Free PDF 2025 Microsoft Latest PL-400: Microsoft Power Platform Developer Reasonable Exam Price

If you want to pass your exam and get the certification in a short time, choosing the suitable PL-400 exam questions are very important for you. You must pay more attention to the PL-400 study materials. In order to provide all customers with the suitable study materials, a lot of experts from our company designed the PL-400 Training Materials. We can promise that if you buy our PL-400 exam questions, it will be very easy for you to pass your PL-400 exam and get the certification.

Microsoft Power Platform Developer certification has become one of the most sought-after credentials by IT professionals in recent times. Microsoft Power Platform Developer certification is designed for developers who create solutions using the Microsoft Power Platform. The Microsoft PL-400 Certification Exam is a new addition to the list of Microsoft certifications and is designed to test the skills and knowledge required to develop solutions using Power Platform technologies.

Microsoft Power Platform Developer Sample Questions (Q166-Q171):

NEW QUESTION # 166
You are developing a Power Platform solution. You are modifying a business process flow. You have created a new radial knob for the Total amount value and have added the radial knob to the form.
The Total amount value must be entered at initiation before moving to the next step.
You need to configure the business process flow.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

1 - Create a new solution and add the business process flow and export the solution. Delete the solution after export.
2 - Copy custom control configurations to the business process flow FormXML for the related entity form.
3 - Import the solution into the Dataverse
4 - Open the business process in the Business Process Flow designer and select Activate/Update

NEW QUESTION # 167
You ate creating a Microsoft Power Automate flow.
The flow must prompt a user for some input and populate a field in an app based on the user's input You need to add an expression that returns User1 if the input from the user is High. Otherwise, the expression must return User2.
How should you complete the expression? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

if(equals ▼ (outputs('UserInput')?['body/Type],'High'),' [User1 ▼] ' , ' [User2 ▼])

equals
equals
greaterOrEquals
empty
item

User1 ▼
User1
User2
True
False

User2 ▼
User1
User2
True
False

Answer:

Explanation:

Answer Area

if(equals ▼ (outputs('UserInput')?['body/Type],'High'),' [User1 ▼] ' , ' [User2 ▼])

equals
equals
greaterOrEquals
empty
item

User1 ▼
User1
User2
True
False

User2 ▼
User1
User2
True
False

Explanation:

Answer Area

if(equals ▼ (outputs('UserInput')?['body/Type],'High'),' User1 ▼ ' , ' User2 ▼ ')

NEW QUESTION # 168
You need to select the appropriate methods using the Azure Event Grid.
Which method should you use for each requirement? To answer, drag the appropriate methods to the correct requirements. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Methods

Event handler
Event sources
Event subscription
Events

Answer Area

Requirement	Method
Notify the infrastructure team when a new virtual machine is created.	
Route orders over $5,000 to the credit department.	

Answer:

Explanation:

Methods

Event handler
Event sources
Event subscription
Events

Answer Area

Requirement	Method
Notify the infrastructure team when a new virtual machine is created.	Event handler
Route orders over $5,000 to the credit department.	Event subscription

NEW QUESTION # 169
You need to configure a custom connector for the claim submission portal API.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

NEW QUESTION # 170

You need to select connectors for the app.

Which types of connectors should you use? To answer, drag the appropriate connectors to the correct requirements. Each connector may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Connectors	Requirement	Connectors
Create a custom connector.	View full registration records.	
Use an AppSource connector.	View customer names.	
Use a native application function.	View daily registrations.	
Create a connector with a Postman collection.		

Answer:

Explanation:

Processes	Function	Process
Power Automate	Create a Slack notification from a lead.	Power Automate
Business rule	Change the priority field.	Business process flow
Business process flow	Ensure appropriate information is added to leads	Business rule

Explanation

Requirement	Connectors
View full registration records.	Create a custom connector.
View customer names.	Use an AppSource connector.
View daily registrations.	Use a native application function.

Box 1: Create a custom connector

A custom connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Power Automate, or Power Apps to communicate with that REST or SOAP API.

Box 2: Use an AppSource connector

You can only retrieve the Customer, UnifiedActivity, and Segments entities through the Power Apps connector. Other entities are shown because the underlying connector supports them through triggers in Power Automate.

Scenario: Customer information is stored in the Accounts entity.

Box 3: Use a native application function

You must produce a report that details the number of registrations for a day and send the report as a PDF to the management team.
