Microsoft Power Automate RPA Developer Sample Questions (Q34-Q39):

NEW QUESTION # 34

You plan to implement a data loss prevention (DLP) policy for a production environment.

You need to define the policy.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Define the scope and add all environments to the policy.
- Classify and assign connectors.
- Review and create the policy.
- Define the scope and add the environment to the policy.
- Name the policy.
- Add new tenant rules.

Answer area

Answer:

Explanation:

Actions

- Define the scope and add all environments to the policy.
- Classify and assign connectors.
- Review and create the policy.
- Define the scope and add the environment to the policy.
- Name the policy.
- Add new tenant rules.

Answer area

- Name the policy.
- Classify and assign connectors.
- Define the scope and add the environment to the policy.
- Review and create the policy.

Explanation:

To create a DLP policy, you need to follow these steps1:

Name the policy.

Classify and assign connectors.

Define the scope and add the environment to the policy. (This step doesn't apply to environment-level policies) Review and create the policy.

NEW QUESTION # 35

A company develops an automation solution.

You need to manage the flows. To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
You must run one specific flow from the queue after a flow which is currently running completes.	- In the desktop flow queue, select move to top. - In the desktop flow queue, change the priority. - In the cloud flow, change the priority for the desktop flow action to High.
You develop an automation. The automation must run at high priority each time it runs.	- In the Desktop flow runs page, change the priority. - In the Desktop flow run queue, change the priority. - In the cloud flow, change the priority for the desktop flow action to High.

Answer:

Explanation:

Answer Area

Requirement

You must run one specific flow from the queue after a flow which is currently running completes.

Action

In the desktop flow queue, select move to top.
 In the desktop flow queue, change the priority.
 In the cloud flow, change the priority for the desktop flow action to High.

You develop an automation. The automation must run at high priority each time it runs.

In the Desktop flow runs page, change the priority.
 In the Desktop flow run queue, change the priority.
 In the cloud flow, change the priority for the desktop flow action to High.

NEW QUESTION # 36

You need to select the components to use for each scenario. You must minimize development efforts. Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Scenario	Component
Query items from a SharePoint list.	☐ Built-in connector ☐ Custom connector ☐ HTTP connector ☐ Azure API Management
Share methods from a third-party REST API with an organization.	☐ Built-in connector ☐ Custom connector ☐ HTTP connector ☐ Browser automation
Call a Microsoft Graph API endpoint using application permissions.	☐ Built-in connector ☐ Custom connector ☐ HTTP connector ☐ Azure API Management

Answer:

Explanation:

Answer Area

Scenario	Component
Query items from a SharePoint list.	☒ Built-in connector ☐ Custom connector ☐ HTTP connector ☐ Azure API Management
Share methods from a third-party REST API with an organization.	☒ Built-in connector ☐ Custom connector ☒ HTTP connector ☐ Browser automation
Call a Microsoft Graph API endpoint using application permissions.	☒ Built-in connector ☐ Custom connector ☒ HTTP connector ☐ Azure API Management

Explanation

Graphical user interface, text, application, email Description automatically generated

Answer Area	
Scenario	Component
Query items from a SharePoint list.	Built-in connector Custom connector HTTP connector Azure API Management
Share methods from a third-party REST API with an organization.	Built-in connector Custom connector HTTP connector Browser automation
Call a Microsoft Graph API endpoint using application permissions.	Built-in connector Custom connector HTTP connector Azure API Management

NEW QUESTION # 37

You develop Power Automate flows for a company. You need to help users locate and run the flows. Where should you direct users to find the flows? To answer NOTE: Each correct selection is worth one point.

Answer Area	
Requirement	Value
You select the Send a copy button from the flow portal to send the flow to a business user group.	the Solutions page the Shared with me tab of the My flows page the Shared with me tab of the Templates page
You select the Share button from the portal to share the flow with business users.	the Solutions page the Shared with me tab of the My flows page the Shared with me tab of the Templates page

Answer:

Explanation:

Answer Area	
Requirement	Value
You select the Send a copy button from the flow portal to send the flow to a business user group.	the Solutions page the Shared with me tab of the My flows page the Shared with me tab of the Templates page
You select the Share button from the portal to share the flow with business users.	the Solutions page the Shared with me tab of the My flows page the Shared with me tab of the Templates page

Explanation

Graphical user interface, text, application, email Description automatically generated

Requirement	Value
You select the Send a copy button from the flow portal to send the flow to a business user group.	the Solutions page the Shared with me tab of the My flows page the Shared with me tab of the Templates page
You select the Share button from the portal to share the flow with business users.	the Solutions page the Shared with me tab of the My flows page the Shared with me tab of the Templates page

NEW QUESTION # 38

You are designing an automation that processes information from documents attached to emails.

You need to extract data from the attachments and insert the data into a custom Microsoft Dataverse table.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer

Actions
Create a collection and add documents to the collection.
Create an object detection model.
Use the model in a desktop flow.
Create a custom form processing model.
Train and publish a model.
Add extracted data to the Microsoft Dataverse table.
Use the model in a cloud flow.

Answer:

Explanation:

Actions
Create a collection and add documents to the collection.
Create an object detection model.
Use the model in a desktop flow.
Create a custom form processing model.
Train and publish a model.
Add extracted data to the Microsoft Dataverse table.
Use the model in a cloud flow.

Create a custom form processing model.
Create a collection and add documents to the collection.
Train and publish a model.
Use the model in a cloud flow.
Add extracted data to the Microsoft Dataverse table.

Explanation

Graphical user interface, text, application Description automatically generated

Answer Area
Create a custom form processing model.
Create a collection and add documents to the collection.
Train and publish a model.
Use the model in a cloud flow.
Add extracted data to the Microsoft Dataverse table.

NEW QUESTION # 39
