NEW QUESTION # 105

A medical office has a model-driven app that uses Common Data Service.

You plan to create a screen that allows users to capture information about doctors. The screen must provide users the ability to enter or select the following information;

- * a place to enter doctor- profile data that is not part of the account table or the contact table.
- * a place to enter the doctor's specialty in the profile form.
- * a column for insurance with the ability to pick one of 10 different insurance companies.

You need to store the captured data in Common Data Service.

What should you use to store the data? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options

- Entity
- Field
- Option set
- Record

Requirement

- Store additional doctor profile data.
- Store information about the doctor's specialty.
- Select an insurance company.

Option

- Option
- Option
- Option

Answer:

Explanation:

Options
