NEW QUESTION # 180

You create a JavaScript web resource named MyBusinessLogic. The code it contains uses functionality from a third-party JavaScript library.

You notice that an independent software vendor (ISV) solution uses the same third-party library in their managed solution.

You plan to deploy your solution to other environments by using a managed solution. The ISV solution might not be installed in the other environments.

You need to package the solution for deployment.

What are two ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Add the code from the third-party JavaScript library to MyBusinessLogic. Add MyBusinessLogic to the solution.
- B. Create a new JavaScript web resource by using the code from the third-party library. Add the new JavaScript web resource along with MyBusinessLogic to the solution.
- C. Add a copy of the JavaScript library from the ISV to the solution along with MyBusinessLogic.
- D. Add only the third-party JavaScript web resource to the solution.

Answer: A,B

Explanation:

Web resources in model-driven apps.

Web resources are virtual files that are stored in the Microsoft Dataverse database and that you can retrieve by using a unique URL address.

Capabilities of web resources.

Web resources represent files that can be used to extend the Dataverse web application such as html files, JavaScript, and CSS, and several image formats.

NEW QUESTION # 181

A company has employees in France, Mexico, and the United States. You are creating a Power Apps app to allow users to add client records to Microsoft Dataverse. The default language for the company is English.

The company wants the app to display each local language.

You need to add the Spanish and French languages.

Which four actions should you perform in sequence for each language? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Import the solution.	
Export translations.	
Replace the language code column and translated wording in the CrmTranslations.xml file.	
Select an unmanaged solution.	
Select a managed solution.	
Add a language code column and translated wording in the CrmTranslations.xml file.	
Import translations.	
Export the solution.	

Answer:

Explanation:

Actions	Answer Area
Import the solution.	Select an unmanaged solution.
Export translations.	Export translations.
Replace the language code column and translated wording in the CrmTranslations.xml file.	Add a language code column and translated wording in the CrmTranslations.xml file.
Select an unmanaged solution.	Import translations.
Select a managed solution.	
Add a language code column and translated wording in the CrmTranslations.xml file.	
Import translations.	
Export the solution.
