efficiency.

Microsoft Power Platform Functional Consultant Sample Questions (Q18-Q23):

NEW QUESTION # 18

You are building a model-driven app for a company.

You identify several custom commands that the app must support, including the following commands:

- * Save a row.
- * Move the user to a different row in the application.
- * Navigate the user to an external webpage.
- * Show a notification that the user can accept or decline.

You need to identify the formula to use for each requirement.

Which formulas should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows the Microsoft Power Fx formulas interface. On the left, under the heading "Requirement", there are four requirements listed: "Save a row.", "Move to a different row.", "Navigate the user to an external webpage.", and "Show a notification with options.". On the right, under the heading "Formula", there are four dropdown menus. The first dropdown menu is open, showing options: Patch(), Patch() (highlighted), SaveData(), SubmitForm(), and Confirm(). The second dropdown menu is open, showing options: Navigate() (highlighted), Back(), Exit(), Launch(), and Navigate(). The third dropdown menu is open, showing options: Launch() (highlighted), Back(), Exit(), Launch(), and Navigate(). The fourth dropdown menu is open, showing options: Confirm() (highlighted), InvokeControl(), Notify(), and Set().

Answer:

Explanation:

Power Fx formulas

Requirement

Save a row.

Move to a different row.

Navigate the user to an external webpage.

Show a notification with options.

Formula

Patch()

Save a row.

Move to a different row.

Navigate the user to an external webpage.

Show a notification with options.

Formula

Patch()

Navigate()

Launch()

Confirm()

NEW QUESTION # 19

A company deploys several model-driven apps. The company uses shared devices in their warehouse. The devices are always powered on. Users log on to the devices and then launch the apps to perform actions.

Unauthorized users recently uploaded several files after another user failed to log out of a device. The company needs to prevent these incidents from occurring in the future.

You need to configure the solution to prevent the reported security incidents.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Prevent unauthorized access to devices.	Set an inactivity limit in the user's group policy. Set a timeout in the Power Platform admin center. Configure access controls in Azure Active Directory. Configure a Power Automate flow to poll for user inactivity on the devices.
Prevent users from uploading a specific type of file.	Enter the restricted file types in the SharePoint admin center. Enter the allowed file types in the Power Platform admin center. Enter the restricted file types in the Power Platform admin center.

Answer:

Explanation:

Requirement	Action
Prevent unauthorized access to devices.	Set an inactivity limit in the user's group policy. Set a timeout in the Power Platform admin center. Configure access controls in Azure Active Directory. Configure a Power Automate flow to poll for user inactivity on the devices.
Prevent users from uploading a specific type of file.	Enter the restricted file types in the SharePoint admin center. Enter the allowed file types in the Power Platform admin center. Enter the restricted file types in the Power Platform admin center.

NEW QUESTION # 20

You are designing a desktop user interface (UI) flow.

The UI flow automates legacy software.

You need to prepare data for transfer to a Microsoft SharePoint list.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select information to pass to the SharePoint list.	
Copy and paste the text in the output definition window.	
On the Outputs menu of the UI flow, choose Select text on screen .	
Enter a name and description for the output.	
Start recording the UI flow.	
Stop the recording and save the flow.	

Answer:

Explanation:

Answer Area
Start recording the UI Flow.
On the Outputs menu of the UI flow, choose Select text on screen.
Select information to pass to the SharePoint list.
Enter a name and description for the output.

- 1 - Start recording the UI Flow.
- 2 - On the Outputs menu of the UI flow, choose Select text on screen.
- 3 - Select information to pass to the SharePoint list.
- 4 - Enter a name and description for the output.

NEW QUESTION # 21

A company is creating a canvas app and a model-driven app to manage their customer accounts.

The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.

The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.

You need to configure the scope for the business rules.

Which scope should you use? To answer, drag the appropriate scopes to the correct business rules. Each scope may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Scopes

- All forms
- Specific form
- Table

Business rule

- Business Type column setting for customer size
- Account rating re-evaluation

Scope

-
-

Answer:

Explanation:

Scopes

- All forms
- Specific form
- Table

Business rule

- Business Type column setting for customer size
- Account rating re-evaluation

Scope

- Table
- Specific form

Explanation

Box 1: Table

The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.

Scope the business rule to Entity (Table).

Box 2: Specific form

The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.

For Model

The scope of the business rule determines which forms the business rule will be applied. You set the scope, according to the following:

If you select this item...

The scope is set to...

Entity- The table and all forms for the table

All Forms- All forms for the table

Specific form (account Main Form, for example) - Just that form
