PL-400 Reliable Dumps Ebook | Online PL-400 Version

The TestsDumps is one of the top-rated and trusted platforms that are committed to making the Microsoft Power Platform Developer (PL-400) certification exam journey successful. To achieve this objective TestsDumps has hired a team of experienced and qualified Microsoft PL-400 Exam trainers. They work together and put all their expertise to maintain the top standard of PL-400 practice test all the time.

Microsoft PL-400 exam, also known as the Microsoft Power Platform Developer exam, is a certification exam designed for professionals who want to validate their skills and knowledge in developing and customizing Microsoft Power Platform solutions. Microsoft Power Platform is a suite of tools that includes Power BI, Power Apps, Power Automate, and Power Virtual Agents. These tools enable individuals and organizations to create custom business solutions and automate workflows without the need for extensive coding knowledge.

Exam Domains

As mentioned, to pass PL-400, the candidate must have the ability to create solution components such as system integration, client user experience, user visualization and automation, and much more. In other words, this official test is based upon seven learning modules. Each of them carries a different weightage and explains a different set of skills such as:

- **Configuring Microsoft Dataverse**

  The second exam domain is all about security components, tables and columns, and application lifecycle management

including creation, import, and management.

- **Extending the platform**

  Show the most viable ways to create a plug-in, custom connector, and platform APIs in this exam domain.

- **Building & configuring Power Apps**

  This domain is the best way to demonstrate competency on model-driven apps, canvas apps, and troubleshooting the apps alongside the use of App Checker and Solution Checker.

- **Extending the user experience**

  Prove your expertise related to the business logic application using client scripting, PCF components (in the Component Framework for Power Apps), and command functions.

Microsoft PL-400 Certification Exam is designed for professionals who want to demonstrate their expertise in developing solutions on the Microsoft Power Platform. PL-400 exam is one of the most sought-after certifications in the IT industry and is a great way to showcase your skills and knowledge. Passing PL-400 exam validates that you are proficient in creating and implementing solutions on the Power Platform.

If you choose the online version of our PL-400 Study Materials, you can use our products by your any electronica equipment. We believe it will be very convenient for you, such as IPAD, phone and laptop.

Microsoft Power Platform Developer Sample Questions (Q32-Q37):

NEW QUESTION # 32
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A university has implemented Dynamics 365 Customer Engagement. Several departments use opportunity records to bid for funding for projects within their own departments.
Each department's opportunities are not visible to other departments. However, there are times when two departments need to work together on an opportunity.
You need to configure the security to meet the business requirements.
Solution: Create a security role that has organization-level access to opportunities. Give this security role to all members of the two departments who need access.
Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:
Instead use access team templates and give access to members in the two departments.

NEW QUESTION # 33

You need to correct the JavaScript code that communicates with the address verification API.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You must replace ACTIONNAME in line AV22 with northwind_ValidateAddress	○	○
You can add code at line AV28 to display an error message returned by the address validation API.	○	○
Calling the address validation API from the custom action eliminates the error reported by users.	○	○

Answer:

Explanation:

Answer Area

Statements	Yes	No
You must replace ACTIONNAME in line AV22 with northwind_ValidateAddress	☑	○
You can add code at line AV28 to display an error message returned by the address validation API.	☑	○
Calling the address validation API from the custom action eliminates the error reported by users.	○	☑

NEW QUESTION # 34
You need to configure the address verification API.
Which values should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Property	Value
Address validation message	▼
	Update
	Execute
	northwind_ValidateAddress
Execution mode	▼
	Synchronous
	Asynchronous
	Post-Operation

Answer:

Explanation:

Answer Area

Property	Value
Address validation message	▼
	Update
	Execute
	northwind_ValidateAddress
Execution mode	▼
	Synchronous
	Asynchronous
	Post-Operation

NEW QUESTION # 35

You need to select a process to create each function.

Which process should you use? To answer, drag the appropriate processes to the correct functions. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Processes	Function	Process
Power Automate	Create a Slack notification from a lead.	
Business rule	Change the priority field.	
Business process flow	Ensure appropriate information is added to leads	

Answer:

Explanation:

Processes	Function	Process
Power Automate	Create a Slack notification from a lead.	Power Automate
Business rule	Change the priority field.	Business process flow
Business process flow	Ensure appropriate information is added to leads	Business rule
