Wenn Sie unsere Unterlagen zur Microsoft PL-500 Prüfung benutzen, können Sie sehr leicht die Microsoft PL-500 Prüfung bestehen. Sie sollen keine Zeit an den Unterlagen verschwenden, die vielleicht keinen Sinn haben. Probieren Sie bitte den Service von EchteFrage.

Microsoft Power Automate RPA Developer PL-500 Prüfungsfragen mit Lösungen (Q142-Q147):

142. Frage

You are setting up a data loss prevention (DLP) policy for an environment. The default policy group is set to Non-business. You must configure the following apps in the policy:

- * AppA will be used for tracking business-sensitive data.
- * AppB will be deployed in six months and must be automatically added to the published policy.
- * AppC uses a custom connector. The connector uses personal data for testing. When testing is complete, the connector will connect to business-sensitive data.

You need to select the appropriate policy for each app.

Which policy should you use for each app? To answer, drag the appropriate policies to the correct apps. Each app may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Policies

Blocked
Business data
Default group
Move to business

Answer Area

App

AppA
AppB
AppC

Policy

Antwort:

Begründung:

The screenshot shows the 'Policies' list on the left, the 'Answer Area' in the center, and the 'App' and 'Policy' columns on the right. The 'Policy' column shows the following assignments: AppA is assigned 'Move to business', AppB is assigned 'Default group', and AppC is assigned 'Blocked'.

Explanation

The screenshot shows the 'Policies' list on the left, the 'Answer Area' in the center, and the 'App' and 'Policy' columns on the right. The 'Policy' column shows the following assignments: AppA is assigned 'Move to business', AppB is assigned 'Default group', and AppC is assigned 'Blocked'.

143. Frage

You develop automation solutions for a company.

You need to package the solutions.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

The screenshot shows the 'Answer Area' with two requirements and their corresponding solution types. Requirement 1: 'Share the solution with a colleague who uses a personal development environment.' Requirement 2: 'Deploy the final solution to a production environment and prevent further development.' Solution types: 'managed' and 'unmanaged'.

Antwort:

Begründung:

Requirement 2: 'Deploy the final solution to a production environment and prevent further development.' Solution types: 'managed' and 'unmanaged'.

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

Answer Area

Requirement

Share the solution with a colleague who uses a personal development environment.

Deploy the final solution to a production environment and prevent further development.

Solution type

managed
unmanaged

managed
unmanaged

144. Frage

You are building an approval process for business travel.

The approval process must meet the following requirements:

- * The solution must be deployed to the production environment. The human resources (HR) system uses a different login and password for test and production.
- * The process must assign an approval task by using the system account.
- * After the approval process is approved, it must create an entry in the on-premises HR system and create an entry in the requestor manager's calendar.
- * The approval process must be triggered whenever an employee places a new travel request on a Microsoft SharePoint list.

You need to recommend the approach to configure authentication and credentials.

Which features should you recommend? To answer, move the appropriate features to the correct requirements. You may use each feature once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content NOTE:

Each correct selection is worth one point.

Features

Azure Key Vault

Connection reference

Service principal

Authentication and credential configuration

Requirement	Feature
HR system credentials	
Approvals	
Calendar entries	
Travel requests	

Antwort:

Begründung:

Features

Azure Key Vault

Connection reference

Service principal

Authentication and credential configuration

Requirement	Feature
HR system credentials	Service principal
Approvals	Azure Key Vault
Calendar entries	Connection reference
Travel requests	Service principal

145. Frage

You are developing a cloud flow.

The flow must be able to query several Azure endpoints and must use standard actions where possible.

You need to configure the flow.

Which actions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
Issue POST requests to the Microsoft Graph API by using application permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue GET requests to the Microsoft Graph API by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue POST requests to Office 365 Management APIs by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue POST requests to SharePoint REST API by using application permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request

146. Frage

Drag and Drop Question

A user is evaluating the capabilities of both process mining and task mining.
You need to determine when you should use process mining or task mining.

Which Process advisor capability should you use? To answer, drag the appropriate capabilities to the correct requirements. Each capability may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Capabilities	Requirement	Capability
Process mining	See the actual steps used to perform a process.	
Task mining	Reduce process time by evaluating event data from a system of record.	
	Understand what employees do while performing each task.	
	Identify the most common actions based on user interactions.	

Antwort:
