Microsoft PL-600 Reliable Test Syllabus - PL-600 Valid Test Experience

Improvement in PL-600 science and technology creates unassailable power in the future construction and progress of society. PL-600 practice test can be your optimum selection and useful tool to deal with the urgent challenge. With over a decade's striving, our PL-600 training materials have become the most widely-lauded and much-anticipated products in industry. We have full technical support from our professional elites in planning and designing PL-600 Practice Test. Do not hesitate anymore. You will never regret buying PL-600 study engine!

The objective of Microsoft PL-600 Exam Certification

If you are a detail-oriented person who is extremely strong in working with complex technology, and want to be part of the solution to some of the world's most challenging problems, then you may want to consider a career as a Microsoft Platform Solution Architect. The PL-600 Power Platform Solution Architect Expert certification was created to prove that a test taker has the necessary skills and abilities to be a solutions architect for Microsoft's Power Platform. In order to earn this certification, a test taker is required to have at least three years of experience with designing and deploying enterprise-level solutions based on Microsoft's cloud technologies. **Microsoft PL-600 Dumps** exam practice exams are designed to help you prepare for your exam with real questions and answers from Microsoft Certified Professional exams. Sites, networks, and other technologies are all designed to provide the most accurate and current information about Microsoft's Power Platform. Hone your skills by preparing for the Microsoft PL-600 Exam with our free practice exams and updated Microsoft PL-600 practice exams.

How to Register For Exam PL-600: Microsoft Power Platform Solution Architect?

Exam Register Link: [https://examregistration.microsoft.com/?locale=en-us&examcode=PL-600&examname=Exam%20PL-](https://examregistration.microsoft.com/?locale=en-us&examcode=PL-600&examname=Exam%20PL-600)

Microsoft Power Platform Solution Architect Sample Questions (Q189-Q194):

NEW QUESTION # 189

You design integration with an external data source that uses sequential integer values as primary keys for the records contained in it. Data synchronization will occur in Microsoft Dataverse so users can access data.

Data within Microsoft Dataverse must be accurate against the data in the external data source.

You need to ensure that the data from the external data source does not create duplicated rows in Microsoft Dataverse.

Which two features should you use?

Each correct answer presents part of the solution.

- A. Change tracking
- B. Webhook
- C. Alternate key
- D. Upsert method
- E. Duplicate detection rules

Answer: C,D

NEW QUESTION # 190

You are designing the security model for a Power Platform solution.

The security model must meet the following requirements:

Restrict sharing of data between Power Automate connectors.

Ensure that environment administrators only see users who require access in the enabled user list.

You need to recommend security features for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Feature
Restrict sharing of data between Power Automate connectors	
Ensure that environment administrators only see users who require access in the enabled user list.	

Answer:

Explanation:

Requirement

Feature

Restrict sharing of data between Power Automate connectors

Microsoft

Ensure that environment administrators only see users who require access in the enabled user list.

Security group

Data loss prevention policy

NEW QUESTION # 191

You are a Microsoft Power Platform architect.

You must identify and document your organization's business processes to identify opportunities for automation.

You need to run task mining in process advisor.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Prepare processes and recordings.
- Analyze processes.
- Visualize processes.
- Identify automation recommendations.
- Share processes.

Answer area

Answer:

Explanation:

Actions

- Prepare processes and recordings.
- Analyze processes.
- Visualize processes.
- Identify automation recommendations.
- Share processes.

Answer area

- Prepare processes and recordings.
- Analyze processes.
- Visualize processes.
- Identify automation recommendations.
- Share processes.

Explanation:

Actions

- Prepare processes and recordings.
- Analyze processes.
- Visualize processes.
- Identify automation recommendations.
- Share processes.

Answer area

- 1 Prepare processes and recordings.
- 2 Analyze processes.
- 3 Visualize processes.
- 4 Identify automation recommendations.
- 5 Share processes.

NEW QUESTION # 192

A company plans to create a Power Apps portal to manage support cases for customers. The company has an account hierarchy for customers. The hierarchy supports accounts, cases, and contacts where both contacts and cases belong to their relevant account.

The company has the following requirements:

Portal users must only see the notes for the cases that they manage.

Portal users must only see cases that are submitted by their colleagues.

You need to design the security model for the portal.

Which entity permission scope should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Scope

Portal users must only see the notes for the cases that they manage.

	▼
Self	
Parent	
Contact	
Account	

Portal users must only see cases that are submitted by their colleagues.

	▼
Self	
Global	
Contact	
Account	

Answer:

Explanation:

Requirement	Scope										
Portal users must only see the notes for the cases that they manage.	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Self</td><td></td></tr><tr><td>Parent</td><td></td></tr><tr><td>Contact</td><td></td></tr><tr><td>Account</td><td></td></tr></table>		▼	Self		Parent		Contact		Account	
	▼										
Self											
Parent											
Contact											
Account											
Portal users must only see cases that are submitted by their colleagues.	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Self</td><td></td></tr><tr><td>Global</td><td></td></tr><tr><td>Contact</td><td></td></tr><tr><td>Account</td><td></td></tr></table>		▼	Self		Global		Contact		Account

NEW QUESTION # 193

Hotspot Question

You design a Power Platform solution for a customer. The solution uses Microsoft Dataverse as the data store. You are managing the go-live process for the solution.

The customer reports the following performance issues:

- Form load time is much slower than it was during testing.
- Overall system performance has been significantly slower than it was during testing.

You need to recommend how to troubleshoot system performance.

Which actions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Performance issue	Action
Slow form load times	- Review workflows associated with the form events. - Review QuickFind properties for the fields on the form. - Review the fields that are on the form.
Overall slow system performance	- Change all security roles from global read permissions to business unit permissions. - Review one to many relationships to verify whether cascade settings are necessary. - Change security roles from global read access to business unit to provide better performance.

Answer:

Explanation:

Performance issue	Action
Slow form load times	- Review workflows associated with the form events. - Review QuickFind properties for the fields on the form. - Review the fields that are on the form.
Overall slow system performance	- Change all security roles from global read permissions to business unit permissions. - Review one to many relationships to verify whether cascade settings are necessary. - Change security roles from global read access to business unit to provide better performance.

Explanation:

Box 1: Review the fields that are on the form

Keep the number of table columns (fields) to a minimum. The more table columns (formerly referred to as fields) you have in a form, the more data that needs to be downloaded to view each record.

Box 2: Review one to many relationships to verify whether cascade settings are necessary.
