We would be very pleased and thankful if you can spare your valuable time to have a look about features of our PL-200 study materials.

Microsoft Power Platform Functional Consultant Sample Questions (Q168-Q173):

NEW QUESTION # 168

You are examining several processes to determine if you can automate the processes by using Power Automate.

The processes must run without human intervention when possible.

You need to determine which flow type should be used for each process.

Which flow type should you use? To answer, drag the appropriate processes to the correct flow types. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Flow types

Scheduled cloud flow
Attended desktop flow
Unattended desktop flow

Answer Area

Process	Flow type
Employees enter leave requests into a web page. Use web automation to collect data from the web browser and send the information to a supervisor so that the supervisor can approve or reject the leave request.	
Read data from a text file and populate the data into a third-party desktop application by using saved credentials.	

Answer:

Explanation:

Flow types	Answer Area	Flow type
Scheduled cloud flow	Employees enter leave requests into a web page. Use web automation to collect data from the web browser and send the information to a supervisor so that the supervisor can approve or reject the leave request.	Attended desktop flow
Attended desktop flow	Read data from a text file and populate the data into a third-party desktop application by using saved credentials.	Unattended desktop flow
Unattended desktop flow		

n.

NEW QUESTION # 169

You create functionality for a company. The functionality includes a Microsoft Dataverse table with a form for data entry. The functionality will be distributed to other lines of business in the company, each with its own Dataverse environment.

New forms must not be created in order for updates to the functionality to work correctly.

You need to package the new functionality for distribution.

What should you do?

- A. Use a managed solution and disable the ability to create new forms for the table.
- B. Use a patch solution and disable the ability to create new forms for the table.
- C. Use an unmanaged solution and include only the needed form.
- D. Use a managed solution and include only the needed form.

Answer: D

Explanation:

Explanation

Managed solutions are used to deploy to any environment that isn't a development environment for that solution. This includes test, UAT, SIT, and production environments. Managed solutions can be serviced independently from other managed solutions in an environment. As an ALM best practice, managed solutions should be generated by exporting an unmanaged solution as managed and considered a build artifact.

Additionally:

You can't edit components directly within a managed solution.

NEW QUESTION # 170

You need to define the table types for Contoso Suites.

Which table type should you define for each requirement? To answer, move the appropriate table types to the correct tables. You may use each table type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types

- Activity
- Elastic
- Standard
- Virtual

Table types for each table

- Adopters
- Dogs
- Exercise
- Feeding

Answer:

Explanation:

Types

- Activity
- Elastic
- Standard
- Virtual

Table types for each table

- Adopters: Standard
- Dogs: Standard
- Exercise: Activity
- Feeding: Activity

Explanation:

Types

- Activity
- Elastic
- Standard
- Virtual

Table types for each table

- Adopters: Standard
- Dogs: Standard
- Exercise: Activity
- Feeding: Activity

NEW QUESTION # 171

You create a parent entity and a child entity. The parent entity has a 1:N relationship with the child entity.

You need to ensure that when the owner changes on the parent record that all child records are assigned to the new owner.

You need to configure the relationship behavior type.

What should you use?

- A. Parental
- B. Referential
- C. Restrict
- D. Referential, Restrict Delete

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/create-and-edit-1n-relationships#relationship->

behavior A parental table relationship is any 1:N table relationship where one of the cascading options in the Parental column of the following table is true.

Action	Parental	Not Parental
Assign	Cascade All Cascade User-owned Cascade Active	Cascade None
Delete	Cascade All	RemoveLink Restrict
Reparent	Cascade All Cascade User-owned Cascade Active	Cascade None
Share	Cascade All Cascade User-owned Cascade Active	Cascade None
Unshare	Cascade All Cascade User-owned Cascade Active	Cascade None

Unattended desktop flow			

Explanation

Text Description automatically generated

Process	Flow type
Employees enter leave requests into a web page. Use web automation to collect data from the web browser and send the information to a supervisor so that the supervisor can approve or reject the leave request.	 Attended desktop flow
Read data from a text file and populate the data into a third-party desktop application by using saved credentials.	Unattended desktop flow

Box 1: Attended desktop flow

Desktop flows are used to automate tasks on the Web or the desktop.

To run an attended desktop flow, you need to have an active Windows user session that matches the name of the user configured for your connection.

Note: Web applications are critical components of most organizations, and they are commonly used to access data from servers. Most CRM and ERP platforms run through web browsers, while the most popular business productivity tools are web services. Web applications are unquestionably an integral part of the technological infrastructure of most companies.

To provide automation solutions for these applications, Power Automate Desktop supports all major browsers through its web automation actions.

Box 2: Unattended desktop flow.

Unattended desktop flows are best for applications that do not need human supervision.
