You have an app workspace that contains a dashboard and four reports. All the reports are generated from a single dataset that contains sales data for your company.

The reports display the data configured as shown in the following table.

Report name	Data displayed	Data characteristic
Sales Data1	Sales from the start of 2013 to the end of 2015	The company was owned by another company named Contoso, Ltd. from 2013 to 2015
Sales Data2	Sales from the start of 2011 to the end of 2016	The company changed the line of products sold frequently from 2011 to 2016
Sales Data3	Sales from the start of 2016 to the end of 2017	The company hired new management that started in 2016
Sales Data4	Sales from the start of 2011 to the end of 2014	The company was being sued by a competitor from 2011 to 2014

You need to ensure that the users of the reports can locate the correct report by using natural language queries. What should you do?

- A. From the properties of the dataset, create four Featured Q&A Questions.
- B. From the properties of the dataset, modify the Q&A and Cortana settings.
- C. From the properties of the workspace, modify the Language Settings.
- D. From the Format settings of the reports, modify the Page Information.

Answer: B

You have a Microsoft Excel workbook that contains two sheets named Sheet1 and Sheet2. Sheet1 contains the following table named Table1.

Products
abc
def
ghi
jkl
mno

Sheet2 contains the following table named Table2.

Products
abc
xyz
tuv
mno
pqr
stu

You need to use Power Query Editor to combine the products from Table1 and Table2 into the following table that has one column containing no duplicate values.

Products
abc
xyz
tuv
mno
pqr
stu
def
ghi
jkl

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- From Power BI Desktop, import the data from Excel, and select **Table1** and **Table2**.
- From Power Query Editor, select **Table1**, and then select **Remove duplicates**.
- From Power Query Editor, merge Table1 and Table2.
- From Power Query Editor, remove errors from the table.
- From Power Query Editor, append Table2 to Table1.

Answer Area

Answer:

Explanation:

Actions

- From Power BI Desktop, import the data from Excel, and select **Table1** and **Table2**.
- From Power Query Editor, select **Table1**, and then select **Remove duplicates**.
- From Power Query Editor, merge Table1 and Table2.
- From Power Query Editor, remove errors from the table.
- From Power Query Editor, append Table2 to Table1.

Answer Area

From Power BI Desktop, import the data from Excel, and select **Table1** and **Table2**.

From Power Query Editor, append Table2 to Table1.

From Power Query Editor, select **Table1**, and then select **Remove duplicates**.

Explanation:

Answer Area

1 From Power BI Desktop, import the data from Excel, and select **Table1** and **Table2**.
2 From Power Query Editor, append Table2 to Table1.
3 From Power Query Editor, select **Table1**, and then select **Remove duplicates**.

NEW QUESTION # 115

You have two tables named Customers and Invoice in a Power BI model. The Customers table contains the following fields:

CustomerID
Customer City
Customer State
Customer Name
Customer Address 1
Customer Address 2
Customer Postal Code

The Invoice table contains the following fields:

Order ID
Invoice ID
Invoice Date
Customer ID
Total Amount
Total Item Count

The Customers table is related to the Invoice table through the Customer ID columns. A customer can have many invoices within one month.

The Power BI model must provide the following information:

The number of customers invoiced in each state last month

The average invoice amount per customer in each postal code

You need to define the relationship from the Customers table to the Invoice table. The solution must optimize query performance.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Cardinality:

	▼
Many-to-many	
Many-to-one	
One-to-many	
One-to-one	

Cross-filter direction:

	▼
Both	
Single	

Answer:

Explanation:

Cardinality:

- Many-to-many
- Many-to-one
- One-to-many
- One-to-one

Cross-filter direction:

- Both
- Single

NEW QUESTION # 116

Drag and Drop Question

You plan to create a report that will display sales data from the last year for multiple regions.

You need to restrict access to individual rows of the data on a per region-basis by using roles.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Publish the report.	
Assign users to the role.	
Add a filter to the report.	
Create a role definition.	
Import the data to Power BI Desktop.	

Answer:

Explanation:

Actions	Answer Area
	Import the data to Power BI Desktop.
	Create a role definition.
Add a filter to the report.	Assign users to the role.
	Publish the report.

Explanation:

You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.

To define security roles, follow these steps.

1. Import data into your Power BI Desktop report (Step 1)
2. From the Modeling tab, select Manage Roles.
3. From the Manage roles window, select Create. (Step 2)
4. Under Roles, provide a name for the role.
5. Under Tables, select the table to which you want to apply a DAX rule.
6. In the Table filter DAX expression box, enter the DAX expressions. This expression returns a value of true or false. For example:

[Entity ID] = %Value%(Step 3)

7. After you've created the DAX expression, select the checkmark above the expression box to validate the expression.

8. Select Save.

Step 3: Assign Users to the role.

You can't assign users to a role within Power BI Desktop. You assign them in the Power BI service.

After you've created your roles, test the results of the roles within Power BI Desktop.

Step 4: Publish the report.

Now that you're done validating the roles in Power BI Desktop, go ahead and publish your report to the Power BI service.
