager not releasing the resources could most likely be the cause of this issue where several employees' allocations from the past month appear to be 200% even though they are only assigned to a particular project. Releasing resources is a process of freeing up or reallocating any human or material resources that were used for a project after its completion or closure.

Releasing resources can help to update the resource availability and utilization records and avoid any conflicts or errors in resource allocation or reporting.

202. Frage

Which of the following BEST illustrates how team members with different roles should interact on the team?

- A. WBS
- B. RACI
- C. PERT
- D. SOW

Antwort: B

Begründung:

RACI is a tool that best illustrates how team members with different roles should interact on the team. RACI is an acronym that stands for responsible, accountable, consulted, and informed. RACI is a type of responsibility assignment matrix (RAM) that defines and clarifies the roles and responsibilities of each team member for each task or activity in a project. RACI can help to improve communication, collaboration, and accountability among team members and avoid confusion, duplication, or conflicts3

203. Frage

A key stakeholder recommends to a senior developer that a new feature be added. The new feature is not part of the current requirement documentation. Which of the following is MOST likely happening?

- A. Project change
- B. Decision-making
- C. Scope creep
- D. Collecting requirements

Antwort: C

Begründung:

Explanation

Scope creep is most likely happening when a key stakeholder recommends to a senior developer that a new feature be added that is not part of the current requirement documentation. Scope creep is a term that refers to the uncontrolled expansion or change of a project's scope beyond its original boundaries or objectives. Scope creep can happen due to various reasons, such as changing
